

Data Sheet

# Thermostatic expansion valve Type **T 2** and **TE 2**

Thermostatic expansion valves maintain a constant superheat level at the evaporator outlet

Thermostatic expansion valves regulate the injection of refrigerant liquid into evaporators.

Injection is controlled by the refrigerant superheat.

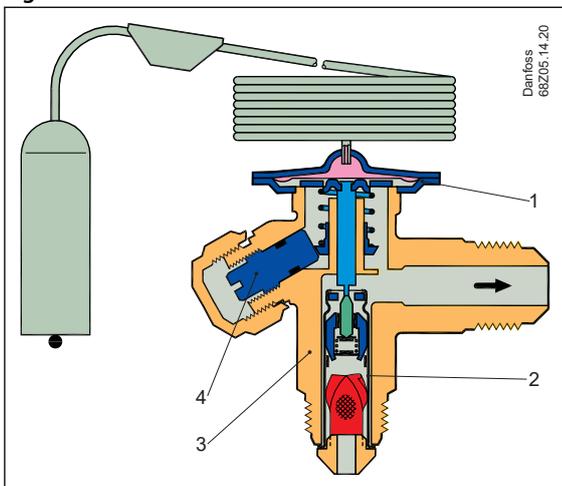

Therefore the valves are especially suitable for liquid injection in "dry" evaporators where the superheat at the evaporator outlet is proportional to the evaporator load.

## Features

- Large temperature range
  - Equally applicable to freezing, refrigeration and air conditioning applications.
- Interchangeable orifice assembly
  - easy storage
  - easy capacity matching
  - better service.
  - easy cleaning and replacement of filter
- Rated capacities from 1 to 20.5 kW / 0.3 to 5.8 TR for R407C
- Can be supplied with MOP (Max. Operating Pressure).
  - Protects the compressor motor against excessive evaporating pressure during normal operation
- Stainless steel bulb and Danfoss patented bulb strap
  - Fast and easy to install
  - Good temperature transfer from pipe to bulb
- Valves for special temperature ranges can be supplied
- Design protected

**Functions**

Figure 1: Functions

1	Thermostatic element (diaphragm)
2	Interchangeable orifice assembly
3	Valve body
4	Superheat setting spindle (see instructions)

T2 and TE2 valves have an interchangeable orifice assembly.

The orifice assembly is suitable for all versions of valve body and refrigerants and in all evaporating temperature ranges.

The charge in the thermostatic element depends on the refrigerant and evaporating temperature range.

The valves are available with internal (T2) or external (TE2) pressure equalization.

External pressure equalization should always be used on systems with liquid distributors. The bulb gives fast and precise reaction to temperature changes in the evaporator. The bulb is fixed with a Danfoss patented bulb strap for quick, easy and reliable connection. The valves are able to withstand the effects that normally occur with hot gas defrosting.

To ensure long operating life, the valve cone and seat are made of a special alloy with particularly good wear qualities.

## Product specification

### Technical data

#### Max. temperature

Bulb, when valve is installed: 100 °C

Bulb, element not mounted: 60 °C

#### Min. temperature

T2 – TE2: -60 °C

#### Max. test pressure

PT = 38 bar

#### Max. working pressure

PS/MWP = 34 bar

Table 1: Technical data

Refrigerant	Range N	Range NM	Range NL	Range B
	-40 °C – 10 °C	-40 °C – -5 °C	-40 °C – -15 °C	-60 °C – -25 °C
	MOP-point in evaporating temperature $t_e$ and evaporating pressure $p_e$ <sup>(1)</sup>			
	15 °C / 60 °F	0 °C / 32 °F	-10 °C / 15 °F	-20 °C / -4 °F
R22	100 psig / 6.9 bar (abs)	60 psig / 4.0 bar (abs)	35 psig / 2.4 bar (abs)	20 psig / 1.4 bar (abs)

<sup>(1)</sup>  $p_e$  in bar gauge

#### Superheat

SS = static superheat

OS = opening superheat

SH = SS + OS = total superheat

$Q_{nom}$  = rated capacity

$Q_{max}$  = maximum capacity

Static superheat SS can be adjusted with setting spindle.

Standard superheat setting SS is 4K for all standard valves.

The opening superheat OS is 6 K from when opening begins to where the valve gives its rated capacity  $Q_{nom}$ .

#### Example

Static superheat SS = 5 K

Opening superheat OS = 6 K

Total superheat SH = 5 + 6 = 11 K

6	19.7	19.7	10.1	8.6	15.5	19.6	22.9	19.8	19.1	14.8	18.3	7.3

The rated capacity is based on:

Evaporating temperature  $t_e = 4.4 \text{ °C}$

Condensing temperature  $t_c = 38 \text{ °C}$

Refrigerant temperature ahead of valve  $t_l = 37 \text{ °C}$

### **Valve selection based on capacity calculation**

As for extended capacity calculations and valve selection based on capacities and refrigerants, please refer to Coolselector®2. Rated and extended capacities are calculated with the Coolselector®2 calculation engine to ARI standards with the ASEREP equations based on laboratory measurements of selected valves.

