

# Modular Metering Unit

## Danfoss Modular Metering Unit

is a modular heating and cooling unit, which can be used for metering, balancing, and controlling individual apartments in centralized heating and domestic hot water systems.

The unit consists of different articles that are fully compatible and can be easily mounted to required pipe directions.

## Features

Vertical and horizontal installation

Compatible components – **easy** .....  
**specifications**

**Fast** and **easy** installation

**Pre-designed modules** for .....  
different applications

**Reliable** dynamic hydronic balancing

..... **Compact design** – fits even the smallest places

..... Flow rates for **wide application range**

..... **Insulation option**

**Dynamic balancing with AB-PM**, even at partial loads ensures reliable balancing that lowers heating costs and increases comfort inside the apartment. With AB-PM, you need just one valve for pressure, flow and zone control needed

**Pre-assembled sets** save time in the building site and reduces the risk of losing components

**Pre-designed sets** make the design easy and bring flexibility - add DHW balancing or mixing if needed

## Metering unit codes

Domestic water line	267B0000
Circulation set with MTCV DN15	267B0001
Mixing set with TVM-W DN20	267B0002
Heating set with AB-PM DN25 HP	267B0003
Heating set with ASV-PV DN25	267B0004

Recess box 604x596	267B0005
Recess box 854x650	267B0006
Insulation for heating set with AB-PM	267B0007
Water meter cold with REED switch	267B0053
Water meter hot with REED switch	267B0054
