

Data Sheet

Safety relief valve Type **SFA 10**, **SFA 10H** and **SFA 15**

Reliable vessel overpressure protection

The SFA 10 and SFA 15 are standard, **back pressure dependent** safety relief valves in angle-way execution, specially designed for protection of vessels and other components against excessive pressure.

The valve is designed to meet the strict quality demands and safety requirements for refrigeration installations, specified by the international classification societies.

The spring housing is closed tightly to avoid refrigerant leakage.

The inlet flow diameters of the valves are:

- 6.8 mm (¼ in.) for SFA 10
- 13 mm (½ in.) for SFA 15

The valves can be ordered with set pressure:

- between 10 and 27 bar (145 and 392 psig) for SFA 10
- between 28 and 65 bar (406 and 943 psig) for SFA 10H
- between 10 and 40 bar (145 and 580 psig) for SFA 15

Standard pressure setting valves having "TÜV Pressure Setting Certificate" with each valve, are also available.

Features

- SFA 10 and SFA 15 applicable for the refrigerants HCFC, HFC, R717 (Ammonia), R744 (CO₂)
- SFA 10H applicable for CO₂ with POE and PAG oil
- Easy installation by threaded connections and Union fitted welding nipples
- Wide capacity range
- Stable set-point and reliable resetting
- Leak proof internal and external
- Easy selection by use of Cool selector
- Available with or without TÜV pressure setting certificate

Media

Refrigerants

SFA 10 and SFA 15 are with CR O-ring and applicable for the refrigerants HCFC, HFC, R717 (Ammonia), R744 (CO₂) within a temperature range of -50 °C to 100 °C (-58 °F to 212 °F) and a set pressure not lower than -30 °C (-22 °F) saturation temperature.

SFA 10H is with EPDM O-ring and applicable for CO₂ with POE and PAG oil only within a temperature range of -50 °C to 100 °C (-58 °F to 212 °F).

Flammable hydrocarbons are not recommended. For further information please contact your local Danfoss Sales Company.

New refrigerants

Danfoss products are continually evaluated for use with new refrigerants depending on market requirements.

When a refrigerant is approved for use by Danfoss, it is added to the relevant portfolio, and the R number of the refrigerant (e.g. R513A) will be added to the technical data of the code number. Therefore, products for specific refrigerants are best checked at store.danfoss.com/en/, or by contacting your local Danfoss representative.

Product specification

Technical data

For SFA 10 and SFA 15 with CR O-ring:

- At static temperatures below -30 °C (-22 °F) the O-ring becomes harder and full tightness of the valve cannot be guaranteed. Above -30 °C (-22 °F) the O-ring will become soft and fully functional again.
- Observe for R744 (CO₂)! Due to above the min. set pressure for correct functional valve in R744 (CO₂) is 27 bar (392 psig), to ensure proper function of the valve in case of a sudden relief.
- At static temperatures above 60 °C (140 °F) the lifetime of the CR O-ring will be gradually reduced, and the valve should be serviced more frequently.

In case the valve has relieved please refer to the SFA 10 installation guide.

Pressure

- Pressure setting range:
 - SFA 10: 10 – 27 bar (145 – 392 psig)
 - SFA 10H: 28 – 65 bar (406 – 943 psig)
 - SFA 15: 10 – 40 bar (145 – 580 psig)

❗ IMPORTANT:

The SFA safety relief valve is dependent on the back pressure (if the back pressure is higher than the atmospheric pressure, the opening pressure will be higher than stated set pressure).

Pressure setting

The operating pressure of the plant should be at least 15% below the set pressure and the upstream pressure loss <3% of the valve set pressure. This allows a perfect re-seating of the safety relief valve after having been activated.

Special circumstances such as vibrations (which should be avoided) and oscillating pressure may require an increased difference between the operational pressure and the closing pressure.

Design

Figure 1: SFA pressure relief

SFA is designed as a direct loaded safety valve recommended particularly for refrigeration applications. On a rise in pressure above the set pressure, the safety relief valve will initially start opening slightly, to minimize the outlet of refrigerant.

