

One-stop-shop for convenience

There's no time for complexity in convenience. That's why **Danfoss Smart Store To-Go** is your one-stop-shop for refrigeration components, solutions, and support for servicing small convenience stores and food shops.

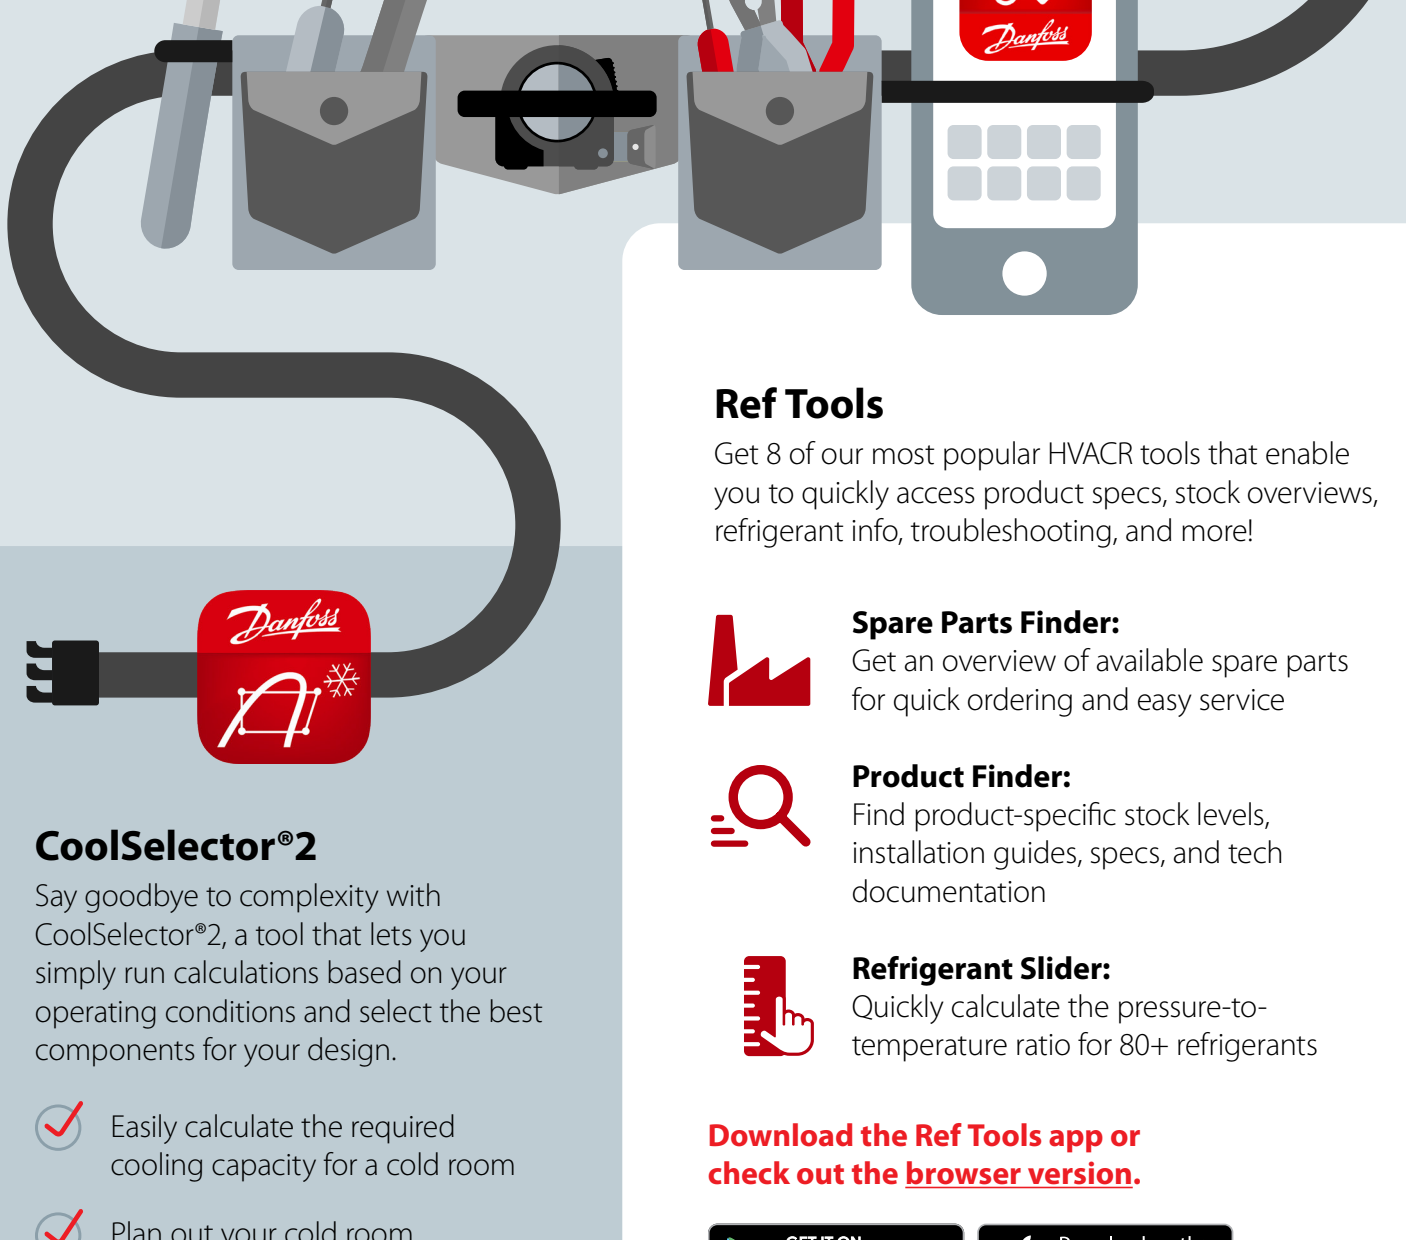

We've gathered all the tools and information you need for easy and fast selection, installation, and service of plug-and-play cooling solutions—simply customized to your customers' individual needs.

This means you can boost your business—and be your customers' one-stop-shop for convenience.

Your digital toolbelt To-Go

For fast and easy component selection and set-up of any refrigeration system in any store, add Ref Tools and CoolSelector®2 to your digital toolbelt—available right at your fingertips.

CoolSelector®2

Say goodbye to complexity with CoolSelector®2, a tool that lets you simply run calculations based on your operating conditions and select the best components for your design.

