

Danfoss Optyma™ Control

Connected cold rooms for **higher efficiency** and **food safety**

From standalone to fully managed solutions, the three-tiered Optyma™ Control range enable easy installation, simple setup, and energy savings for existing and new cold rooms.

For optimum protection of perishables and operational safety, the controllers provide HACCP temperature monitoring and transparency when combined with Danfoss IoT solutions.

Easy

installation and
commissioning with
start-up wizard

Functionalities

Fast installation and commissioning:
2 steps programming wizard with standard presets
