T2 / TE2, Thermostatic expansion valves

T2 / TE2 thermostatic expansion valves are used for liquid injection into evaporators on both refrigeration and air conditioning systems using fluorinated refrigerants e.g. R407C / R22, R134a, R404A / R507, R407C, R407F and R407A.

T2 / TE2 valves are supplied as a parts programme, with separate thermostatic element/valve body and orifice assembly. Available as angleway valves with flare x flare or flare x solder connection, with internal and external equalisation.

Features T2 / TE2

Laser-welded power element in stainless steel

- long diaphragm life
- high pressure tolerance and working pressure
- high corrosion resistance

Stainless steel capillary tube and bulb:

- high corrosion resistance
- high strength and vibration resistance

Flare or solder outlet

Laser-engraved label

Flare or solder pressure equalization

Easy adjustment of superheat setting

Interchangeable orifice assembly with dirt protection strainer

Flare inlet
Solder adaptor available as an option

Facts

Applications:

- Traditional refrigeration
- Heat pump systems
- Air conditioning units
- Liquid coolers
- Transport refrigeration

Maximum working temperature:

- -60 to 10 °C / -76 to 50 °F

Refrigerants:

- R22
- R134a
- R513A
- R448A
- R449A
- R404A
- R507

Capacity range:

- 0.18 – 6.51 TR / 0.64 – 22.9 kW

Benefit:

- Interchangeable orifice assembly
- Easy stocking
- Easy capacity matching
- Better service
- Can be supplied with MOP(Max. Operating Pressure)
- Protects the compressor motor against excessive evaporating pressure during normal operation

Technical data and ordering

Rated capacity at:

MT rated condition: Evaporating Temp. $t_e = -5\text{ }^{\circ}\text{C}$, Condensing Temp. $t_c = +40\text{ }^{\circ}\text{C}$, superheat=8K, Subcooling=4K

LT rated condition: Evaporating Temp. $t_e = -25\text{ }^{\circ}\text{C}$, Condensing Temp. $t_c = +40\text{ }^{\circ}\text{C}$, superheat=8K, Subcooling=4K

Out of the box, factory settings:

On systems charged with R134a; SSH = 5.0 °C (9.0 °F)

On systems charged with R513A; SSH = 6.1 °C (11 °F)

Note: For capacity of other refrigerant please refer datasheet of the valve or Coolselector.

TUA / TUAE, Thermostatic expansion valves

TUA / TUAE stainless steel thermostatic expansion valves are used for liquid injection into evaporators on both refrigeration and air conditioning systems using fluorinated refrigerants e.g. R134a, R404A, R407C, R22, R507 and R410A. TUA / TUAE valves are compact in design, light weight and have steel / copper bi-metal connections for fast soldering.

TUA / TUAE valves are supplied as parts programme, with separate thermostatic element / valve body, and orifice assembly. TUA has internal equalization, TUAE external equalization. TUA / TUAE are straightway valves, and have adjustable superheat setting.

Features TUA / TUAE

Stainless steel capillary tube and bulb:

- high corrosion resistance
- high strength and vibration resistance

Laser-engraved label

Laser welded stainless steel thermostatic element for unsurpassed joint strength and operational lifetime

Separate strainer, mounted on the orifice assembly for easy maintenance and cleaning

Bi-metal connections
Stainless steel with rolled on copper cladding for safe, fast and convenient copper-to-copper soldering

Orifice assembly with an unmatched hermetic seal

Facts

Applications:

- Traditional refrigeration
- Heat pump systems
- Air conditioning units
- Liquid coolers
- Ice cube machines
- Transport refrigeration

Maximum working temperature:

- -40 to 10 °C / -40 to 50 °F

Refrigerants:

- R22
- R134a
- R513A
- R404A
- R507
- R407C
- R410A

Capacity range:

- 0.11 – 6.56 TR / 0.42 – 23.1 kW

Benefit:

- The use of stainless steel makes the valves light and strong
- Bi-metal connections for safe, fast and convenient soldering
- Bi-flow function (TUAE: only orifice 1 – 8)

LT rated condition: Evaporating Temp. te = -25 °C, Condensing Temp. tc = +40 °C, superheat=8K, Subcooling=4K

*TUAE with orifice no. 9 can't be used for Biflow operation.

Out of the box, factory settings:

On systems charged with R134a; SSH = 5.0 °C (9.0 °F)

On systems charged with R513A; SSH = 6.1 °C (11 °F)

Note: For capacity of other refrigerant please refer datasheet of the valve or Coolselector.

TE 5 - TE 55, Thermostatic expansion valves

TE 5 - TE 55 thermostatic expansion valves regulate the injection of refrigerant liquid into evaporators for medium sized plants. Injection is controlled by the refrigerant superheat. Therefore the valves are especially suitable for liquid injection in "dry" evaporators where the superheat at the evaporator outlet should always be kept constant.

TE 5 - TE 55 valves are supplied as parts programme, built up of three main components - thermostatic element, orifice assembly, and valve body with connections, and have external pressure equalization. Refrigerants: R22, R134a, R404A, R507, R407A, R407F and R407C.

Features TE 5 - TE 55

Laser-welded power element in stainless steel

- longer diaphragm life
- high pressure tolerance and working pressure
- high corrosion resistance

To ensure long operating life, the valve cone and seat are made of a special alloy with particularly good wear qualities

Stainless steel capillary tube and bulb

- high corrosion resistance
- high strength and vibration resistance

Large parts programme ensures minimal stocks

Easy adjustment of superheat setting

More connection possibilities

- solder x solder
- flare x flare
- flanges
- straightway or angleway

Facts

Applications:

- Traditional refrigeration
- Air conditioning units
- Water chillers

Maximum working pressure:

- 46 bar / 667 psig

Refrigerants:

- R410A
- R22
- R134a
- R407F
- R407A
- R404A
- R507
- R407C
- R32
- R290

Capacity range:

- 2.3 – 71 TR / 8.17 – 250 kW

Benefit:

- Balance port design
- Biflow with expansion in both directions
- Cylindrical bulb and patented bulb strap design

TGE, Thermostatic expansion valve

TGE is an innovatively designed series of thermostatic expansion valves for fluorinated refrigerants. TGE has copper connections upgraded for high-pressure applications with tight soldering, and is available with a wide variety of

connection types such as solder, flare, MIO, and ORFS, and a wide variety of connection sizes.

Features TGE

Facts

Applications:

- Water chillers
- Bus A/C
- Rooftop units
- Heat pumps
- Refrigerated containers and others A/C and other refrigeration system

Maximum working pressure:

- 46 bar / 667 psig

Refrigerants:

- R410A
- R22

AKV, Electric expansion valves

AKV are electrically operated expansion valves designed for refrigeration plants. The AKV valves are designed for use with a controller from Danfoss' range of ADAP-KOOL® controllers.

The AKV valves are supplied as a parts programme with separate valve body and coil (with terminal box, cable or DIN plug). AKV has an exchangeable orifice. Refrigerants: R744, R22 / R407C, R404A / R507, R410A, R134a, R407A, R23.

