ENGINEERING TOMORROW

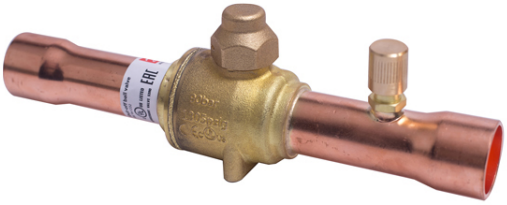
Data Sheet

Shut-off ball valve
Type **GBC, GBCH** and **GBCT**

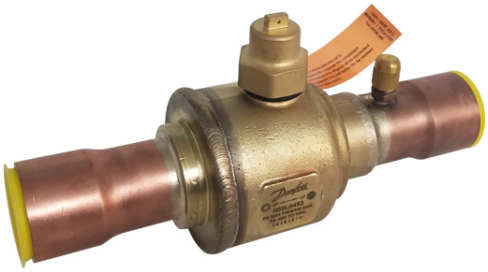
For CO_2 application

GBC

GBCH



GBCT



Danfoss shut-off ball valves, type GBC,GBCH,GBCT are manually operated shut-off valves for CO_2 refrigeration systems, in order to open and to shut off inner flow path by operating the valve spindle.

The valves are specifically designed for intrinsic standstill security, meaning that the valves can withstand pressures normally arising when the refrigeration system is shut off, i.e. during serving or during unexpected power failure.

The valve structure and materials are designed and tested specifically for use with CO_2 refrigerant.

GBC and GBCH valves are designed to use in subcritical CO_2 refrigeration systems. GBCT valves are approved for use in transcritical CO_2 systems.

Features

Features:

- Designed for CO2 systems
- Maximum working pressure:
  1. GBC: 45 bar
  2. GBCH: 90/75 bar
  3. GBCT: 140 bar
- Bleed hole design to prevent liquid entrapment when the valve is closed
- Sealing material especially for CO_2 to ensure long term product reliability
- Customized brass material ensures consistent performance under aggressive environment
- Available of GBCH and GBCT with stainless-steel butt welding connections, suitable for systems with stainless-steel piping
- GBCT with reinforced copper-iron tube extensions to allow easy torch-brazing installation
- UL/cUL Listed, complies with Pressure Equipment Directive 2014/68/ EU

Applications

Typical applications for CO_2 ball valves are:

- Display cases
- Supermarket stores
- Food Retail
- Industrial refrigeration
- Heat pump

Danfoss CO_2 ball valves are designed for the following refrigerant cycles:

- GBC with PS = 45 bar, copper connections equipped, for subcritical systems
- GBCH with PS = 90/75 bar, copper/ stainless steel connections equipped, for subcritical systems
- GBCT with PS = 140 bar, copper (K65) / stainless steel connections equipped, for transcritical systems

Figure 1: Application

	HP High Pressure (120-140 bar)
	HP Receiver Pressure (60-90 bar)
	LP Suction Pressure MT (35-55 bar)
	LP Suction Pressure LT (25-30 bar)

Media

Table 1: Media

Refrigerants	R 744 (CO_2)
Refrigerant oil	POE, PAG (PVE, PAO)

NOTE:

For the application use with R744 as part of a secondary loop or cascade:

1. The design pressure of the refrigerant containing component is not less than the design pressure of the associated components.
2. The component is not provided with any pressure relief or pressure regulating relief valve and that a sufficient number of valves having capacity deemed adequate shall be field installed on the refrigeration system.
3. When the refrigeration system is de-energized, venting of R744 may occur through the pressure regulating relief valves, and may need to be recharged, but the valve should not be defeated or bypassed.
4. A sufficient number of pressure relief and pressure regulating valves may need to be provided based upon system capacity and located such that no stop valve is provided between the relief valve and the parts or section of the system being protected.

