

Data sheet

Electronic Ignition Units EBI4 LP1P

Application

The EBI4 LP1P unit series is specially designed for applications where constant duty is required.

EBI4 LP1P is a 1-pole version for ignition between 1 electrode and frame.

EBI4 LP1P

- Application requiring constant duty
- 1-pole high voltage high frequency output
- 100% ED at 30°C
- Front connection for secondary cables
- 230 Vac or 120 Vac

Applications and Features

- 1 pole output
- Low power consumption due to high efficiency (new technology)
- Earth connection through the primary cable
-  marking in accordance with the directives: EMC, LVD, RoHs and EAC.