### **How to select a valve**

Example:

Refrigerant = R407C

Q (capacity) = 1.1kW

$T_{cond}$  (condensing temperature) = 25 °C

$T_{evap}$  (evaporator temperature) = -30 °C

$T_{sub}$  (subcooling temperature) = 2 K

$D_{pd}$  (distributer pressure drop) = 1 bar

Q (capacity) = 1.1kW

$f_{sub}$  (subcooling correction factor) = 0.98

$f_p$  (distribution correction factor) = 0.96

$$\frac{Q}{f_{sub} \times f_p} = \text{selected capacity}$$

$$\frac{1.1}{0.98 \times 0.96} = 1.17 \text{ kW}$$

The selection will be: TE2 orifice 00 (1.21 kW > 1.17 kW)

**Table 4: Capacity in kW, range N -40 °C to 10 °C. Opening superheat  $sh = 6 \text{ K}$**

Valve type	Orifice no.	Cond. temp. [°C]	Evaporating [°C]			
			-40	-30	-20	-10
T2 / TE2	0X	25	0.76	0.83	0.88	0.9
T2 / TE2	00		0.99	1.21	1.42	1.6
T2 / TE2	1		1.41	1.8	2.27	2.77

**Table 5: Subcooling correction factor 'fsub'**

Subcooling [K]	2	4	10	15

### Production place and date N4511A

The thermostatic element has laser engraved data on top of the diaphragm. This engraving gives valve type (with code number), evaporating temperature range, MOP point, refrigerant, and max. working pressure. PS/MWP.

Figure 6: Orifice assembly and filter for flare x flare version for T2 and TE2

### Orifice assembly for T2 and TE2

The orifice assembly is marked with the orifice size (e.g. 06) and week stamp + last number in the year (e.g. 174). The orifice assembly number is also given on the lid of its plastic container.

Figure 7: Capillary tube label for T2 and TE2

### Capillary tube label for T2 and TE2

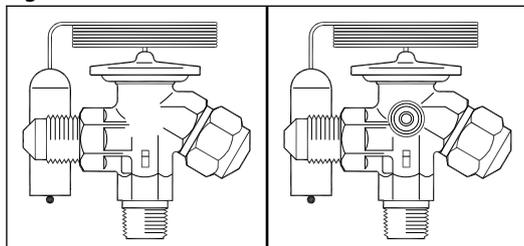

The label gives the orifice size (04) and consists of the lid of the orifice assembly plastic container. It can easily be fastened around the expansion valve capillary tube to clearly identify the valve size.

## Ordering

### T2/TE2 Thermostatic element with bulb strap

<sup>(1)</sup> For R407C plants, please select valves from the dedicated R407C program

## Flare connections

Figure 10: Flare connections

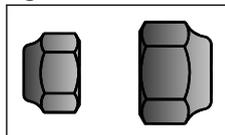

Table 11: Flare connections

Connection for copper tubing with outside diameter		Reducer for copper tubing with outside diameter		Code no.
[in]	[mm]	[in]	[mm]	
1/4	6	–	–	011L1101
3/8	10	–	–	011L1135
1/2	12	–	–	011L1103
–	–	1/4	6	011L1107

Example :

A TE2 thermostatic expansion valve consists of two parts + flare nuts if required:

- 1 thermostatic element
- 1 orifice assembly and flare nuts

When ordering one thermostatic expansion valve, TE2 with orifice 01, five code numbers are required:

- 1-off thermostatic element - 068Z3209
- 1-off orifice assembly 01 - 068-2010
- 1-off 3/8 in flare nut - 011L1135
- 1-off 1/2 in flare nut - 011L1103
- 1-off 1/4 in flare nut - 011L1101

### Orifice assembly with filter

Figure 11: Orifice assembly with filter

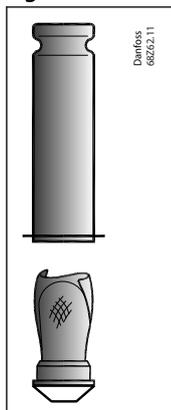

Table 12: Orifice assembly with filter

Orifice no.	Code no.
0X	068-2002
00	068-2003
01	068-2010
02	068-2015
03	068-2006
04	068-2007
05	068-2008
06	068-2009