- ✓ Easily calculate the required cooling capacity for a cold room
- ✓ Plan out your cold room solution design
- ✓ Select your cold room equipment and components
- ✓ Save your preferences for another time

Check out the CoolSelector®2 browser version or learn more in our Youtube walkthrough videos.

Ref Tools

Get 8 of our most popular HVACR tools that enable you to quickly access product specs, stock overviews, refrigerant info, troubleshooting, and more!

Spare Parts Finder:

Get an overview of available spare parts for quick ordering and easy service

Product Finder:

Find product-specific stock levels, installation guides, specs, and tech documentation

Refrigerant Slider:

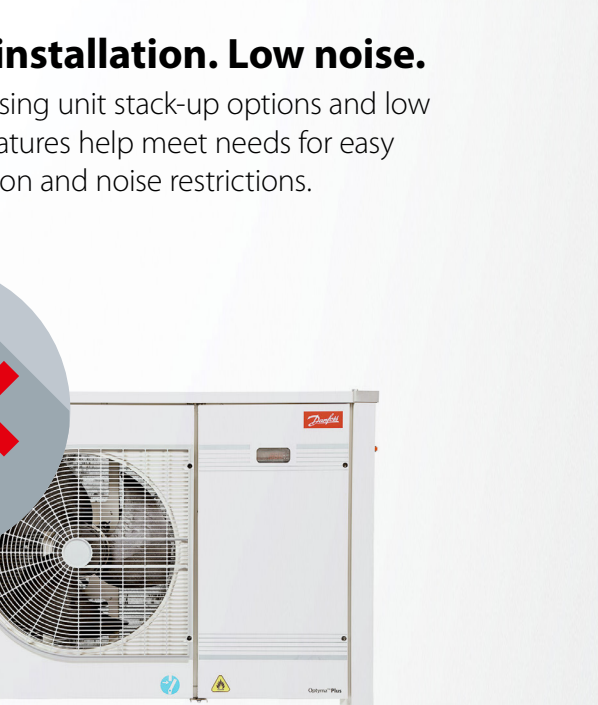

Quickly calculate the pressure-to-temperature ratio for 80+ refrigerants

Download the Ref Tools app or check out the browser version.