Product specification

Technical data

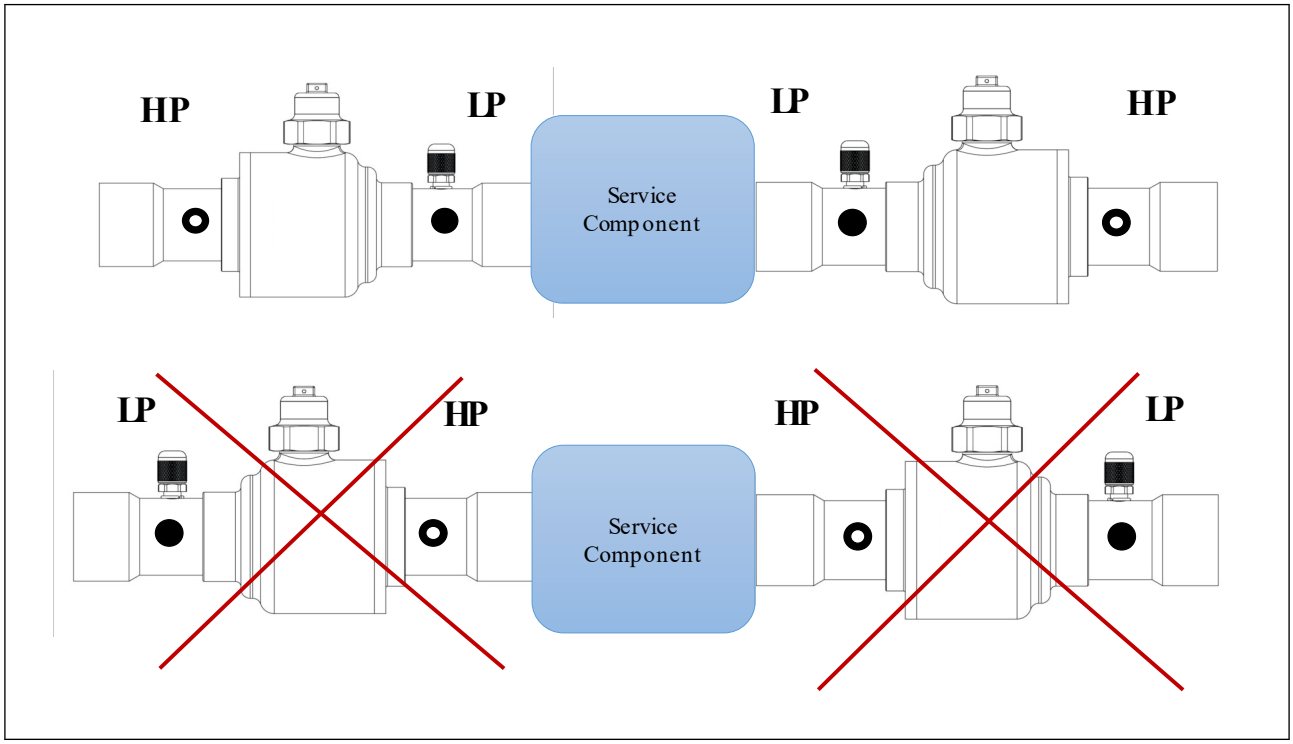
Table 2: Technical data

Technical data	GBC	GBCH	GBCT
Max. working pressure	45 bar / 650 psig	6s - 28s: 90 bar / 1305 psig 35s - 42s: 75 bar / 1085 psig	140 bar / 2031 psig
Media temperature range	-40 °C – 100 °C / -40 °F – 212 °F	-40 °C – 100 °C / -40 °F – 212 °F	-40 °C – 149 °C / -40 °F – 300 °F
Flow direction	Single flow	Bi flow	Bi flow
Environmental transport/storage temperature and humidity	-40 – 65 °C /-40 – 150 °F. Air humidity: RH≤95%.		

CAUTION:

Danfoss recommends that GBCT valves are installed so that the HP side is oriented towards the highest pressure side of the system when the valve is in the closed position. The ball valve will only internally seal in closed position when flow direction is from HP to LP.

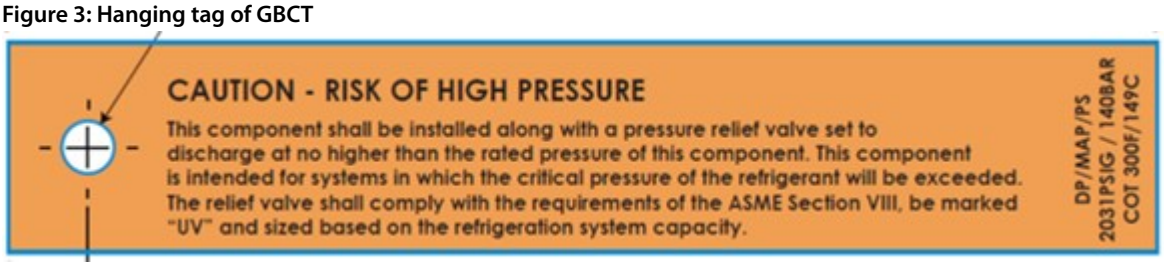
Figure 2: Flow direction for GBCT



GBCT CAUTION - RISK OF HIGH PRESSURE

Do not close with CO2 liquid temperature below ambient. This component shall be installed along with a pressure relief valve set to discharge at no higher than the rated pressure of this component. This component is intended for systems in which the critical pressure of the refrigerant will be exceeded. The relief valve shall comply with the requirements of ASME Section VIII, be marked “UV” and sized based on the refrigeration system capacity. An orange Hanging tag is added on all valves as per requirement of UL certificate.

