

# Solenoid valve

## Type **EV220W**

## Features and versions

- For water, oil, compressed air and similar neutral media
- NBR for air and oil
- WRAS approved with EPDM sealing; 0 – 90 °C  
NC version 0 – 50 °C NO version
- Standard equipped with clip on coil for dry and humid environments
- Enclosure: IP65

## 1 Portfolio overview

Table 1: Portfolio overview

Features	EV220W
	
Body material	Brass
DN [mm]	10-50
Connection	G3/8" - G2"
Sealing material	EPDM, NBR
Function	NC, NO
$K_v$ [m <sup>3</sup> /h]	1.6-32
Differential pressure range [bar]	0.2-10
Temperature range [°C]	-30-100

## 2 Functions

### 2.1 Function, NC

#### Coil voltage disconnected

When voltage is disconnected, the armature spring (2) presses the armature (3) down against the pilot orifice (4). Pressure builds up over the diaphragm (5) via the equalizing orifice (6). The diaphragm closes the main orifice (7) as soon as the pressure over the diaphragm equals the inlet pressure. The valve stays closed for as long as voltage remains disconnected.

#### Coil voltage connected (open)

When voltage is applied to the coil (1), the pilot orifice (4) is opened. Since the pilot orifice is larger than the equalizing orifice (6), pressure over the diaphragm (5) falls and the diaphragm is lifted clear of the main orifice (7). The valve stays open for as long as the required minimum differential pressure is present and voltage is applied to the coil.

Figure 1: Function, NC

1	Coil
2	Armature spring
3	Armature

5	Diaphragm
6	Equalizing orifice
7	Main orifice

## 2.2 Function, NO

### Coil voltage disconnected (Open)

When voltage is disconnected, the pilot orifice (4) is opened. Since the pilot orifice is larger than the equalizing orifice (6), pressure over the diaphragm (5) falls and the diaphragm is lifted clear of the main orifice (7). The valve stays open for as long as the required minimum differential pressure is present and voltage is applied to the coil.

### Coil voltage connected (Close)

When voltage is applied to the coil (1), the armature spring (2) presses the armature (3) down against the pilot orifice (4). Pressure builds up over the diaphragm (5) via the equalizing orifice (6). The diaphragm closes the main orifice (7) as soon as the pressure over the diaphragm equals the inlet pressure. The valve stays closed for as long as voltage remains disconnected.

7	Main orifice

### 3 Applications

It is recommended to use a filter in front of the valve. Recommended filter 50 mesh (297 microns).

Figure 3: Filter

In water applications, exercise the valves at least once every 24 hours, meaning change the state of the valve. The valve exercise will minimize the risk of the valve sticking due to calcium carbonate, zinc or iron oxide build-up.

Figure 4: Exercise: Valve on/off

To minimize scaling, and corrosion attack it is recommended that the water passing the valve have the following values:

- Hardness 6-18 °dH to avoid scaling (chalk / lime stone build up).
- Conductivity 50 – 800 µS/cm to avoid brass dezincification and corrosion.
- Above 25°C media temperature avoid stagnant water inside the valve to avoid dezincification and corrosion attack.

Figure 5: Caution: Coil Risk

#### **⚠ WARNING:**

Risk of burns/fire if used for a continuous power-on time through hot coil surface.

- I Do not touch the coil with bare hands.
- I Keep the coil away from highly flammable substances with low ignition point.

## 4 Product specification

### 4.1 Technical data

Table 2: Technical data

<b>Media</b>	NBR	For compressed air and oil
	EPDM	For water and drinking water (WRAS approvals)
<b>Media temperature [°C]</b>	NBR	-10 - 60°C
	EPDM	-30 - 100°C
	EPDM NC WRAS approved	0 - 90°C
	EPDM NO WRAS approved	0 - 50°C
<b>Ambient temperature [°C]</b>	-40-50°C	
<b>K<sub>v</sub> value [m³/h]</b>	DN10	1.6 m³/h
	DN14	4 m³/h
	DN18	7 m³/h
	DN22	7 m³/h
	DN32	15 m³/h
	DN40	18 m³/h
	DN50	32 m³/h
<b>Min. Opening differential pressure [bar]</b>	DN10	0.2 bar
	DN14-50	0.3 bar
<b>Max. Opening differential pressure [bar]</b>	10 bar	
<b>Max. working pressure [bar]</b>	10 bar	
<b>Max. test pressure [bar]</b>	15 bar	
<b>Viscosity [cSt]</b>	Max. 50 cSt	