### Orifice assembly with filter for solder adaptor

Figure 12: Orifice assembly with filter for solder adaptor

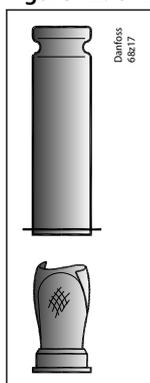

Table 13: Orifice assembly with filter for solder adaptor

Orifice no.	Code no.
0X	068-2089
00	068-2090
01	068-2091
02	068-2092
03	068-2093
04	068-2094
05	068-2095
06	068-2096

## Filter

Figure 13: Filter

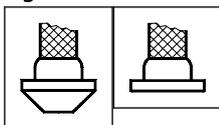

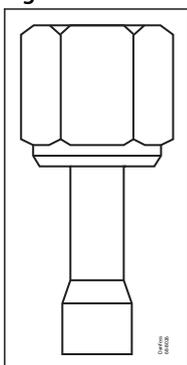

Table 14: Filter

Filter type	Code no. Multi pack
For flare connection	068-0003
For solder adaptor	068-0015

## Solder adaptor

Figure 14: Solder adaptor

The adaptor is for use with thermostatic expansion valves T2 and TE2 with flare × solder connections. When the adaptor is fitted correctly it meets the sealing requirements of DIN 8964.

The adaptor offers the following advantages:

- The orifice assembly can be replaced.
- The filter can be cleaned or replaced.

When using the solder adapter, a special orifice assembly is required. Please use the following tables to select both the appropriate adapter and orifice assembly.

Only in this way can the sealing requirements of DIN 8964 be fulfilled.

Solder adaptor for filter drier (FSA) must not be used in the T2 inlet.

Table 15: Solder adaptor without orifice assembly and filter

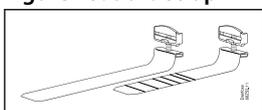

Connection ODF solder	Code no.
1/4 in	068-2062
6 mm	068-2063
3/8 in	068-2060
10 mm	068-2061

Table 16: Filter for solder adaptor

Description	Code no.
Filter excl. orifice assembly	068-0015

## Bulb strap (Danfoss patented)

Figure 15: Bulb strap

Each valve is delivered with a Danfoss patented bulb strap. Spares can be ordered.

## Thermostatic expansion valve, type T 2 and TE 2

**Table 17: Bulb strap (Danfoss patented)**

Description	Pack mode	Quantity / pack	Code no.
Bulb strap 0.4 mm Max. 28 mm tube	I	45	068U3505
Bulb strap 0.4 mm Max. 50 mm tube	I	45	068U3506
Bulb strap 0.4 mm Max. 28 mm tube	M	25	068U3507
Bulb strap 0.4 mm Max. 50 mm tube	M	25	068U3508

## Certificates, declarations, and approvals

The list contains all certificates, declarations, and approvals for this product type. Individual code number may have some or all of these approvals, and certain local approvals may not appear on the list.

Some approvals may change over time. You can check the most current status at [danfoss.com](http://danfoss.com) or contact your local Danfoss representative if you have any questions.

**Table 18: Certificates, declarations, and approvals**

File name	Document type	Document topic	Approval authority
EAC RU Д-ДК.БЛ08.В.00191_18	EAC Declaration	Machinery & Equipment	EAC

## Online support

Danfoss offers a wide range of support along with our products, including digital product information, software, mobile apps, and expert guidance. See the possibilities below.

### The Danfoss Product Store

The Danfoss Product Store is your one-stop shop for everything product related—no matter where you are in the world or what area of the cooling industry you work in. Get quick access to essential information like product specs, code numbers, technical documentation, certifications, accessories, and more.

Start browsing at [store.danfoss.com](https://store.danfoss.com).

### Find technical documentation

Find the technical documentation you need to get your project up and running. Get direct access to our official collection of data sheets, certificates and declarations, manuals and guides, 3D models and drawings, case stories, brochures, and much more.

Start searching now at [www.danfoss.com/en/service-and-support/documentation](https://www.danfoss.com/en/service-and-support/documentation).

### Danfoss Learning

Danfoss Learning is a free online learning platform. It features courses and materials specifically designed to help engineers, installers, service technicians, and wholesalers better understand the products, applications, industry topics, and trends that will help you do your job better.

Create your Danfoss Learning account for free at [www.danfoss.com/en/service-and-support/learning](https://www.danfoss.com/en/service-and-support/learning).

### Get local information and support

Local Danfoss websites are the main sources for help and information about our company and products. Find product availability, get the latest regional news, or connect with a nearby expert—all in your own language.

Find your local Danfoss website here: [www.danfoss.com/en/choose-region](https://www.danfoss.com/en/choose-region).

### Coolselector®2 - find the best components for you HVAC/R system

Coolselector®2 makes it easy for engineers, consultants, and designers to find and order the best components for refrigeration and air conditioning systems. Run calculations based on your operating conditions and then choose the best setup for your system design.

Download Coolselector®2 for free at [coolselector.danfoss.com](https://coolselector.danfoss.com).