Features AKV

Available with ODF solder connections (AKV 15 and AKV 20 – straightway,

The orifice assembly is replaceable

Both expansion valve and solenoid valve

Facts

Applications:

- Traditional refrigeration
- Cold rooms
- water chiller

Maximum working pressure:

- AKV 10–1–6 PS / MWP = 52 bar / 754 psig
- AKV 10–7 PS / MWP = 42 bar / 610 psig
- AKV 15–1,2,3 PS / MWP = 42 bar / 610 psig
- AKV 15–4 PS / MWP = 28 bar / 400 psig
- AKV 20 PS / MWP = 28 bar / 400 psig

Refrigerants:

- R134a
- R22
- R23
- R404A
- R507
- R407A
- R407F
- R410A
- R422B
- R422D
- R448A
- R449A
- R452A
- R513A
- R744
- R449B
- R450A

Capacity range:

- 0.2 – 114 TR / 0.8 – 404 kW

Benefit:

- The AKV valves are supplied as a parts programme, as follows:
- Separate valve incl. exchangeable orifice
- Separate coil
- The valve requires no adjustment

Technical data and ordering

ETS 6, Electric expansion valve

ETS 6 are compact and lightweight electric expansion valves. Bi-flow operation is possible for heat pump systems. The valve operation is by means of a unipolar motor, which can be controlled by a number of controllers from Danfoss or third party vendors.

With a Danfoss EKE 1A, EKE 1B, EKE 1C and EIM 336 (current drivers) and an AKS sensor, an accuracy better than ± 0.5 K can be obtained.

Features ETS 6

Cross section diagram of ETS 6 series
* Refers to refrigerant flow in cooling mode

Facts

Applications:

- Heat pumps
- Modular air-cooled chillers
- VRF
- Multi split
- Inverter mini split
- Bus air conditioning
- IT cooling

Maximum working pressure:

- 47 bar / 681 psig

Refrigerants:

- R134a
- R22
- R407C
- R404A
- R507
- R410A

Capacity range:

- 0.11 – 6.56 TR / 0.42 – 23.1 kW

Benefit:

- Compact and lightweight hermetic design with removable coil
- Bi-flow operation for reversible systems
- Power saving design that enables energy efficiency with precision flow control

ETS 12.5 – ETS 400, Electric expansion valves

ETS 12.5 - ETS 400 are electric expansion valves for precise liquid injection in evaporators for air conditioning and refrigeration applications. The valve piston and linear positioning design is fully balanced, providing bi-flow feature as well as solenoid tight shut function in both flow directions.

ETS valves are operated with a current or voltage driver such as Danfoss Controllers EKE 1A, EKE 1B, EKE 1C. ETS valve is compatible with all common refrigerant such as R410A, R407C, R404A, R134a, R22 and R507. Special ETS versions for systems with R744 (CO₂) are available.

Features ETS 12.5 - 400

Actuator with low energy consumption

Precise positioning for optimum control of liquid injection

Built-in sight glass
ETS 50 – ETS 400

Tight on shut-off,
no solenoid valve needed

Balanced piston design
removes need to hold current
and prevents step loss.

Facts

Applications:

- Heat pumps
- Refrigeration
- Air conditioning
- Chillers

Maximum working pressure:

- ETS 12.5, ETS 25, ETS 50, ETS 100: 45.5 bar / 660 psig
- ETS 250, ETS 400: 34 bar / 493 psig

Refrigerants:

- R1234ze
- R134a
- R22
- R404A
- R407A
- R407C
- R407F
- R410A
- R422B
- R422D
- R438A
- R448A
- R449A
- R450A
- R452A
- R507
- R513A

Capacity range:

- 12.2 – 556 TR / 43 – 1933 kW

Benefit:

- Balanced design (ETS 12.5 - ETS 400) providing bi-flow operation as well as solenoid tight shut-off function in both flow directions
- Precise positioning for optimum control of liquid injection
- Equipped with M12 connector for cable connection (cable and connector assemblies as accessories)

EVR version 2, Solenoid valves

EVR solenoid valves are direct or servo operated solenoid valves for liquid, suction and hot gas lines with most refrigerants, including flammable refrigerants. They are suitable for condensing units and power packs in all refrigeration, freezing and air conditioning applications and are compatible with fluorinated refrigerants R22/ R407C, R134a, R404A/R507, R410A, R407A, R32, R290, R600, R600a, R1234yf, R1234ze, R404A, R407F, R152A, R448A, R449A, R452A and R450A.

EVR 2 - EVR 22 with solder connections and without manual stem are suitable for the flammable refrigerants R152A, R32, R290, R600, R600a, R1234yf and R1234ze.

The valves can be delivered as normally open or normally closed valves and with or without manual operation.

EVR valves are available with flare, solder or flange connections.

Features EVR version 2

"Clip on" coil system for quick and easy mounting

Coil with terminal box, 1 m cable or DIN plug

Stainless steel armature

Extended ends for soldering make installation easy

Drawn stainless steel tube with internal armature top for maximum external tightness

Spring damping to increase the lifetime of the seat plate

Forged brass body for maximum external tightness

Teflon seat plate with cardan effect to secure maximum internal tightness

Facts

Applications:

- Traditional refrigeration
- Heat pump systems
- Air conditioning units
- Liquid coolers
- Transport refrigeration

Maximum working pressure:

- EVR solder and flare connections
45.2 bar / 655 psi

Refrigerants:

- R22
- R407C
- R134a
- R404A
- R507
- R410A
- R407A
- R32
- R290
- R600
- R600a
- R404A

- R125
- R152A
- R448A
- R449A
- R452A
- R450A
- R1234yf
- R1234ze

Temperature range:

- -40 – 105 °C / -40 – 221 °F

Benefit:

- High reliability and durability due to maximum internal and external tightness.
- MOPD up to 38 bar / 550 psi

EV220B, Solenoid valves

EV220B 15 – EV220B 50 is a universal indirect servo-operated 2/2-way solenoid valve program. Valve body in brass, dezincification resistant brass and stainless steel ensures that a broad variety of application can be covered.

Built-in pilot filter as standard, adjustable closing time and enclosures up to IP67 ensures optimal performance even under critical working conditions.

Features EV220B

Wide coil range up to IP67

High capacity across the entire pressure range

Broad temperature and material range

Effective against water hammer

High capacity across the entire pressure range

Insensitive to dirt

Facts

Benefit:

- 2/2-way
- Servo-operated
- DN 15 – DN 50
- Valve body available in brass, DZR brass, gun metal or stainless steel
- NC and NO versions
- ISO 228/1 or NPT thread connection (EVSI and EVSI-U)
- Built in filter for protection of pilot system
- Water hammer damped
- Adjustable closing time available
- Nominal pressure PN 16
- Wetted parts: brass, stainless steel, copper, tin, EPDM, FKM or NBR rubber

KP, Pressure switch

KP pressure switches are designed to protect refrigeration systems from excessively high discharge pressures, excessively low suction pressures, to start / stop compressors or to operate fans of aircooled condensers.

The enhanced contact system for 16 A makes it possible to operate electrical motors up to 2 kW directly, without the use of contactors. KP pressure switches are available in IP30 and IP44 enclosures. Versions of KP are available for applications with HCFC and non-flammable HFC refrigerants, ammonia or hydrocarbons.

