Danfoss hose reel recycle program

Join us on the path to a **greener** tomorrow

Why **recycle** hose reels?

Danfoss **Reel Green** reel recycle program helps us and our partners reduce our environmental impact. This program will help to significantly reduce the amount of waste that can occur when shipping hydraulic hose, and contribute to a healthier planet. By recycling hydraulic hose reels, you minimize the environmental impact of manufacturing new materials, helping conserve resources and energy. Additionally, participating in the program demonstrates a commitment to corporate social responsibility, and helps foster a sense of environmental consciousness within the community.

In addition to the environmental benefits, there are also cost savings as recycled materials can be repurposed, reducing the need for new resource procurement. Overall, our Danfoss hydraulic hose reel recycle program aligns with our core principles of sustainability, providing both ecological and economic advantages for those who embrace it.

Benefits of the program include:

- Carbon reduction impact
- Resource conservation
- Meeting sustainability goals

Scan the QR code below to get involved.

Danfoss uses around 300,000 hose reels a year.

Recycling these reels could save **96.62 tons of CO2 annually.**
