

ENGINEERING TOMORROW

RET1000 and RET2000

# High performing, energy saving electronic room thermostats

- A range of dial setting and digital electronic room thermostats
- Available in hard wired and wireless versions
- Selectable chrono-proportional or on/off control
- Output 'ON' indication
- User set upper and lower temperature limits

ENGINEERING TOMORROW

# Intelligent Room Thermostats RET1000 and RET2000

## RET1000 Models

RET1000 smart room thermostats combine a sleek modern design with high performing energy saving controls.

The well-proportioned dial and clear temperature scale makes setting easy, including an easy to set upper and lower temperature limiting feature. All RET1000 thermostats include stylish backlit

LED icons providing clear indication of power and output status.

As well as standard on/off control the user can select to benefit from chrono-proportional control. Chrono-proportional control significantly improves comfort and generally improves boiler efficiency by optimising flow/ return temperature.

## RET2000 Models

RET2000 digital room thermostats combine a sleek modern design with high performing energy saving controls and are available as either hard-wired or wireless versions.

Incorporating a generous, easy to read display that clearly shows the room temperature and output status of the thermostat. Further enhanced by an inbuilt backlight, this thermostat is also ideal for those with poorer eyesight or where the location is dimly lit. Like the RET1000, the RET2000 also benefits from selectable on/ off and chrono-proportional control. Chronoproportional control significantly improves comfort and generally improves boiler efficiency by optimising water temperature.

Additional features include settable upper and lower temperature limits as well as push button lock to avoid tampering. If preferred the temperature display can also be set to show °F. The RET2000 also has the option to be set as a

cooling device, reversing the output logic and including compressor delay settings.

Included in the RET2000B-RF is a remote sensor input which can be configured for a number of applications.

## **Product Conversion Tables**

| New Part  | Can Replace                    |
|---|--------------------------------|
| RET1000MS   | RET230, RET230L                |
| RET1000M  | RET230VF, RET230VF2            |
| RET1000MD   | RET-MD                         |
| RET1000B  | New                            |
|   |                                |
| New Part  | Can Replace                    |
| RET2000MS   | RET230LS                       |
| RET2000M  | RET-M                          |
| RET2000MD   | RET-MD                         |
| RET2000B  | RET-B, RT51, RET-B-LS          |
| RET2000B-RF + RX1-S                                   | RET-B-RF + RX1                 |
| Notes: RET2000B-RF + RX<br>with RET-B-RE + RX1, in ca | 1-S is not backward compatible |

with RET-B-RF + RX1, in case of replacement, both thermostat and receiver will require changing.

## RET1000B/M/MS/MD

- Selectable chrono-proportional or On/Off control
- User set upper and lower temperature limits
- Output 'ON' indication
- Power indication

## RET2000B/M/MS/MD/RF

- Chrono-proportional or On/Off control
- User set upper and lower temperature limits
- Output 'ON' indication
- Push button lock
- Cooling option with compressor delay
- °C or °F selectable display

<sup>1</sup> Ensure there are no large metal objects between then thermostat and receiver as this will interfere with radio signal. Range within a building typically 30metres dependent on construction.