Features KP

Range and differential easily adjustable with screwdriver

Manual trip function

Bellows without any welding points. Fail safe bellows versions available

Various pressure connections

Available with manual and automatic reset

Compact design

Vibration proof

High contact rating:
AC-1 / AC-3: 16 A @ 400 V
AC-15: 10 A @ 400 V

Reliable and fully visible SPDT contact system

Facts

Applications:

- Food Retail
- Heavy Commercial Refrigeration
- Light Commercial Refrigeration
- Commercial Air Conditioning
- Food Processing
- Storage

Refrigerants:

- R All HCFC and non-flammable HFC refrigerants

Working range:

- -0.9 – 46.5 bar / -1.3 – 674 psi

Benefit:

- High reliability both electrically and mechanically-a KP switch can be connected directly to a single-phase AC motor of up to approximately 2 kW or installed in the control circuit of DC motors and large AC motors
- Versions with IP30 enclosure rating can be updated to IP44 or IP55 enclosure rating using top plate (IP44) or IP55 enclosure (IP55), available as accessories

KP, Thermostat

KP thermostats are single-pole, double-throw (SPDT) temperature-operated electric switches. KP thermostats can be connected directly to a single-phase AC motor of up to approximately 2 kW or installed in the control circuit of DC motors and large AC motors.

KP thermostats are used primarily for regulation, but also for safety monitoring systems, and are available with vapour charge or with adsorption charge. With vapour charge the differential is very small. KP thermostats with adsorption charge are widely used to give frost protection.

Features KP

Facts

Applications:

- Frost protection
- Defrost control
- Case and Room control

Benefit:

- Available with capillary sensor, air sensor or cylindrical pocket sensor
- Different sensing elements - As experts in charging technologies Danfoss offers temperature switches that operate in a wide temperature range
- Available with vapour charge or with adsorption charge

077B, Thermostat

077B thermostats have NC (Normally Closed) main contacts; i.e. they cut out the compressor current circuit on decreasing temperature. 077B thermostats are designed to operate at least 300,000 cycles at full load (6/36A and 8/40A respectively); internal quality audits

reinforced product performance by metering over 1,000,000 cycles. 077B thermostats are designed for temperature control in refrigerators and freezers and can be used as an evaporator or a room thermostat.

Facts

Application:

- Refrigerators
- Upright and chest freezers
- Liquid and bottle coolers
- Small commercial refrigeration

- World class quality with high CpK values that ensures a long and trouble-free lifetime
- Available with Enclosed Brake Device (EBD) for use in household appliances charged with hydrocarbon gases such as R600a or R290
- Available with a wide range of standard functions, various extra functions and accessories
- Available with 6.3 × 0.8 mm, 4.8 × 0.8 mm terminals or a combination
- Approved by recognized authorities for

specific applications and geographical markets

- Danfoss Appliance Controls are certified by Bureau Veritas in ISO14001, ISO9001 and OHSAS18001

KVR / NRD, Condensing pressure regulator / Differential pressure valve

KVR condensing pressure regulator valves can be mounted on either the gas or liquid side of the condenser in refrigeration and air conditioning systems.

They are used to maintain a constant and sufficiently high condensing pressure with systems using air-cooled condensers. KVR condensing pressure regulators can also be used with valve types NRD or KVD to assure that adequate pressure is maintained on the receiver.

Features KVR / NRD

Facts

Applications:

- Traditional refrigeration
- Air conditioning units
- transport refrigeration

Maximum working pressure:

- KVR: PS / MWP = 28 bar / 406 psig
- NRD: PS / MWP = 46 bar / 667 psig

Refrigerants:

- R1270
- R134a
- R22
- R290
- R404A
- R407A
- R407C
- R407F
- R422B
- R422D
- R448A
- R449A
- R450A
- R452A
- R507A
- R513A
- R600
- R600a
- R1234ze

Capacity range:

- 3.4 – 40 TR / 12 - 140 kW based on liquid or hot gas

Benefit:

- The regulators are the most compact on the market
- Reliable design and very easy to adjust
- KVR can be installed either in discharge line or liquid line

Technical data and ordering

KVR / NRD

Condensing pressure regulator / Differential pressure valve

KVR 35	129	121	93.7	139.3	34.9	30.6	34.9	37.7	1 ⅜	35	034L0100
NRD	-	-	-	-	-	-	-	-	½	-	020-1132

1) Rated capacity is based on:

– evaporating temperature $t_e = -10\text{ °C} / 14\text{ °F}$

– condensing temperature $t_c = 30\text{ °C} / 110\text{ °F}$

– pressure drop across the valve $\Delta p = 0.2\text{ bar} / 3\text{ psi}$ for liquid capacity, $\Delta p = 0.4\text{ bar} / 6\text{ psi}$ for hot gas capacity, offset = $3\text{ bar} / 45\text{ psi}$

2) KVR are delivered without flare nuts. Separate flare nuts can be supplied: 1/2 in / 12 mm - code no. 011L1103, 3/8 in / 16 mm - code no. 011L1167.3

3) The connection dimensions chosen must not be too small, as gas velocities in excess of 130 ft/s at the inlet of the regulator can give flow noise.

To select the product for other conditions or refrigerants, use Danfoss Coolselector®2.

Application example

KVP, Evaporator pressure regulator

KVP evaporating pressure regulators are mounted in the suction line of refrigeration and air conditioning systems. They are used to maintain a constant pressure corresponding to a constant temperature on the evaporator.

They also protect against too low an evaporating pressure by throttling down when the pressure falls below the set value.

Features KVP

"Hermetic" brazed construction

Stainless steel bellows

Compact angle design for easy installation in any position

1/4 in Schraeder valve for setting the pressure

Accurate, adjustable pressure regulation with allen key

Pulsation damping design

Available with flare and ODF solder connections

Facts

Applications:

- Traditional refrigeration
- Air conditioning units
- Cold rooms
- Display cabinets

Maximum working pressure:

- 18 bar / 260 psig

Refrigerants:

- R1270
- R134a
- R22
- R290
- R404A
- R407A
- R407C
- R407F
- R422B
- R422D
- R448A
- R449A
- R450A
- R452A
- R507A
- R513A
- R600
- R600a
- R1234ze

Capacity range:

- 0.9 – 2.6 TR / 2.8 – 7.9 kW

Benefit:

- Wide capacity and operating range.
- Protection against a too low evaporating pressure: the regulator closes when the pressure in the evaporator falls below the set value
- The KVP can be used to differentiate the evaporating pressures in two or more evaporators in systems with one compressor

Technical data and ordering

DAS, Hermetic burn-out filter drier

DAS **ELIMINATOR**® hermetic burn-out filter driers are used in the suction line to clean up refrigeration and air conditioning systems with fluorinated refrigerants after a compressor motor burn-out.

The solid core, which is composed of 70% activated alumina and 30% Molecular Sieve, adsorbs harmful acids as well as moisture, in order to protect the new compressor against failure.

