Installation Guide

Installation of BasicGrip

1   Installation of BasicGrip

Fig. 1: Attach the perimeter insulation with tape on wall.[1]

Fig. 2: Cut off overlaps on both ends of the first BasicGrip panel.

Fig. 3: Lay this BasicGrip panel in the left hand corner of the room.

Fig. 4: Install the studded panels one over the other. Cut wall side overlapping edges off. Cut the last panel to fit.

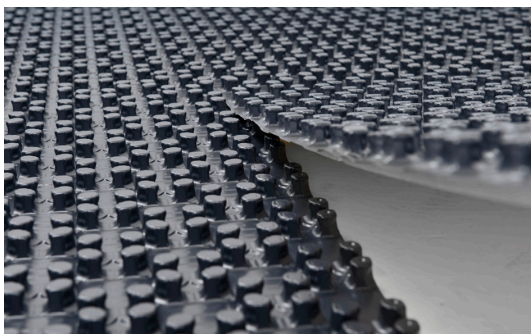

Fig. 5: It is possible to press studs home with feet.

Fig. 6: When using liquid screed, seal off the foil strips of the perimeter insulation with PE-string. On cement screed, the foil is loosely placed on the studded panel.

Fig. 7: The pipes can be laid by one person by using the pipe dispensing wheel.

Fig. 8: Lay pipes in snail form, at first with double spacing in order to maintain the calculated pipe distances.

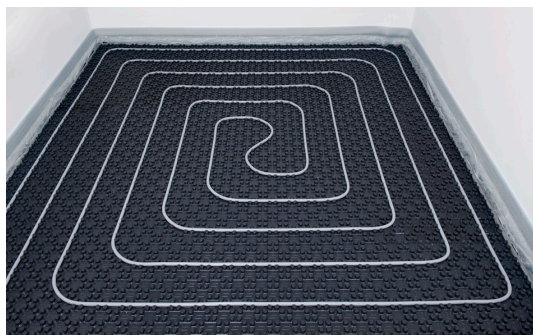

Fig. 9: Lay pipes in snail form throughout the room.

Fig. 10: Install expansion joint profile e.g. for door thresholds, as shown, using the Basic movement gap strip.

[1] If additional insulation is 5 cm thick or more, attach the perimeter insulation on the additional insulation.
