

The SFA 10 will sail for years **without losing its course**

With the SFA 10 safety valve and DSV 10 change over valve, Danfoss is widening its range of highly reliable safety valves designed for Food Retail and Industrial Refrigeration applications.

Operational **safety**

Available with Danfoss or TÜV certificate.

Full range up to

65 bar

covering CO₂ applications

Global **availability**

No **leaks**

High quality O-ring material and perfect alignment of O-ring ensures tight sealing and reduces risk of leaks significantly.

Perfect **reseating**

The SFA 10 is designed with narrow tolerances and with an O-ring sealing which is more robust and less sensitive to dirt.

Trouble-free **service**

We have made the SFA 10 easy to service with factory assembled cone and O-ring assembly.

Easy **installation**

- Easy selection with Coolselector2®
- Weld nipples ease installation
- Nonstick grease available for easy de-installing

Unchanged **setpoint**

The springs are designed with low stress level which enables a stable set-point over time.
