Infocal 9

Energy calculator

Description/Application

The INFOCAL 9 is an energy calculator, e.g. for combination with SONO 3500 CT or SonoSensor 30.

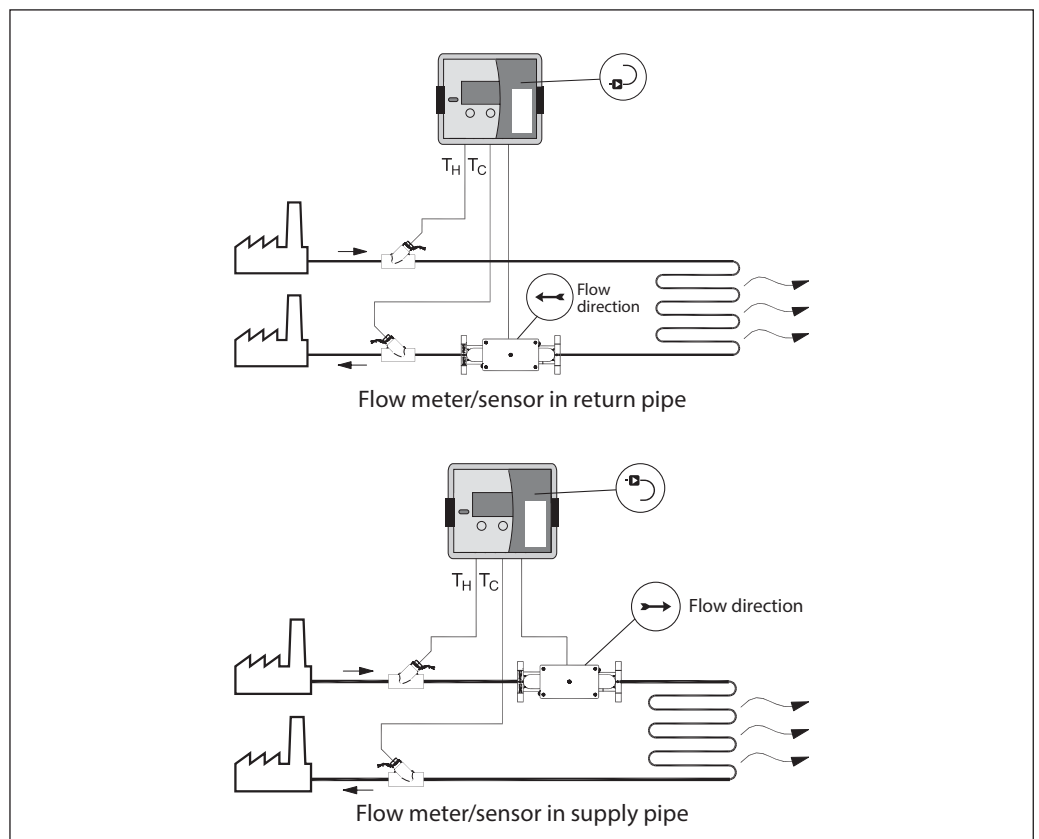

It is especially designed for heating, cooling or combined heating/cooling applications in local and district energy systems.

The INFOCAL 9 has been approved according to MID in accuracy class 2. The calculators are designed for remote read-out (AMR).

Features

- For heating and cooling application
- Battery or 230 V AC power supply
- Lithium battery with 12 years lifetime
- Pair of Pt 500 temperature 2-wire sensors included
- For 2- and 4-wire temperature sensors
- Temperature range: 0 to +160 °C
- Remote reading via M-Bus, radio OMS 868, 2 x pulse output, 2 x 4-20 mA output
- Two pulse inputs integrated as standard
- Calculator with IP65 protection class as standard
- For return or supply pipe flow sensor or flow meter installation
- Individual tariff functions
- History memory for 32 months
- Suitable for Danfoss ECL Comfort controller
- Special option with 2 flow sensors, 2 pressure sensors and 3 temperature sensors measurement

Application drawings

Ordering Infocal 9

Primarily for flow meter/sensor	Pulse value	Installation	Power supply	Energy units	Communication	Cable length ¹⁾	Code number
SONO 3500 CT (DN100-DN150)	2,5 liter / pulse	Return	Battery	0,01 MWh	M-Bus	3m	187F9007
SONO 3500 CT (DN200-DN350)	10 liter / pulse	Return	Battery	0,1 MWh	M-Bus	5m	187F9008
SONO 3500 CT (DN400-DN500)	50 liter / pulse	Return	Battery	0,1 MWh	M-Bus	5m	187F9009
SONO 3500 CT (DN600-DN1200)	100 liter / pulse	Return	Battery	0,1 MWh	M-Bus	5m	187F9010
SONO 3500 CT (DN100-DN150)	2,5 liter / pulse	Return	230V AC	0,01 MWh	M-Bus	3m	187F9011
SONO 3500 CT (DN200-DN350)	10 liter / pulse	Return	230V AC	0,1 MWh	M-Bus	5m	187F9012
SONO 3500 CT (DN400-DN500)	50 liter / pulse	Return	230V AC	0,1 MWh	M-Bus	5m	187F9013
SONO 3500 CT (DN600-DN1200)	100 liter / pulse	Return	230V AC	0,1 MWh	M-Bus	5m	187F9014
SonoSensor 30 (DN15 - DN25)	1 liter / pulse	Return	Battery	0,001 MWh	M-Bus	2m	187F9000
SonoSensor 30 (DN40 - DN100)	10 liter / pulse	Return	Battery	0,01 MWh	M-Bus	3m	187F9001

¹⁾ Cable length of Pt 500, Ø 5.2 mm, 2-wire temperature sensor.