Features DAS

Facts

Applications:

- Traditional refrigeration
- Air conditioning units

Maximum working pressure:

- Up to 35 bar / 500 psig

Size:

- Wide range from 8 - 60 cubic inches

Refrigerants:

- R22
- R407C
- R410A
- R134a
- R404A
- R507

Connections:

- Available in flare, solder

Benefit:

- Corrosion resistant powder-painted finish

DMB, Hermetic bi-flow filter drier

DMB **ELIMINATOR®** hermetic bi-flow filter drier series are for use in liquid lines on heat pumps, and have built-in check valves to ensure that refrigerant liquid flows through the filter drier from the outer side of the filter core towards the center. They ensure fast and effective adsorption of moisture as well as organic and inorganic acids, and all dirt particles are retained irrespective of flow direction.

DMB hermetic bi-flow filter driers contain a solid core consisting of 100% 3 Å Molecular Sieve, and are especially suitable for heat pumps with HFC refrigerants and polyolester oil with additives.

Features DMB

Facts

Applications:

- Traditional refrigeration
- Heat pumps
- Air conditioning units

Maximum working pressure:

- 46bar

Capacity range:

- 0.7 – 13.3 TR / 2.8 – 47 kW

Refrigerants:

- | | |
|-----------|---------|
| • R1234yf | • R438A |
| • R1234ze | • R444B |
| • R125 | • R448A |
| • R134a | • R449A |
| • R22 | • R449B |
| • R407C | • R450A |
| • R23 | • R452A |
| • R290 | • R452B |
| • R32 | • R454B |
| • R404A | • R455A |

| • R407F | • R513A |
| • R410A | • R600 |
| • R422B | |
| • R422D | |

Benefit:

- No dirt released by reversing the flow direction
- The check valves are not sensitive to dirt and give minimum restriction, irrespective of flow direction
- Use of hermetic bi-flow filter driers can save up to ten solder connections in heat pump systems. This reduces production costs and the number of potential leakage points

DCR, Filter drier with replaceable solid core

DCR **ELIMINATOR**® filter driers with replaceable solid core protect refrigeration, freezing and air conditioning systems from moisture, acids and solid particles. Besides being able to meet the demanding requirements of high working pressure levels when operating with R410A thanks to replaceable solid cores the DCR programme offers flexibility with respect to different applications.

Core types:

- 48-DC for HFC, HCFC systems and mineral or AB oils
- 48-DM for HFC, HCFC systems and POE or PAG oils
- 48-DA for acid adsorption after burnout
- 48-F strainer for retaining dirt

Cores / inserts are ordered separately.

| • R513A | |
| • R1234ze | |

Benefits:

- Full flow with minimum pressure drop
- Bi-directional flow
- 1/4 turn from fully open to fully closed
- Burst proof spindle design
- Selected Teflon and O-ring material to secure the best tightness and long lifetime
- Versions with access port helps in reducing cost if service of the system is necessary
- One-piece seal cap for safety purpose Complies with European Safety Directive EN 378
- Ball status indicator on spindle top indicating open or closed position
- Laser welded construction
- Drilled and tapped for panel mounting
- Double O-ring stem seal design
- Customized brass material ensures consistent performance under aggressive environment

BML, Shut-off diaphragm valves

BML are manual shut-off diaphragm valves designed for installation in the liquid, suction and hot gas lines of refrigeration plants. BML valves can be delivered with flare, ODF solder or ODF solder with extended ends.

In the same product category, BMT 6 is a three-way manual shut-off valve with similar characteristics.

BML valve can be used for HCFC, HFC and HC refrigerants.

Features BML

Facts

Applications:

- Traditional refrigeration

Temperature range:

- -55 – 100 °C / -67 – 212 °F

Maximum working pressure:

- 28 bar / 406 psig

Working range:

- -1 – 21 bar / -14 – 304 psig

Refrigerants:

- R134a
- R22
- R407C
- R404A
- R507
- R290
- R600
- R600a
- R1270
- R513A
- R450A
- R1234ze
- R1234yf

Benefits:

- Fitted with three stainless steel diaphragms which ensure long operating life
- Valve plate of polyamide nylon to give complete shut-off with minimum torque
- Valve cover with counter-seat to prevent the ingress of moisture in fully open position

Technical data and ordering

NRV / NRVH, Check valves

NRV and NRVH check valves can be used in liquid, suction and hot gas lines in refrigeration and air conditioning plants with HCFC, HFC and HC flammable refrigerants. Special versions, with a max. working pressure of 90 bar / 1305 psig are available for CO₂ applications.

The valves ensure the correct flow direction and prevent back-condensation from a warm part of the system to the cold evaporator. A built-in damping piston makes the valves suitable for installation in lines where pulsation can occur, e. g. in the discharge line from the compressor.

Features NRV / NRVH

Min. pressure drop
NRV 0.04 – 0.07 bar / 0.58 – 1.01 psig
NRVH 0.3 bar / 4.35 psig

Max. working pressure
PS / MWP 46 bar / 667 psig

Flare and solder version
NRV 6 – 19
NRV 6s – 35s
NRVH 6s – 35s

Standard or oversize

| • R448A | |

Benefits:

- Hermetic tight design for solder versions
- Built-in damping piston that makes the valves suitable for installation in lines where pulsation can occur, e.g. in the discharge line from the compressor
- Available in both straightway and angleway versions
- Solder versions are compliant with ATEX hazard zone 2
- NRVH type check valve is with stronger spring and it's recommended to use for compressors in parallel (i.e. power packs) where higher level of pulsation and vibration are expected

1) Δp = the minimum pressure at which the valve is completely open.

The NRVH with a stronger spring is used in the discharge line from compressors connected in parallel.

2) The Kv value is the flow of water in m³/h at a pressure drop across valve of 1 bar, $\rho = 1000 \text{ kg/m}^3$.

3) Oversize connections.

Max operating pressure is 90 bar.

ERC 211 / ERC 213 / ERC 214, Refrigeration controllers

ERC 21X is a smart multipurpose refrigeration controller with temperature and defrost management.

The controller has been designed to fulfill today's requirements of advanced commercial Refrigeration applications.

Features ERC 211 / 213 / 214

1. Thermostatic expansion valve type TU
2. Temperature controller ERC 21X
3. Temperature sensor NTC
4. Compressor

Facts

Thermostat:

- ON / OFF thermostat
- Day / Night, continuous cycle, emergency mode
- Pre-installed applications
- Compatible with wide range of sensors (NTC 5 K and 10 K, Pt1000, PTC)

Defrost:

- Natural, electrical and hot gas defrost
- Defrost on demand
- Start via push button, DI input or time interval
- Stop on time, temperature or push button

Compressor:

- Voltage protection
- Anti-cycle timers for optimum compressor protection
- High-effect 16 A relays for connection of compressors

Evaporator Fan:

- Fan delay function
- Smart evaporator fan management for energy saving
- Fan stop at high evaporator temperature

Alarms:

- High and low temperature alarm
- Sensor failure alarm
- High and low voltage alarm
- Condenser cleaning alarm
- Door open alarm
- External alarm input

Multi-purpose DI input:

- Two multipurpose DI input for defrost start, Day / night control, main switch, reference displacement and continuous cycle control

Display & programming:

- Bigger and High efficient LED Display
- Display temperatures in °C / °F
- Parameter settings/readouts and alarm conditions can be read on the display

Other functions:

- Zero cross switching in all relays
- Three levels password protection
- Door function with alarm monitoring
- Delay of outputs at power up
- Keypad lock and unlock feature
- Galvanic Isolation