### Capacity diagram

**Example for water:** Capacity for EV220W at a differential pressure of 3 bar: Approx. 7 m³/h

Figure 6: Capacity diagram

## Solenoid valve, Type EV220W

### Time to open/close

Table 3: Time to open/close

Type	EV220W 10	EV220W 14	EV220W 18	EV220W 22	EV220W 32	EV220W 40	EV220W 50
Time to open [ms] <sup>(1)</sup>	50	100	200	200 <sup>(1)</sup>	2500	4000	5000
Time to close [ms] <sup>(1)</sup>	300	400	500	500	4000	6000	10000

<sup>(1)</sup> Times are indicative and apply to water. Exact times will depend on pressure conditions.

### Materials

Table 4: Materials

Components	Materials	Specifications
Valve body/cover	Brass	EN 12165, CW 617N
Armature/armature stop	Stainless steel	W. no. 1.4105 / AISI 430FR
Armature tube	Stainless steel	W. no. 1.4303 / AISI 305
Springs	Stainless steel	W. no. 14310 / AISI 301
O-ring	NBR/EPDM	
Valve plate	NBR/EPDM	
Diaphragm	NBR/EPDM	

## 4.2 Dimension and weight

Table 5: Dimension and weight

Type	Weight with AS coil [kg]	L [mm]	L1 [mm]	B [mm]	B1 [mm]	H1 [mm]	H [mm]	
					Coil AS		NC	NO
EV220W 10	0.56	51	50	50	70	13	77	81
EV220W 14	0.62	58	50	58	70	13	78	82
EV220W 18	0.84	90	50	58	70	18	79	83
EV220W 22	1.12	90	50	58	70	22	84	84
EV220W 32	2.12	120	50	82	70	27	96	96
EV220W 40	3.32	130	50	95	70	32	106	106
EV220W 50	4.42	162	50	113	70	37	112	112

## 6 Online support

Danfoss offers a wide range of support along with our products, including digital product information, software, mobile apps, and expert guidance. See the possibilities below.

### The Danfoss Product Store

The Danfoss Product Store is your one-stop shop for everything product related—no matter where you are in the world or what area of the cooling industry you work in. Get quick access to essential information like product specs, code numbers, technical documentation, certifications, accessories, and more.

Start browsing at [store.danfoss.com](https://store.danfoss.com).

### Find technical documentation

Find the technical documentation you need to get your project up and running. Get direct access to our official collection of data sheets, certificates and declarations, manuals and guides, 3D models and drawings, case stories, brochures, and much more.

Start searching now at [www.danfoss.com/en/service-and-support/documentation](https://www.danfoss.com/en/service-and-support/documentation).

### Danfoss Learning

Danfoss Learning is a free online learning platform. It features courses and materials specifically designed to help engineers, installers, service technicians, and wholesalers better understand the products, applications, industry topics, and trends that will help you do your job better.

Create your Danfoss Learning account for free at [www.danfoss.com/en/service-and-support/learning](https://www.danfoss.com/en/service-and-support/learning).

### Get local information and support

Local Danfoss websites are the main sources for help and information about our company and products. Find product availability, get the latest regional news, or connect with a nearby expert—all in your own language.

Find your local Danfoss website here: [www.danfoss.com/en/choose-region](https://www.danfoss.com/en/choose-region).

### Spare Parts

Get access to the Danfoss spare parts and service kit catalog right from your smartphone. The app contains a wide range of components for air conditioning and refrigeration applications, such as valves, strainers, pressure switches, and sensors.

Download the Spare Parts app for free at [www.danfoss.com/en/service-and-support/downloads](https://www.danfoss.com/en/service-and-support/downloads).

Any information, including, but not limited to information on selection of product, its application or use, product design, weight, dimensions, capacity or any other technical data in product manuals, catalogues descriptions, advertisements, etc. and whether made available in writing, orally, electronically, online or via download, shall be considered informative, and is only binding if and to the extent, explicit reference is made in a quotation or order confirmation. Danfoss cannot accept any responsibility for possible errors in catalogues, brochures, videos and other material. Danfoss reserves the right to alter its products without notice.
