

Data Sheet

Hermetic filter drier Type **DML** and **DCL**

For uniflow liquid line

All ELIMINATOR® driers have a solid core with binding material held to an absolute minimum.

There are two types of ELIMINATOR® cores. Type DML driers have a core composition of 100% Molecular Sieve, while type DCL contain 80% Molecular Sieve with 20% activated alumina.

ELIMINATOR® type DML driers are designed for applications requiring the highest moisture capacity.

ELIMINATOR® type DCL driers are designed for applications requiring high moisture capacity and acid adsorption capacity.

Available with solder (cu-plated steel connectors) and flare connections.

For other connections please contact your Danfoss Sales Representative.

Features

The Core type DML

- 100% Molecular Sieve core
- High drying capacity minimizing the risk of acid formation (hydrolysis)

The Core type DCL

- 80% Molecular Sieve with 20% activated alumina
- Perfect core blend for systems that operate at high condensing temperatures and require high drying capacity

The Shell

- PED approved for PS 46 bar
- Available with solder (Cu-plated steel connectors) and flare connections
- Corrosion resistant powder-painted finish. Special coating for marine applications available upon request
- Allows installation with any orientation provided the arrow is in the flow direction
- Available in sizes 3 – 75 cubic inches

The Filter

- 25 µm (0.001 in.) filter provides high retention with minimal pressure drop
- Thermally stable up to 120 °C

Application

Intro-diagram

ELIMINATOR® Hermetic filter driers protect refrigeration and air-conditioning systems from moisture, acids, and solid particles.

With these contaminants eliminated, systems are safer from harmful chemical reactions and from abrasive impurities.

Figure 1: Application

DML Filter drier

Recommended for use with R134a, R404A, R32, R410A, R407C, R23, R600, R600a, R1234yf, R1234ze, R407f, R290, R452A, R444B, R449A, R448A and R450A refrigerants. Will not deplete oil additives

DCL Filter Drier

Recommended for use with Applicable to R22, R134a, R404A, R32, R410A, R407C, R23, R600, R600a, R1234yf, R1234ze, R407f, R290, R452A, R444B, R449A, R448A and R450A refrigerants

DML/DCL 75	1019	702	1.81	1.108

Table 3: Acid capacity

Filter	Acid capacity ⁽¹⁾ [g]
DCL 03	0.5
DCL 05	0.8
DCL 08	1.3
DCL 16	2.9
DCL 30	6.1
DCL 41	8.3
DCL 60	12.2
DCL 75	16.6

⁽¹⁾ Adsorption capacity of oleic acid at 0.05 TAN (Total Acid Number).

Temperature range:

-40 – 70 °C

Maximum working pressure:

PS 46 bar

Conversions

$$\text{Drops of water} = \frac{[1 \text{ kg of refrigerant} \times (\text{Initial PPM of water} - \text{Final PPM of water})]}{50}$$

See ARI standard 710-86 for recommended initial and final PPM values for different refrigerants.

Identification

Table 4: Identification

Type	Codes	Description
Filter drier	D	Drier

D	Filter drier				
C	Solid core				
L	Application				
05	Size (volume)				
3	Connection (filter connection in 1/8 of an inch increments)				
s	Connection type				

Selection

Type selection is made considering the application

Table 5: Selection

Refrigerant and oil types		DCL	DML
Refrigerant	HFO	Recommended	Recommended
	HC ⁽¹⁾	Recommended	Recommended
	HFC	Recommended	Recommended
	HCFC	Recommended	Recommended
Oil	Mineral or AB	Recommended	Recommended
	POE or PAG, pure	Recommended	Recommended
	POE or PAG, with additives	Not recommended ⁽²⁾	Recommended

⁽¹⁾ Only solder versions (cu-plated / pure copper) and connection sizes below 25 mm are approved for flammable refrigerants now.

⁽²⁾ DCL Hermetic filter driers contain activated alumina, which is a polar material used for acid adsorption. Many oil additives are also polar substances and can be adsorbed by the activated alumina, rendering them useless, and reducing the drier's acid capacity, though this is not harmful to the system.

Filter drier selection based on capacity calculation

Drier selection based on capacities and refrigerants, please refer to Coolselector®2. Rated and extended capacities are calculated with the Coolselector®2 calculation engine to ARI standards with the ASEREP equations based on laboratory measurements of selected valves.

Download Coolselector®2 for free at coolselector.danfoss.com.

Design

Table 6: Design

1	Inlet	5	Perforated plate
2	Spring	6	Seal cap, flare connection
3	Solid core	7	Seal cap, solder connection
4	Polyester mat		

The relatively large diameter of the hermetic filter drier means that the liquid flow velocity is suitably low and the pressure drop minimal.

Powder formation is eliminated because the solid core grains are bonded and cannot move against each other.

Certificates, declarations, and approvals

The list contains all certificates, declarations, and approvals for this product type. Individual code number may have some or all of these approvals, and certain local approvals may not appear on the list.

Some approvals may change over time. You can check the most current status at danfoss.com or contact your local Danfoss representative if you have any questions.

Table 11: Certificates, declarations, and approvals

Document type	Approval authority
Manufacturer declaration for PED/ROHS/ATEX	Danfoss
UL certificate	UL
EAC document	EAC
Manufacturer declaration for china ROHS	Danfoss

⚠ WARNING:

Only solder versions (cu-plated / pure copper) and connection sizes below 25 mm are approved for flammable refrigerants now.

Online support

Danfoss offers a wide range of support along with our products, including digital product information, software, mobile apps, and expert guidance. See the possibilities below.

The Danfoss Product Store

The Danfoss Product Store is your one-stop shop for everything product related—no matter where you are in the world or what area of the cooling industry you work in. Get quick access to essential information like product specs, code numbers, technical documentation, certifications, accessories, and more.

Start browsing at store.danfoss.com.

Find technical documentation

Find the technical documentation you need to get your project up and running. Get direct access to our official collection of data sheets, certificates and declarations, manuals and guides, 3D models and drawings, case stories, brochures, and much more.

Start searching now at www.danfoss.com/en/service-and-support/documentation.

Danfoss Learning

Danfoss Learning is a free online learning platform. It features courses and materials specifically designed to help engineers, installers, service technicians, and wholesalers better understand the products, applications, industry topics, and trends that will help you do your job better.

Create your Danfoss Learning account for free at www.danfoss.com/en/service-and-support/learning.

Get local information and support

Local Danfoss websites are the main sources for help and information about our company and products. Find product availability, get the latest regional news, or connect with a nearby expert—all in your own language.

Find your local Danfoss website here: www.danfoss.com/en/choose-region.

Coolselector®2 - find the best components for you HVAC/R system

Coolselector®2 makes it easy for engineers, consultants, and designers to find and order the best components for refrigeration and air conditioning systems. Run calculations based on your operating conditions and then choose the best setup for your system design.

Download Coolselector®2 for free at coolselector.danfoss.com.