Technical data and ordering

ERC 211 / ERC 213 / ERC 214

Refrigeration controllers

Type	Description	Code no.
ERC211	KIT - ERC 211,RED LED,230V. Supplied with 1 NTC10K Temp. Probe 1.5m	080G3263
ERC213	KIT - ERC 211,RED LED,230V. Supplied with 2 NTC10K Temp. Probe 1.5m	080G3263
ERC214	ERC 214,Controller, RED LED, 230V. Temp Probe ordered separately	080G3295

Accessories such as temperature probes and covers available. Three phase Optyma Controller available in four sizes

EKC 315A, Refrigeration control

The controller and valve can be used where there are requirements to accurate control of superheat and temperature in connection with refrigeration:

- Cold store (air coolers)
- Processing plant (water chillers)
- A/C plant

Features EKC 315A

1. Superheat controller EKC 315A
2. Electric expansion valve AKV/P
3. Temperature sensor ACCPBT, NTC
4. Pressure transmitter AKS 32R

Facts

Benefits:

- The evaporator is charged optimally - even when there are great variations of load and suction pressure
- Energy savings - the adaptive regulation of the refrigerant injection ensures optimum utilisation of the evaporator and hence a high suction pressure
- Exact temperature control - the combination of adaptive evaporator and temperature control ensures great temperature accuracy for the media
- The superheating is regulated to the lowest possible value at the same time as the media temperature is controlled by the thermostat function

Technical data and ordering

EKC 315A

Refrigeration control

Features	Description
Supply voltage	24 V AC $\pm$ 15%, 50 / 60 Hz, 80 V A (the supply voltage is galvanically separated from the input and output signals)
Power consumption	Controller: 5 V A AKV coil: 55 V A
Input signal	Current signal: 4 – 20 mA or 0 – 20 mA Pressure transmitter: 4-20 mA from AKS 33 Digital input from external contact function
Sensor input	2 pcs. Pt 1000 ohm
Output signal	Current signal: 4 – 20 mA or 0 – 20 mA Load: Max. 200 ohm
Relay output	1 pcs. SPST: AC-1: 4 A (ohmic)
Alarm relay	1 pcs. SPST: AC-15: 3 A (inductive)
ICAD	ICAD mounted on ICM Current signal: 4 – 20 mA or 0 – 20 mA
Data communication	Possible to connect a data communication module
Environments	-10 – 55 °C, during operations -40 – 70 °C, during transport 20 – 80% Rh, not condensed No shock influence / vibrations
Enclosure	IP20
Weight	300 g
Mounting	DIN rail
Display	LED, 3 digits
Terminals	max. 2.5 mm ² multicore
Approvals	EU Low Voltage Directive and EMC demands re CE-marking complied with LVD-tested acc. to EN 60730-1 and EN 60730-2-9 EMC-tested acc. to EN50081-1 and EN 50082-2

The installation of data communications must comply with the requirements described in literature sheet no. RC8AC

LP-ETS kit and ETS, Superheat controller

Superheat control in Cold stores, processing plants or A/C plants with Stepper Valve

Features LP-ETS kit & ETS

Facts

Benefits:

- The evaporator is charged optimally even when there are great variations of load and suction pressure
- Energy savings
- The superheating is regulated to the lowest possible value at the same time as the media temperature is controlled by the thermostat function

Functions:

- Regulation of superheat
- Temperature control
- MOP function
- ON/OFF input for start/stop of regulation
- Input signal that can displace the superheat reference or the temperature reference
- Alarm if the set alarm limits are exceeded
- Relay output for solenoid valve
- PID regulation

Energy Saving:

- The adaptive regulation of the refrigerant injection ensures optimum utilization of the evaporator and hence a high suction pressure

AK-CC 250A, Universal refrigeration controller

The controller is used for evaporator control refrigeration appliances in supermarkets. With many predefined applications one unit will

offer you many options. Flexibility has been planned both for new installations and for service in the refrigeration trade.

Features AK-CC 250A

Facts

Benefits:

- Many applications in the same unit
- The controller has integrated refrigeration-technical functions, so that it can replace a whole collection of thermostats and timers

- Buttons and seal imbedded in the front
- Can control two compressors
- Fixed MODBUS data communication
- Easy to remount data communication
- Quick setup
- Two temperature references

- HACCP (Hazard Analysis and Critical Control Points):
 - temperature monitoring and registration of period with too high temperature
 - factory calibration that will guarantee a better measuring accuracy than stated in the standard EN 441-13 without subsequent calibration (Pt 1000 ohm sensor)
- Digital inputs for various functions
- Clock function with backup

AK-CC 550A, Controller for appliance control

AK-CC 550A is a complete refrigeration appliance control with great flexibility to adapt to all types of refrigeration appliances and cold storage rooms.

Features AK-CC 550A

Facts

Benefits:

- Energy optimisation of the whole refrigeration appliance
- One controller for several different refrigeration appliances
- Integrated display at the front of the controller
- Quick set-up with predefined settings
- Built-in data communication
- Built-in clock function with power reserve
- Can be used on CO₂ systems

Technical data and ordering

AK-SM 800 series, System manager

The System Manager controller from Danfoss is the global control and supervisory solution for the food retail industry. The System Manager uses the latest technology to provide the maximum benefit to the end user, both in terms of energy saving optimization, control options and full web useraccess.

Designed specifically for the food retail and food processing / handling market, the System Manager provides comprehensive functionality and support tools to cover small to large stores.

Facts

Benefits:

- Direct support to EM-800 (AKM not supported / needed)
- Supports centralized and decentralized control strategy; compatible with Danfoss case and pack controllers and Danfoss I/O
- Open XML data transfer allowing remote access to key system parameters

Design features:

- Active TFT SVGA color screen 800x600
- Front alarm status LED
- Removable keyboard panel (revealing connections)
- Easy access to USB flash drive
- Wall and panel mounting options
- Built in alarm relay output

Hardware capability features:

- Built in web server
- No back up battery required
- RS485 LonWorks®
- Ethernet
- EKC Modbus
- USB

Optyma™ Control, Single / Three-phase

The Optyma™ Control is particularly suitable for the Optyma™ and Optyma™ **Plus** condensing units from Danfoss but is also compatible with other condensing units on the market. The control features an attractive new design and simple flexible programming.

It offers both control and protection in a single unit, thanks to the unique built-in differential magnetothermal circuit breaker, which guarantees safety by cutting the general power supply.

Features Optyma™

Facts

Benefits:

- Direct control of defrosting elements, evaporator fans, room light with outputs directly connectable to the various units
- Standard and ADAP-KOOL® compatible Modbus data communication

Display & programming:

- LED indicators and large display show system status
- User-friendly keypad
- Display resolution to 0.1 °C

Protection:

- Automatic fuse protect the refrigeration unit
- Stylish ABS housing with transparent cover for access to the automatic fuse, all with an IP65 protection rating so that panel can be used outside the room

MBS 3000, Compact pressure transmitter

The compact pressure transmitter MBS 3000 is designed for use in almost all industrial applications, and offers a reliable pressure measurement, even under harsh environmental conditions. The flexible pressure transmitter programme covers a 4 – 20 mA output signal, absolute and gauge (relative) versions, measuring

ranges from 0 – 1 to 0 – 600 bar and a wide range of pressure and electrical connections.