Figure 3: Hanging tag of GBCT



Identification

Relevant product data is available on the product and box label. An example of a box label and product label are shown, including an explanation of the content.

Figure 4: Box label

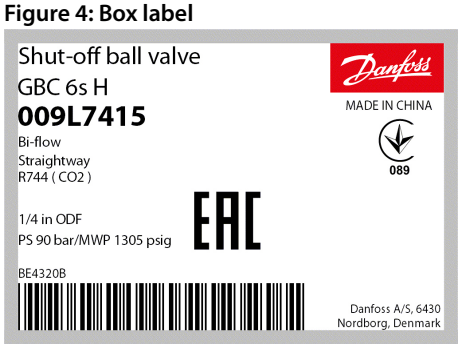


Figure 5: Product label

Table 3: Product and label text

Position	Inscription	Explanation
Box label; Product label	Shut-off ball valve	Product name
Box label	GBC 6s H	Product type
Box label	009L7415	Code number for ordering
Box label	Bi-flow	Flow type
Box label	Straightway	Direction
Box label	R744(CO_2)	Refrigerant
Box label	1/4 in ODF	Connection size and type
Box label	PS 90 bar/MWP 1305 psig	Max. working pressure in bar and psig
Box label	BE4320B	Code for production place and time (BE = Wuqing, week 43, year 2020, weekday B = Tuesday)
Box label; Product label	MADE IN CHINA	Manufacturing site acc. to EN standards
Box label	EAN code	Barcode for individual code no. identification according to EAN standard
Product label	-40 °C – 100 °C	Media temperature range
Box label; Product label	Additional information: Relevant approval authority logos	-

Figure 6: Marking of GBCT

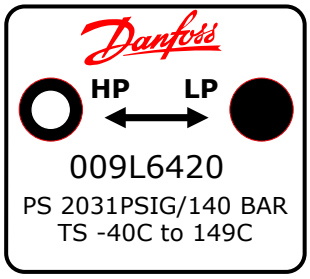

Table 4: Marking of GBCT

Inscription	Explanation
"HP"	Indicates where the bleed hole of ball is located and Danfoss recommends the HP side is oriented towards the highest pressure side of system when valve is in closed position.
"LP"	Indicates the side without bleed hole and shall be oriented towards to the low pressure side of system when valve is in closed position.

Design and materials

Direct flow gives maximum through-flow with minimum pressure drop across valve. The combination of laser-welded valve body (2) and valve tail (4), ball seat/seal (3), double O-ring seal in spindle (6), and cap seal (7) provides the best tightness.

Figure 7: Design and materials

11	Guide ring	PTFE
12	Schrader valve	Stainless steel
13	Bleed hole	-

Dimensions

We have chosen to show dimensions of the major versions.

You will find downloadable dimension drawings for individual code numbers on Danfoss store as part of the Visuals tab for individual code numbers.

Weights also differ depending on the design of the individual code numbers. Weights are available as part of the technical data for individual code numbers on Danfoss store.

Connections

Standard GBC, GBCH, GBCT versions can be provided with straightway, connection types solder ODF or butt weld in a wide variety of connection sizes. Solder ODF versions are with extended ends copper connections, butt weld versions with stainless steel connections.

For details on availability, see Ordering

Ordering

GBC,GBCH,GBCT code numbers described in this data sheet are standard code numbers, i.e. made to stock.

Besides code numbers made to stock GBC,GBCH,GBCT is also made to order. Make to order options include:
- Mechanical connection type
- Mechanical connection size
- Access port size

Multipack contains several items, individually packed, so that customers can purchase 1 item and receive all relevant documentation.

Online support

Danfoss offers a wide range of support along with our products, including digital product information, software, mobile apps, and expert guidance. See the possibilities below.

The Danfoss Product Store

The Danfoss Product Store is your one-stop shop for everything product related—no matter where you are in the world or what area of the cooling industry you work in. Get quick access to essential information like product specs, code numbers, technical documentation, certifications, accessories, and more.
Start browsing at store.danfoss.com.

Find technical documentation

Find the technical documentation you need to get your project up and running. Get direct access to our official collection of data sheets, certificates and declarations, manuals and guides, 3D models and drawings, case stories, brochures, and much more.

Start searching now at www.danfoss.com/en/service-and-support/documentation.

Danfoss Learning

Danfoss Learning is a free online learning platform. It features courses and materials specifically designed to help engineers, installers, service technicians, and wholesalers better understand the products, applications, industry topics, and trends that will help you do your job better.

Create your Danfoss Learning account for free at www.danfoss.com/en/service-and-support/learning.

Get local information and support

Local Danfoss websites are the main sources for help and information about our company and products. Find product availability, get the latest regional news, or connect with a nearby expert—all in your own language.

Find your local Danfoss website here: www.danfoss.com/en/choose-region.
