Fact Sheet

VLT[®] AutomationDrive FC 360 High **performer** in **challenging environments**

Dedicated drive for industrial applications in a compact, energy saving package.

The VLT® AutomationDrive FC 360 is a reliable, energy efficient and userfriendly solution placed in a price/ performance sweet spot, making it a preferred choice for all customers.

Designed to work in harsh and humid environments, the drive provides reliable operation in industries such as textile, plastic & rubber, metal work, material handling, food & beverage, and building materials.

The right mix of features gives you freedom to achieve your system goals The drive enables precise and efficient motor control of a wide range of industrial applications such as extruders, winders, conveyors, drawing benches, texturizing, pumps, and fans.

The efficient cooling concept ensures there is no forced air over the printed circuit board, which improves reliability. Also, a removable fan makes it possible to clean the inside of the drive quickly and easily, thereby reducing the risk of downtime.

FC 360 reduces initial costs and effort with a wide range of built-in features that simplify installation and commissioning, including an EMC filter, built-in brake chopper up to 22 kW, and a user-friendly LCPs

A built-in DC choke reduces harmonics to 40-48% ThiD, significantly extending the lifetime of the DC capacitors. Application selection guides enable users to set up common applications with ease.

Product range 3 x 380-480 V

| High overload 150 | 0% | .0.37-250 | kW |
|-------------------|------|-----------|----|
| Normal overload | 110% | .0.37-315 | kW |

Enclosure ratings

IP20

| Feature | Benefit |
|--|---|
| Reliable | Maximum uptime |
| Maximum ambient temperature 55 °C (up to 40-50 °C without derating in normal opreration) | Reliable operation in many environments |
| Coated PCB | Prepared for harsh environments |
| Unique cooling concept with no forced air flow over electronics | Unequalled robustness – maximum uptime |
| User friendly | Saves commissioning and operating cost |
| Enhanced numeric LCP and graphical LCP | Easy setup |
| Application selection and guidance | Easy commissioning |
| Removable cooling fan | Fast cleaning and extended lifetime |
| Integrated DC choke | Small power cables, less harmonics |
| Built-in EMC filter | Increases reliability and reduces interference with sensitive electronics |
| 24V DC supply option | Guarantee live communication in case power is lost |
| Versatile | Energy saving |
| Automatic Energy Optimizer function | Saves 5-15% energy and reduces operation costs |
| Built-in PID controller | Eliminates external controller |
| Feed-forward PID | Higher stability for workbench |
| Kinetic backup | Controlled ramp down at mains fail can reduce material waste |
| Built-in brake chopper up to 22 kW | Saves panel space and cost (no need to buy external braking chopper) |
| PM motor control for whole power range | High efficiency |
| Torque control | Solution for winder applications |
| Built-in position controller | Saves external position controller |
| Various control mode, v/f,VVC+, Flux Basic | Fit to different applications |

Specifications

| Main supply (L1, L2, L3) | | | | |
|--|--|--|--|--|
| Supply voltage | J1-J7: 380-480 V -15%/+10% | | | |
| | J8-J9: 380-480 V -10%/+10% | | | |
| Supply frequency | 50/60 Hz ±5% | | | |
| Displacement power factor (cos φ) | > 0.98 | | | |
| Switching on input supply L1, L2, L3 | 0.37-7.5 kW maximum 2 times/min. 11-315 kW maximum 1 time/min. | | | |
| Output data (U, V, W) | | | | |
| Output voltage | 0-100% of supply voltage | | | |
| Output frequency | Induction motor: V/F mode: 0-500 Hz VVC+ mode: 0-200 Hz Flux basic mode: 0-200 Hz PM motor: VVC+ mode: 0-400 Hz | | | |
| Switching on output | Flux basic mode: 0-300 Hz Unlimited | | | |
| Ramp times | 0.01-3600 sec | | | |
| Note: 150%/110% current can be provided for 1 minute Higher overload rating is achieved by oversizing | | | | |
| Digital inputs | | | | |
| Programmable digital inputs | 7 | | | |
| Changeable to digital output | 2 (Terminal 27,29) | | | |
| Logic | PNP or NPN | | | |
| Voltage level | 0-24 V DC | | | |
| * 2 can be used as digital outputs | | | | |
| Analog inputs | | | | |
| Analogue inputs | 2 | | | |
| Modes | Voltage or current | | | |
| Voltage level | 0 to +10 V (scaleable) | | | |
| Current level | 0/4 to 20 mA (scaleable) | | | |
| Pulse/encoder inputs | 2/1 | | | |
| Programmable pulse/encoder inputs Voltage level | | | | |
| * Utilize some of the digital inputs | 0-24 V DC (PNP positive logic) | | | |
| Digital outputs | | | | |
| Programmable digital/pulse outputs | 2 | | | |
| Voltage level at digital/frequency output | 0-24 V DC | | | |
| Max. output current (sink or source) | 40 mA | | | |
| * Utilize 2 digital inputs | | | | |
| Analogue output | | | | |
| Programmable analogue outputs | 2 | | | |
| Current range at analogue output | 0/4 – 20 mA | | | |
| Relay output | | | | |
| Programmable relay outputs | 2 | | | |
| Fieldbus communication | | | | |
| Standard built-in | FC Protocol, Modbus RTU | | | |
| Fieldbus built-in control card variants | PROFIBUS or PROFINET | | | |
| CE | | | | |

Dimensions [mm (in)]

| Enclosure size 380-480 V | J1 | J2 | J3 | J4 | J5 | J6 | J7 | 8L | 9L |
|-----------------------------|---------------------|----------------------|--------------|------------------|--------------------|------------------|-------------------|----------------------|----------------------|
| Power size [kW (hp)] | 0.37-2.2 (0.5-3) | 3.0-5.5 (4.0-7.5) | 7.5 (10) | 11-15 (15-20) | 18.5-22 (25-30) | 30-45 (40-60) | 55-90 (75-125) | 110-160 (150-250) | 200-315 (300-450) |