Excellent vibration stability, robust construction, and a high degree of EMC/EMI protection equip the pressure transmitter to meet the most stringent industrial requirements.

Features MBS 3000

Facts

Benefits:

- 4 – 20 mA output signal
- Operating temperature: -40 – 85 °C
- Measuring range: 0 – 600 bar
- Standard pressure connection G 1/4 A
- For use in severe industrial environments such as pumps, compressors, pneumatics and water treatment
- Wetted parts: stainless steel (AISI 316)

AKS, Pressure transmitters

AKS pressure transmitters are used for commercial air-conditioning and for commercial and industrial refrigeration applications. They are made in stainless steel to be compatible with fluorinated and natural refrigerants and laser welding with no soft seals ensure hermetic tightness for decades.

AKS pressure transmitters utilize temperature calibrations methods and sensing technologies optimized for the refrigeration and air-conditioning segments.

Features AKS

Dedicated temperature calibration to increase accuracy when used for suction or discharge pressure regulation

Compact AKS 32R; AKS 3000 with solder or female flare pressure ports

Parts in touch with refrigerants are all laserwelded, free of soft gaskets

Facts

Benefits:

- Designed for precise and energy optimized control
- Robust design optimized for
 - air-conditioning
 - refrigeration plant
 - supermarket installation
 - natural refrigerants like CO₂ and R717
- Pressure ranges up to 159 bar
- High test pressure, ≥ 33 bar
- Available with 4 – 20 mA, 1 – 5 V DC or 10 – 90% Vs ratiometric signals
- Available with a variety of pressure connection, incl. $\frac{1}{4}$ inch female flare with valve depressor and $\frac{3}{8}$ inch solder connection, ensuring a 100% hermetic installation

Technical data and ordering

EKS / AKS, Temperature sensors

AKS temperature sensors are used for exacting applications within air-conditioning as well as commercial and industrial refrigeration applications.

The Pt 1000 sensor element meets the DIN/EN 60751 class B requirements and ensures an accurate and reliable temperature signal applicable for regulation, safety and data logging.

EKS temperature sensors are a family of cost efficient temperature sensors based on thermistors with NTC or PTC characteristics which are used with Danfoss EKC controllers.

Features EKS / AKS

EN441 certified
AK-HS 1000
HACCP sensors

AKS 11 temperature sensor for
reliable super heat control to
optimize accuracy and process
efficiency

AKS21 sensor system for
controlling extreme high and
low temperatures

Facts

Benefits:

- AKS 11 is designed for easy installation and optimized for demanding control functions like liquid injection control in evaporators where a reliable sensor is a must
- AKS 12 is the all-round cable temperature sensor to be used for plain temperature monitoring and control purposes
- AKS 21 is the ultimate sensor for -70 – 180 °C anywhere in the refrigeration plant and is available in various designs (cable and B-head) and with various accessories like sensor pockets
- AK-HS 1000 is the first choice for a temperature sensor for monitoring and HACCP data logging. The sensor design makes it simulate a refrigerated product what enable a realistic temperature signal is transmitted to a HACCP data logger
- EKS comes with PTC 1000 Ω (EKS 111), NTC 5000 Ω (EKS 211), or NTC 1000 Ω (EKS 221) with various cable lengths

Technical data and ordering

AK-HS - For monitoring and data logging in HACCP systems

Temperature sensors

Type	Signal	Temperature range (°C)	Measuring accuracy	Enclosure	Cable length (m)	Code no.
AK-HS 1000	Pt 1000	-30 – 50	EN 60751 Class B	IP 54	5.5	084N1007

EKS - For measuring air temperatures

Temperature sensors

PTC characteristics matches controllers types EKC 101, EKC 201, EKC 301, CC and AK.

NTC characteristics matches controllers, types EKC and CC.

Type	Signal	Temperature range (°C)	Sensor tube	Electrical connection	Cable length (m)	Code no.
EKS 111	PTC 1000	-55 – 100	Round	Cable with pins	1.5	084N1178

DGS, Gas sensor

DGS helps to comply to environmental F-Gas Regulations and / or Health and Safety requirements, on new or existing systems in:

- Supermarkets
- Process refrigeration plants
- Refrigerated storage and warehousing
- Special applications areas / zones

Features DGS

Utilizing
either Semi Conductor
(SC) or Infrared (IR)
technologies

Can be used
in stand-alone or integrated
systems, where continuous
real-time, automatic
monitoring with Danfoss
ADAP-KOOL® Refrigeration
Control and Monitoring System
and / or Building Management
Systems is applied

RS485 Modbus
for data communication and
integration into a complete
ADAP-KOOL® system

Gives
quick and immediate
response in detecting a
wide range of different
gases typically applied
in Refrigeration and Air
Conditioning systems

Facts

Typical Refrigerant gas applications include:

- Halocarbons: HFC's, HCFC's, CFCs.
 - Carbon Dioxide (CO₂/R744)
 - Hydrocarbons (e.g. R290)
 - Other special application gases to customer request
- Sensing technology varies to make the best detection for a given gas, in terms of performance and cost. DGS IR is based on Infra-Red sensor technology, DGS SC is based on Semi-Conductor and DGS-PE is based on Pellistor

Technical data and ordering

DGS

Gas sensors

Features	Description		
Supply voltage	24 V DC $\pm$ 20 % ; reverse polarity protected 24 V AC - 10 % / + 15 %		
Power Consumption (24V DC)	Max. 250 mA (5 VA)		
Digital input - Alarm acknowledge and test alarm - Alarm relay /fault relay	Potential-free contact 40 V AC/DC, 0.5 A, change-over contact (SPDT) Critical relay: Normally Closed (SIL II compliant), Warning relay: Normally Open		
Analog output signal	Proportional, overload and short-circuit proof, load $\leq$ 500 Ohm Measuring range: 0-10 V / 2-10V / 0-20mA / 4-20mA		
Modbus Physical	5 V DC, 250 mA max. overload, short-circuit and reverse-polarity protected		
Enclosure rate	IP 65		
Humidity range	15 - 90 % RH not-condensing		
Burning behaviour	UL 94 V2		
Housing colour	Black		
Dimensions (W x H x D in mm)	94 x 130 x 57

Bold = calibration gas

Secop reciprocating compressors produced for Danfoss - Direct current

BD range is the leading and widest AC / DC compressor range tailored for cooling on the move.

The excellent performance of the BD series safeguards food, medical and telecommunication.

Features Reciprocating compressors

Facts

Applications:

- 12 / 24 V DC mobile refrigerators and freezers
- 12 V DC LBP / MBP van cooling boxes
- 12 / 24 V DC HBP telecommunication systems

Refrigerants:

- R134a

Capacity range:

- 32 - 274 W

Segment usage:

- Refrigeration MT

Benefit:

- Operation under extreme conditions
- Minimal energy consumption
- Portable beyond traditional limits
- Application possible at extreme voltage rate

Technical data and ordering

Secop reciprocating compressors produced for Danfoss- Light commercial

Specially optimised for use in household and light commercial applications, hermetic reciprocating compressors from Secop for Danfoss provide high cooling capacity in an energy saving design.

