Optyma™ Plus

Equipped for **quietness** and **top performance**

The same robust quality with added technology and smarter design. That's a seriously cool combination.

Quick and safe installation and service

Same serviceable units, upgraded for A2L refrigerants. Ignition proof tested in TÜV laboratory.

High SEPR*

All models in the range are highly efficient and well above EcoDesign 2018 thresholds, contributing to a reduction in energy costs. *SEPR: Seasonal Energy Performance Ratio.

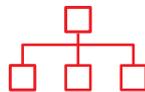

Multi-refrigerants units for complexity reduction, available with new code numbers. Go A2L for a sustainable compliant choice.

The best sound performance in the market

Due to its long-life compressor, acoustic insulation, component design as well as intelligent fan speed reduction during low capacity operation.

Connectivity

Contributes to considerable energy savings, making the Optyma™ Plus up to 20% more economical than an equivalent product.

Standard range (P00 and P02)

In-field stacking cuts costs
With its unique load-bearing design, it's possible to stack units in the field. This cuts installation time, and saves on carpentry and brackets to reduce cost.

Compact cabinet speeds installation
New compact design makes it easier to maneuver when fitting in tight spaces, saving installation time.

New MCHC alloy coils
New upgraded alloy with 1000 hours salt spray test

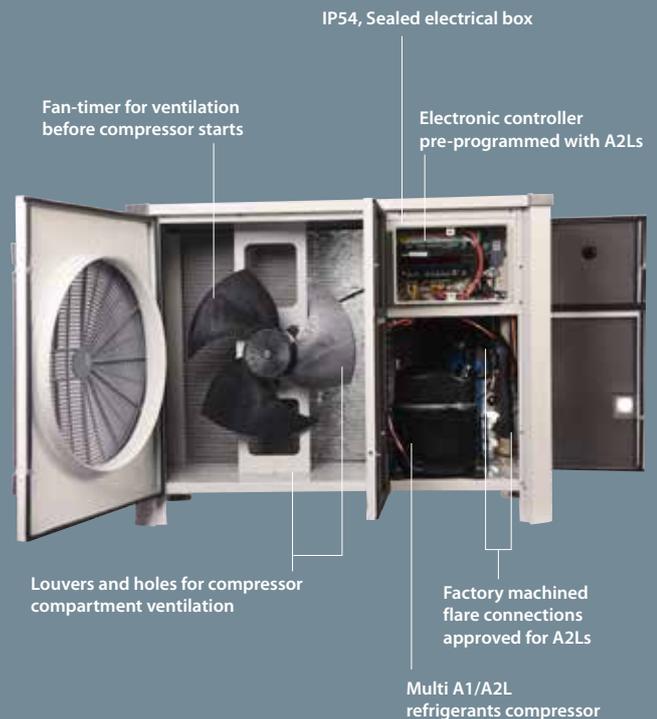

Accessibility to speed up service
Easier and quicker accessibility to all components with new double door design – saves time during servicing, maintenance and repair.

Intelligent technology speeds start-up and enhances reliability
Preset parameters make it easier to get it right from the start. Fewer mistakes reduce the risk of damage and save time and money on repairs.

P02: Scroll compressor with Liquid injection management for safety and reliability of installation using high glide refrigerants

Multi refrigerant range (P00) additional feature

Electrical components approved for A2Ls

Optyma™ Plus INVERTER

Capacity modulation in a simple and adaptive package

Combines our market-leading expertise in condensing unit design with the unique benefits of stepless inverter scroll technology. The result is energy consumption reduced by up to 30% with better food preservation.

Quick and safe installation and service

Preset parameters and Modbus communication makes start-up and maintenance of the condensing unit effortlessly quick and easy.

High SEPR*: 3.84 – certified by ASERCOM

All models in the range are highly efficient and well above EcoDesign 2018 thresholds, contributing to a reduction in energy costs. *SEPR: Seasonal Energy Performance Ratio.

Accurate temperature control

Accurate temperature control and low in-rush current result in a more stable storage temperature and longer product shelf life.

Extended capacity

Stepless compressor modulation - able to slow down and speed up from 30 to 100 RPS to save energy and match load fluctuations very accurately. The inverter drive incorporates smart logic to increase reliability during operation.

Designed for ultimate efficiency

Stepless capacity modulation

From 30 to 100 rps modulation leads to 20-30% higher energy efficiency compared to fixed-speed condensing units.

Simple commissioning

Preset drive parameters with dedicated refrigeration software.

Future-proof

Working with lower GWP refrigerants such as R448A and R449. Also compatible with R407A/F and R404A.

Danfoss compressor and drive package

Dedicated to refrigeration with years of market application and validation.

Simple plug-and-play installation

Safe, simple and hassle-free installation with tried-and-tested components.

Full intelligent control through the Optyma™ Plus Controller

Control, alarm management, day & night operation, can connect to ADAP-KOOL® software, etc.

Remote monitoring & management and integration into DES thanks to connectivity to Danfoss System Managers

Better food preservation by continuously matching the load fluctuations with variable speed compressor and drive

Reduce operational costs as one unit can handle multiple cold rooms or e.g., 1.5 to 5 meters of display cabinets

Reduce disruption with a fast setup, commissioning and servicing (2 service doors, preset controller, remote control)

Reduce commissioning costs with a PED class 1 unit avoiding check by certified body

Reduce footprint and installation time with stack mounting units (up to 2)

Silent operation, thanks to best-in-class BLDC compressor, high performance sound insulation and low noise level fan this unit don't exceed 35dB(A) at 10 meter and decrease by nearly two noise level from other variable load systems