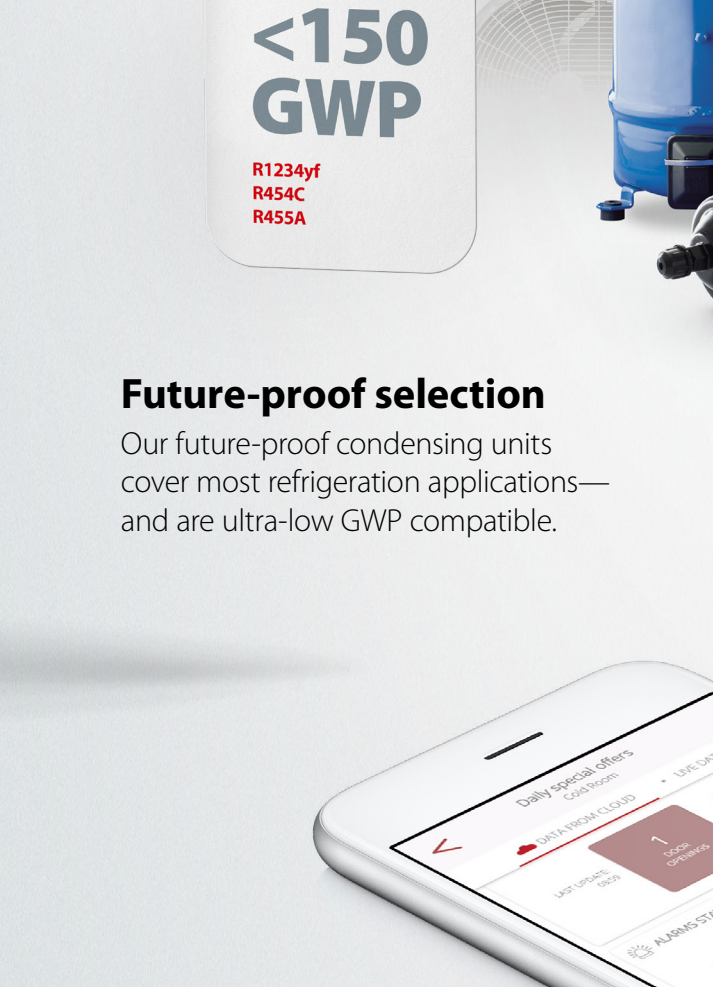

Finding your perfect match has never been easier

From cold rooms to display cases, our solutions support most small store applications. Built on a foundation of simplicity, reliability, and efficiency, with Smart Store To-Go, we make it easier for you to find the perfect match for your store's unique needs.

Easy installation. Low noise.

Condensing unit stack-up options and low noise features help meet needs for easy installation and noise restrictions.

Future-proof selection

Our future-proof condensing units cover most refrigeration applications—and are ultra-low GWP compatible.

24/7 peace of mind

ProsaLink uses data-driven intelligence to log temperatures and send alarms—for 24/7 peace of mind.