Compressor models are available for R134a, R290, R404A / R507A and R600a, for cooling needs from 20W to 6kW.

Features Reciprocating compressors

Compact construction

Durable housing

Optimised motor technology

Wide voltage range

Low GWP refrigerant possible

Variable speed model available

Facts

Applications:

- Laboratory and medical equipment
- Compressed air dryers
- Glass door merchandisers
- Display cabinets
- Fridges and freezers
- Ice cream cabinet
- Vending machines
- Drink dispensers
- Ice making machines
- Bottle coolers
- Heat pumps
- Milk cooling tanks

Refrigerants:

- R134a
- R290
- R404A
- R507A
- R600a

Capacity range:

- 20-6k W

Segment usage:

- Household and light commercial application

Benefit:

- Easy installation
- Low noise and high energy efficiency
- Robust in tough operating conditions
- Immune to unstable power supply
- Environmentally friendly solutions Portable beyond traditional limits
- Application possible at extreme voltage rate

MTZ / NTZ, Reciprocating compressors

Maneurop® MTZ series compressors are of the hermetic reciprocating type and are designed for medium and high evaporating temperature applications. NTZ are designed for low evaporating temperature applications.

Available in a large variety of single and tandem models for refrigerants R404A, R134a, R407A/F, R407C, R448A, R449A, R452A and R513A, the compressors fit in lots of different applications.

Features MTZ / NTZ

Facts

Applications:

- Walk-in freezers and cold rooms
- Frozen food processing and storage
- Ice cream machines
- Display cabinets
- Water chillers
- Large packaged air conditioners
- Process chillers
- Industrial air-con

Segment usage:

- Airconditioning
- Refrigeration MT (NTZ)

Refrigerants:

- R134a
- R407F
- R407A
- R404A (NTZ)
- R452A (NTZ)
- R507A
- R407C
- R448A
- R449A
- R513A

Capacity range:

- 0.25 – 45 kW
- 1.4 – 9.150kW (NTZ)

Benefit:

- Operation under extreme conditions
- Versatile
- No need for air circulation around the compressor
- Long lifetime expectancy and reliability

MLZ / LLZ, Scroll compressors for refrigeration

MLZ and LLZ scroll compressors are dedicated to commercial and light commercial refrigeration applications with refrigerants R134a, R404A / R507A, R22, R407A. Both brazed and rotolock connections are available for most of the compressors.

MLZ: medium-temperature scroll compressors
R404 / R507A, R407A / F, R134a, R448A, R449A, R452A, R22
LLZ: low-temperature scroll available with and without liquid injection and operate with R404A, R507A, R452A.

Features MLZ / LLZ

High efficiency motor

Optimised pressure ration for refrigeration applications

Optimized scroll design

HOOP overload protection
Rotolock or braze connections

MLZ

LLZ

Optional sound jacket attenuates sound levels

Multi-refrigerant scrolls save on inventory

Suitable for transport of refrigerated goods

Vapor injection available with optional economizer kit increases LLZ efficiency and cooling capacity

Facts

Applications:

- Walk-in freezers and cold rooms
- Frozen food processing and storage
- Blast freezers
- Low temperature racks
- Ice cream machines
- Display cabinets
- Water chillers
- Large packaged air conditioners
- Process chillers etc

Segment usage:

- Refrigeration MT & LT

Refrigerants:

- R404A
- R507A
- R407A/F
- R448A
- R449A
- R452A
- R134A
- R513A

Capacity range:

- 0.5 – 12.5 TR / 1.8 – 44 kW

Benefit:

- Footprint up to 30% smaller than alternative reduces the logistics costs and frees up space in the system
- 30% fewer parts which improves the reliability of the compressor
- Optional vapor injection boosts the cooling capacity and efficiency by more than 20% on LLZ
- Better reliability with improved overload protection and oil injection

2) Liquid injection will have same capacity as no injection but will have extended operating envelope

H-Series, Scroll compressor

Danfoss scrolls are designed for excellence in performance, silence and endurance. They feature compressors that are among the quietest, most efficient, reliable and available on the market. Ranging from 2.5 – 10 TR, the universal dimension, footprint and connections of the H series make it the natural choice for greater comfort in existing or new residences.

Available in a large variety of single and tandem models for refrigerants R407C, R134a, R410A and R22, the compressors combine high energy efficiency with low sound and minimal vibration.

Features H-Series

Facts

Applications:

- Small to medium packaged air conditioners for commercial purpose

Segment usage:

- Airconditioning

Refrigerants:

- R134a
- R407C
- R410A
- R22

Capacity range:

- 0.25 – 20 TR / 1.07 – 34 kW

Benefit:

- Excellent reliability due to Patented internal protection combined with HOOP (Hot Oil Over Protector) thermal valve
- Standard dimensions and tubing: ideal for both new installations and replacement markets
- No startup and shutdown noise

2) Brazed connections, screw terminals

SH / SY / SZ, S-Series, Scroll compressors

By combining an in-depth understanding of customer needs with continuous investment in product technology Danfoss is able to offer you the SH / SY / SZ series, which comprise a 7-30TR industry-leading range of scroll compressors optimized for rooftop and chiller applications.

Available in a large variety of single and manifold models for R410A, R407C, R134a and R22. The compressors combine high energy efficiency with low sound and minimal vibration.

Features SH / SY / SZ

Heat shield that lowers the heat transfer between discharge and suction gas and the acoustic level

New PTFE spring seal for even lower leaks

Patented motor cap

Patented motor centring spacer

Improved lower bearing centring

Heat shield that lowers the heat transfer between discharge and suction gas and the acoustic level

Intermediate discharge valves (SH485)

Integrated discharge gas temperature protection (SH485)

Liquid slug protection per suction fitting in upper position

Patented gas path flow (SH485)

Facts

Applications:

- Rooftop
- Process chiller
- Ducted split air-con
- IT cooling
- Chiller application

Segment usage:

- Airconditioning & High temp.

Refrigerants:

- R134a
- R410A
- R407C

Capacity range:

- 7.5 – 40 TR / 26 – 140 kW

Benefit:

- Greater reliability with the internal non-return valve, which avoids refrigerant migration from the high pressure side
- Highly efficient and reliable protection against overheating, overloading, phase loss and phase order with specific electronic module protection
- Quieter and more efficient operation with "no contact – no wear" scroll design for reduced friction

Overview of lubricant / oil types

Recommended to reduce friction, reduce abrasion of mobile pieces of compressors and protect them against corrosion.

Features Lubricant / oil

Facts

Type:

- Mineral
- Synthetic
- Semi-synthetic

Features:

- Obtained per distillation of the petroleum
- Produced from chemical and petrochemical compound
- Blend of different oil bases

Attention:

Always use the original specific oil for each compressor model. The use of a different oil specified can lead to compressor failure. Special attention should be given to the management of the polyolester oil as this is highly hygroscopic and when exposed, quickly absorbs moisture from the air. Do not let the compressor or the oil packaging open to the atmosphere for a long period.

