Unit Specification

KE07205

Ramped Valve Driver

ISSUE: 1

DATE: May 1993

GENERAL DESCRIPTION

This device is a ramped valve driver which accepts a setpoint potentiometer input from a control handle and drives a dual coil proportional valve. It is pulse-width modulated and has adjustable acceleration/deceleration ramping. The threshold, full stroke forward and full stroke reverse outputs are adjustable.

The KE07205 is a direct replacement for the MXX458 or the MXX1139. It is the same as the KE07203 except it has a 3.4 volt reference for null.

DIMENSION AND CONNECTION DIAGRAM

⚠ WHEN USED WITH LOAD CONTROL, CONNECT LOAD CONTROL OUTPUT TO TERMINAL 2 AND REMOVE JUMPER J4

Dimensions in millimeters (inches).