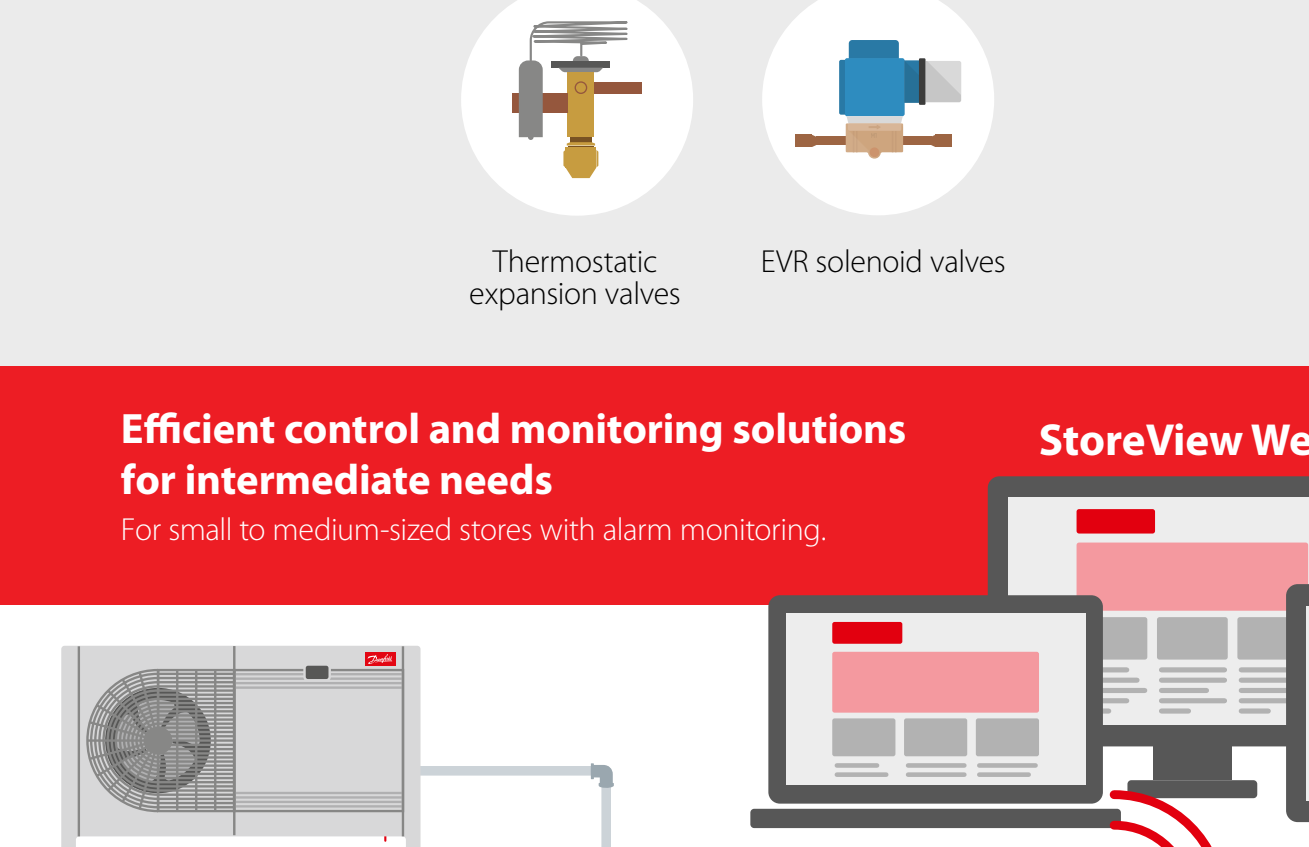

Smart Store To-Go Two examples

Check out the examples below for an easy overview of pre-selected options for either basic or intermediate store needs—and click the products to explore the many other possibilities.