If the pressure continues to increase, the valve will open fully. The safety relief valve will be fully open before the pressure is 10% higher than set pressure, and fully closed before the pressure is 10% below set pressure.

Housing

Made of special steel approved for low temperature operation. Spindle, cone, and seat are made of stainless steel, to ensure precise operation even during extraordinary conditions.

Installation

To ensure exact operation of the safety relief valve it should be installed with the spring housing upwards. When the valve is mounted, it is important to avoid the influence of static, dynamic and thermal stress.

A very precise technique has been applied for the production of the seal. However, this seal can still be damaged, if dirt is blown from the pipe system into the valve.

It is recommended that safety relief valves exhaust into the open air with a U-pipe filled with oil on the discharge branch, to prevent dirt from penetrating into the valve.

In extreme environments it is recommended to use a valve with bellow instead, to protect the valve from refrigerant contaminated with dirt and particles.

It is also recommended that the valves be installed in pairs in conjunction with the double stop valve type DSV10, DSV1 or DSV2. For further information please see the data sheet for DSV.

Re-calibration/servicing

In certain countries the authorities demand that the valves are checked at least once a year (see local rules).

Control/Identification

After adjustment of the set pressure at Danfoss, the valves are sealed. For that reason Danfoss can only guarantee correct operation, if the seal remains unbroken.

All valves are provided with a metal plate with the following information:

- Flow diameter
- Set pressure
- Date of production
- Production number
- Type approved code.

Transport/Handling

The valves are fitted with special protection covers and packed into purpose made transportation cartons.

It is important that the cover remains fitted around the valve until it is installed.

To ensure the exact and precise operation of the valve it must be handled with care.

Capacity

The design and construction of the safety relief valve has been tested and approved by TÜV. This test comprises control of the function of the valve as well as measuring of the capacity, which is the basis of the curves and tables on the following pages. The values in the table are based on saturated gas.

If e.g. back pressure or superheated gas have to be taken into consideration, the formulas or the Danfoss computation program (Coolselector2™) can be used.

Table 1: SFA valve characteristics

Valve	Nominal size		Flow diameter d_o	Flow area A_o	De-rated, certified coefficient of discharge K_{dr}	Effective discharge area $A_o \times K_{dr}$
	Inlet	Outlet				
SFA 10 and SFA 10H	10 mm	15 mm	6.8 mm	36.3 mm ²	0.85	30.9 mm ²
	3/8 in.	1/2 in.	0.268 in.	0.056 in ²		0.048 in ²
SFA 15	15 mm	20 mm	13 mm	133 mm ²	0.73	97 mm ²
	1/2 in.	3/4 in.	0.512 in.	0.206 in ²		0.150 in ²

The discharge capacity of the safety relief valve is based on (ISO 4126-1 / EN 1313 6).

$$q_m = 0.2883 \times C \times A_o \times K_{dr} \times K_b \sqrt{\frac{p}{v}}$$

q_m	Discharge capacity (kg/h).
C	Discharge function depending of the actual refrigerant (κ) see Table 2: Properties of refrigerants .
A_0	Flow area of the safety relief valve (mm ²).
K_{dr}	De-rated coefficient of discharge ($K_{dr} = K_d \times 0.9$), (the K_{dr} is certified by TÜV) see Table 1: SFA valve characteristics .
K_b	Correction factor for sub-critical flow (-). $K_b = 1.0$ when the back pressure is lower than approx. $0.5 \times$ relieving pressure ($P_b < 0.5 \times p$). For all SFV safety valves $K_b = 1.0$
v	Specific volume of the vapour at the relieving pressure p . (m ³ /kg).
p_{set}	Set pressure, the predetermined pressure at which a pressure relief valve under operation starts to open (pset is indicated on the metal plate on the safety relief valve).
p_{atm}	Atmospheric pressure (1 bar).
p	Relieving pressure, $p = p_{set} \times 1.1 + P_{atm}$ (bar absolute).

