# A+ Software

## Make your vehicle **autonomous** and **get to market faster**

## Essentials or Advanced?

Designed for in-house engineering teams, A+ software is available in Essentials or Advanced. Both consist of preprogrammed and pretested software blocks built into Danfoss' XM100 controller hardware. Each block covers vital areas such as positioning and navigation and eliminates the need to design and develop autonomous software programs from scratch.

Available to PLUS+1® GUIDE users with a professional license, A+ Essentials provides foundational software tools and positioning, navigation, and path planning blocks to get users started on their road to autonomy. A+ Advanced is a paid solution that provides advanced path following software blocks and access to A+ Advanced future features and updates.

### Features

- Positioning, navigation, path planning and utility software blocks
- Essentials is available to PLUS+1® GUIDE users with a professional license

### Benefits

- Speed up development time
- Reduce development costs
- Get to market faster
- Lead your market

### Target applications

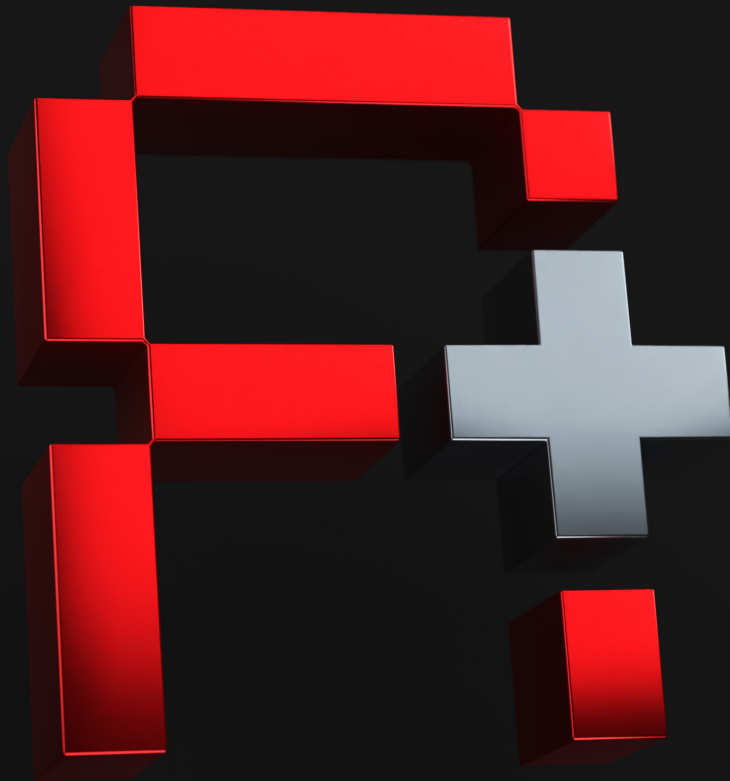

- Speciality agriculture
- Animal husbandry
- Airport ground support

# **Robust** software tools and blocks, **customizable** to your vehicle and application

Precision • Productivity • Safety

Increase your machine's precision, productivity, and safety – and its value, too, using A+ software solutions from Danfoss Autonomy.

Don't have autonomous engineering services in-house? The ACES can help. A dedicated team of autonomous engineering experts, they do the work so you don't have to.