MT(Z)32-5, 36-5	Relay + Capacitors: run (25 + 10 µF), start (140 µF)	7701023

Terminal box

Application	Description	Code no.
HRM, HLM, HCM, HRP, HLP, HCP, HRH, HLH, HLJ, HHP	Square terminal box (C & Q version)	120Z5018
HRM, HLM, HCM, HRP, HLP, HCP, HRH, HLH, HLJ, HHP	Round terminal box (P & T version)	120Z5015
HRM, HLM, HCM, HRP, HLP, HCP, HRH, HLH, HLJ, HHP, HHP030.038.045	IP54 upgrade kit for square terminal box	118U0057
SH180.240.295.300.380*.485*, SY/SZ240.300.380 - SY/SZ185 with module	Terminal box 210 x 190 incl. cover	120Z0458
SM084.090.100.110.112.120.124.147.148*.161* SZ084.090.100.110.120.148*.161* SH090.105.120.140*.161* WSH090.105.120.140*.161*	Service kit for terminal box 96 x 115 mm, including 1 cover, 1 clamp	8156135
SM/SZ148-3.161-3.175.185	Terminal box 186 x 198 mm, incl cover	8156139
MT/MTZ18-44(1), 18-73(3), 18-81(4), 18-50(5), 18-40(6), 32-56(7), 22-80(9) & NTZ048-136 (except 136-1)	Cover 80 x 96 mm ; clamp	8156134

Mounting kit

Application	Description	Code no.
MT/MTZ18-81 & NTZ048-136	Mounting kit 1 & 2 cyl; Ebox: 80 x 96 mm; Sleeves 5/8" - 1/2"	8156001
MT/MTZ100-160 & NTZ215-271	Mounting kit for 4 cylinder compressor & MS, including 4 grommets, 4 bolts Ebox: 96 x 115 mm; Sleeves 1" 1/8 - 3/4"	8156007
SH180 - 240 to 485 in parallel installation, PSH051.064.077	Mounting kit for 1 scroll compressor including 4 hexagonal rigid spacers, 4 sleeves, 4 bolts, 4 washers	7777045

One Supplier Covers your Industrial Refrigeration Needs

Danfoss has made a clear priority to be able to supply all types of components for industrial refrigeration. Having just one place to go for industrial refrigeration is a significant benefit. Danfoss' one-stop-shop concept makes constructing as well as servicing fast and easy and helps keep the part stock at a minimum.

Whether your industrial refrigeration plant is a manual system or a highly-automated system, you will be sure to find a Danfoss solution that exactly matches your project needs in our wide range for industrial refrigeration. With the support of our online tools and our dedicated, local staff, we continuously strive to make your selection of solutions safe and easy.

The Flexline™ platform

The Flexline™ platform is synonymous with flexibility within industrial refrigeration. Based on a modular design concept, you will

experience that each product features a variety of benefits, including easy selection, installation and maintenance.

ICF Flexline™ valve station

The Danfoss ICF Flexline™ multi-ported control solution offers you significant savings by substituting a string of valves with just one valve station. Consisting of a valve housing and a maximum of four or six function modules, the valve station is a true plug-and-play solution.

ICFD Defrost Module

The liquid drain method is widely acknowledged as the most efficient hot gas defrost method within industrial refrigeration. The method ensures that liquid condensate is drained at lowest possible pressure resulting in a reduction of blow-by gas by up to 90%.

SLV Flexline™ product platform

The SVL Flexline™ product platform is targeted to meet industrial refrigeration requirements worldwide. Using just two basic valve housings – a straightway and an angleway – the platform offers five different functions.

ICV Flexline™ valves

The ICV product family consists of an ICS pilot operated control, ICM motor operated control and ICLX 2-step solenoid valve. All valve variants are based on one common valve body to offer outstanding flexibility.

The modular concept greatly facilitates the building of a valve that offers energy savings and reduction of down-time. All valves are designed for a maximum working pressure of 52 bar (754 psi) and efficiently handle CO₂ and other future high pressure refrigerants.

ICLX 2-step solenoid valve

The ICLX valves are 2-step servo-operated main valves with pilot solenoid valves offering safe, flexible and convenient installation, operation and service.

ICM motor operated valve

The ICM motor operated valves are very compact and easy to handle. The ICM motor valve is available as a complete valve and as parts programme.

ICS pilot operated servo valve

The ICS pilot operated servo valves are quick and simple to handle, install and service due to their low weight and compact design.

ICSH, dual position solenoid valve

The ICSH dual position solenoid valve is designed for gradual and safe opening of the hot gas flow to the evaporator, featuring an extra-safety-configuration to prevent hydraulic shocks in the system.

New Danfoss Pilot Valve program for ICS control valves

The new Danfoss Pilot Valve program for ICS control valves consist of just 4 fully backwards-compatible valves, which cover all regulation types and ranges needed in ammonia and CO₂ applications.

Danfoss gas detection units for industrial refrigeration systems

The new Danfoss gas detectors are based on an intelligent platform and intuitive user-interface, Danfoss' complete line of fixed gas detectors range from basic to heavy duty models with sensor technology to match the specific refrigerant, application, and safety requirements of your system.

The Danfoss gas detection portfolio enables you to comply with regulations according to EN 378:2016, ISO 5149:2014, IIR 2-2017, and ASHRAE 15:2016 while providing comprehensive safety and easy-to-use features

Evaporator control solution

The evaporator sub-system solution brings together Danfoss' efficient and reliable valves and controls to provide efficient and safe installation, operation & maintenance of the evaporator sub-system.

The evaporator control solution is prepared for smart defrosting which provide an optimized hot gas defrost process to better schedule, control, start and terminate

defrosting delivering improved energy efficiency and reduced defrost cycle duration time. The system features a controller dedicated for industrial refrigeration requirements and applications which manages the steps in the defrost cycle. The solution offers a safe defrost process that meets latest IIR standards for hot gas defrost.

Air purger

The Danfoss Intelligent Purger System is a new, stand-alone air purger solution for multi purging. The automatic purging function, responds immediately to non-condensable gases in the refrigeration

system improving system efficiency and safety. With a compact, plug & play design it provides fast and easy installation, saves space and reduces overall cost.

Complete industrial refrigeration solutions supplier for sensor, liquid level regulating valves, safety valves, and switches.

AKS 4100 Liquid Level Sensor

Liquid Level Sensor with TDR Guided Radar technology fully adapted to the Industrial Refrigeration segment – reliable and with high accuracy.

Liquid Level Control (AKS 38, HFI, SV, LLG)

Liquid level control is an important element in the designing of industrial refrigeration systems. It controls the liquid injection to maintain a constant liquid level. Danfoss offers Mechanical and electro-mechanical solution suited for meet varying plant requirements.

Safety Relief Valves (SFA, SFV, DSV, BSV, POV)

Danfoss Safety valves are designed to meet the strict quality demands and safety requirements for refrigeration installations, specified by the international classification societies.

Switches and thermostats for Industrial Refrigeration

Pressure controls and thermostats applicable for industrial refrigeration applications including ammonia as a refrigerant.

Liquid Level Glasses

LLG are liquid level glasses in ductile steel which meets the strictest requirements on industrial and marine refrigeration installations

Coming Soon

Semi-welded plate heat exchanger

Danfoss semi-welded plate heat exchangers are optimized for Ammonia industrial applications systems such as Condensers, flooded and pumped evaporators, Sub-coolers, Desuperheaters, Superheaters, Economizers and Oil coolers.