¹⁾ Only with mains supply 230 V AC

Technical data

Basic data	Accuracy	Class 2, EN1434	
	Ambient	Class E2 +M1	
	Environmental	Class C EN1434	
	Protection class	IP 65	
	Max. ambient humidity	93% rel. humidity	
Display indication	Display	LCD, 8-digit	
	Units	MWh - GJ - Gcal - °C - m ³ - m ³ /h	
	Values displayed	Energy, volume, power, flow rate, temperatures	
Temperature	Ambient operating temperature	°C	+5 ... +55
Input	Temperature sensors	Type	Pt 500 with 2 or 4-wire leads; Ø 5.2 or Ø 6.0 mm
	Measuring cycle	T(s)	Temperature: 10s (for both battery and 230 V supply)
	Max. temperature difference	Δθmax (K)	160
	Min. temperature difference	Δθmin (K)	3
	Starting temp. difference	Δθ (K)	0.15 K
	Temperature, measuring range	θ (°C)	0 ... 160
	Supply voltage	3.6 V DC Lithium-battery (D-cell) or Mains supply 230 V AC	
Battery life time	min. 12 years (including AMR communication)		
Weight	0.5 kg		

Design and function

Calculator

The calculator contains all necessary circuits for recording flow rates and temperatures, and for calculating, logging and displaying the data. The calculator housing can be mounted on the wall or standard DIN rail.

The calculator can be conveniently read from an 8-digit display with units and symbols. Two push-buttons provides user-friendly control of the various display loops.

All failures and faults are recorded automatically and shown on LCD display.

To protect the reading data, all relevant data are saved in a non-volatile memory (EEPROM).

This memory saves the measured values, device parameters and types of error at regular intervals.

Temperature sensors

Pairs of Pt 500 Ø5.2 mm (or Ø6.0 mm) temperature sensors with 2-wire (or 4-wire) leads can be used. Cable lengths of 3 m, 5 m and 10 m are available.

Optical interface

Optical interface is integrated into the front panel of the calculator. It is designed for data reading via M-bus protocol.

The optical interface is activated by pressing the control button, and it automatically shuts off 5 minutes after the button has been activated or after data transmission via interface is completed.

Wired M-Bus interface

The energy meter has one slot for an additional communication module. The internal M-Bus module provides data reading possibility via M-Bus protocol:

- M-Bus protocol according to EN13757-3 standard
- 2-wire with polarity reversal protection
- Electrical isolation
- Maximum voltage 50 V DC
- Current drawn: one M-Bus load (1.5 mA)
- Primary or secondary addressing
- Baud rate 300/1200/2400/4800/9600 (default: 2400 baud rate)
- Battery lifetime min. 12 years (D cell)
- Fastest reading interval at battery supply: one meter on the bus every 280 seconds (2400 baud rate)
- Fastest reading interval at mains supply: no limits

Radio OMS 868.95 MHz interface

The module can provide data reading via radio module:

- Wireless M-Bus protocol according to EN13757-4
- OMS (open metering system) compatible
- 868.95 MHz, T1 mode (unidirectional)
- Sending interval every 90 seconds (suitable for 'walk by' readings)

Pulse inputs

Number of Pulse inputs	2
Measurement unit	m ³
Pulse value	Configurable by control buttons
Min. pulse duration	5ms 100ms for combination with SonoSensor 30
Max. permissible pulse frequency	60Hz 5Hz for combination with SonoSensor 30
Pulse type	Passive pulses
Sensor cable length	Max. 10m
Cable type	Shielded twisted pair cable

Data logger

Data logger

Daily, weekly and monthly parameter values and errors are recorded in heat meter memory.

Retention time of measured integrated parameters even if device is disconnected from power supply not more than 12 years.

Data logger capacity

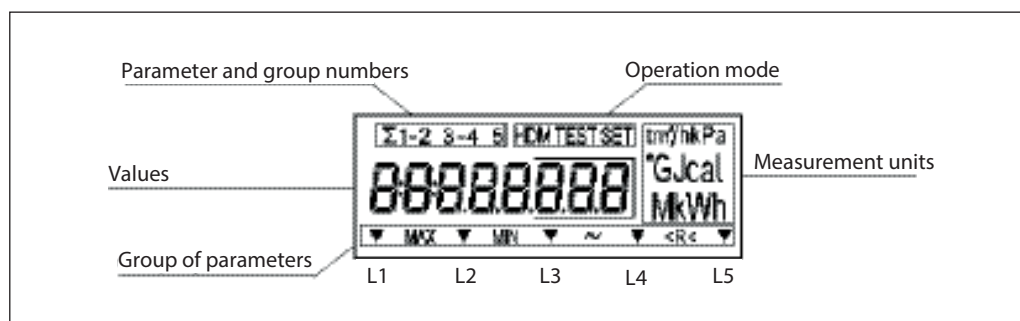

- up to 110 days (3.5 months) – for hourly records
- up to 1461 days (36 latest months) - for daily and monthly records

Power supply

Power supply (one of following depending on meter configuration):

- 1 D-cell battery 3.6 V DC, 19 Ah (ER 34615) lithium battery, life time at least 12 years.
- Mains power supply 230 V AC 50 (+/- 2 Hz)