Easy control and monitoring for basic needs

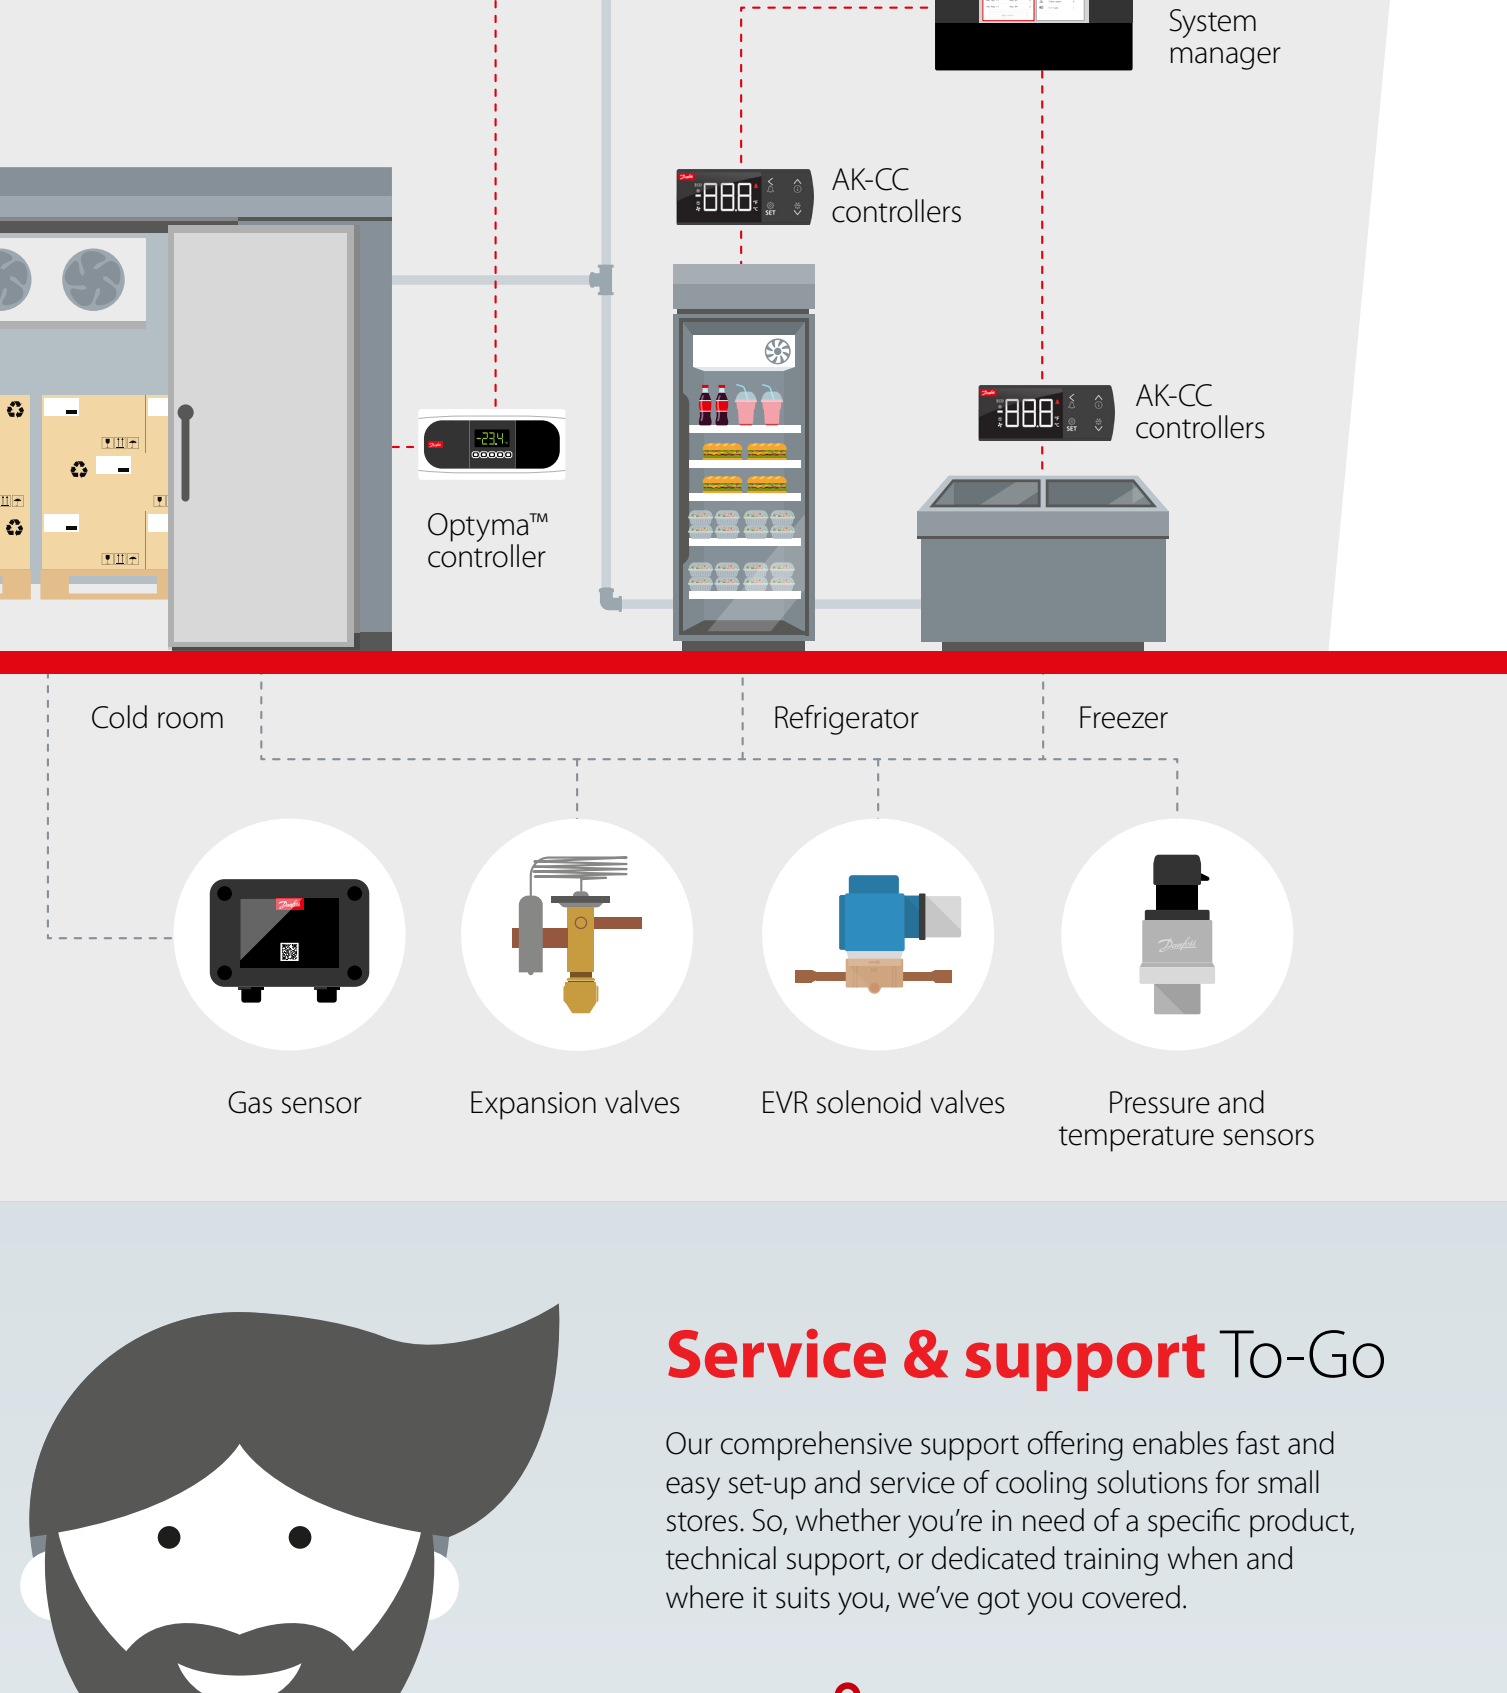

With only few refrigerated cases.