For further details see the above-mentioned ISO or EN standards.

Spare parts

Table 22: Spare part kits

Type	Code number
SFA 10 (H)/DSV 10 Inspection kit	148F3068
SFA 10 Repair Kit 10 – 27 bar ⁽¹⁾	148F3069
SFA 10H Repair Kit 28 – 65 bar ⁽¹⁾	148F3070
SFA 15/DSV 1 inspection kit	148F3029
Repair kit SFA 15	148F3036

⁽¹⁾ Inspection kit should be ordered with any repair kit

Accessories

Table 23: Accessories

Type	Code number
DSV/SFA/SFV Non-stick grease	148F3064
DSV 10 Cap and alu gasket for testing (1 set)	148F3063
DSV 10 T Plug ½" NPT (1 set)	148F3072
SFA 10(H) G Inlet weld connector	148F3075
SFA 10(H) NPT Inlet weld connector	148F3076
Nipples + gaskets set for SFA 10(H), SFV 15/SFA 15 ⁽¹⁾	148F3019

⁽¹⁾ Weld nipple for SFA 10(H) inlet (G ½") not included in **148F3019**. Order **148F3075** in addition to.

Certificates and declarations

The list contains all certificates, declarations, and approvals for this product type. Individual code number may have some or all of these approvals, and certain local approvals may not appear on the list.

Some approvals may change over time. You can check the most current status at danfoss.com or contact your local Danfoss representative if you have any questions.

Table 24: Pressure Equipment Directive (PED)

	The SFA valves are approved in accordance with the European standard specified in the Pressure Equipment Directive and are CE marked.
---	---

For further details / restrictions - see Installation guide.

Table 25: SFA 10, SFA 10H and SFA 15

	SFA 10 / SFA 10H	SFA 15
Nominal bore	6.8 mm (¼ in.)	13 mm (0.512 in.)
Classified for	Fluid group I	
Category	IV

Online support

Danfoss offers a wide range of support along with our products, including digital product information, software, mobile apps, and expert guidance. See the possibilities below.

The Danfoss Product Store

The Danfoss Product Store is your one-stop shop for everything product related—no matter where you are in the world or what area of the cooling industry you work in. Get quick access to essential information like product specs, code numbers, technical documentation, certifications, accessories, and more.

Start browsing at store.danfoss.com.

Find technical documentation

Find the technical documentation you need to get your project up and running. Get direct access to our official collection of data sheets, certificates and declarations, manuals and guides, 3D models and drawings, case stories, brochures, and much more.

Start searching now at www.danfoss.com/en/service-and-support/documentation.

Danfoss Learning

Danfoss Learning is a free online learning platform. It features courses and materials specifically designed to help engineers, installers, service technicians, and wholesalers better understand the products, applications, industry topics, and trends that will help you do your job better.

Create your Danfoss Learning account for free at www.danfoss.com/en/service-and-support/learning.

Get local information and support

Local Danfoss websites are the main sources for help and information about our company and products. Find product availability, get the latest regional news, or connect with a nearby expert—all in your own language.

Find your local Danfoss website here: www.danfoss.com/en/choose-region.

Spare Parts

Get access to the Danfoss spare parts and service kit catalog right from your smartphone. The app contains a wide range of components for air conditioning and refrigeration applications, such as valves, strainers, pressure switches, and sensors.

Download the Spare Parts app for free at www.danfoss.com/en/service-and-support/downloads.

Coolselector®2 - find the best components for you HVAC/R system

Coolselector®2 makes it easy for engineers, consultants, and designers to find and order the best components for refrigeration and air conditioning systems. Run calculations based on your operating conditions and then choose the best setup for your system design.

Download Coolselector®2 for free at coolselector.danfoss.com.

Any information, including, but not limited to information on selection of product, its application or use, product design, weight, dimensions, capacity or any other technical data in product manuals, catalogues descriptions, advertisements, etc. and whether made available in writing, orally, electronically, online or via download, shall be considered informative, and is only binding if and to the extent, explicit reference is made in a quotation or order confirmation.