Efficient control and monitoring solutions for intermediate needs

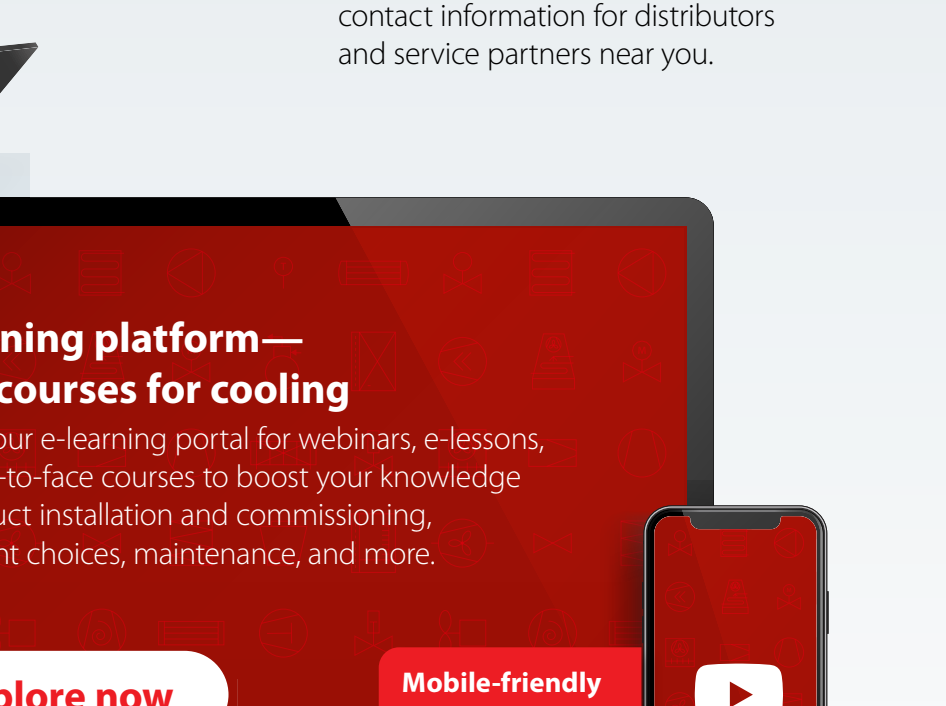

For small to medium-sized stores with alarm monitoring.
