Euro Cone, Din V 3838, in more valves

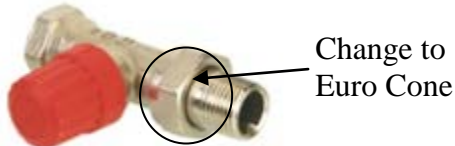

This tech note is a continuation of the tech note 2004.11.03

We are now introducing Euro Cone in more valves. The Euro Cone is described in the German preliminary norm DIN V 3838.

This norm only includes connections with outside threaded pipe G $\frac{3}{4}$ A and inside cone

Modification

The modification in the valve is situated as illustrated below

The advantage with Euro Cone is that fittings for Alu-Pex, Pex and copper pipe from different suppliers can be used on the outlet side of the valve, if these fittings meet the Euro Cone standard.

The change to Euro Cone will not have any negative effect as all fittings that could be used with the valves before can still be used.

Affected products

Sales & ordering	Designation	Valve housing
013G3268	RA 15/6T, wall connection	013G0822
013G3218	RA 15/6T, floor connection	013G0827
003L1000	FHV-R	003L1317
003L1003	FHV-R	003L1317
003L1006	FHV-R, square front	003L1317
003L1015	FHV-R, round front	003L1317
003L1001	FHV-A	003L1318
003L1002	FHV-W	003L1318

013G3226	RA-FN straight	013G0770
013G4201	RA-N angle, external tread	013G4961
013G4202	RA-N straight, external tread	013G4963
013G4203	RA-N UK, external tread	013G4965
013G4204	RA-N right mounted, external tread	013G4967
013G4205	RA-N left mounted, external tread	013G4969

* other order numbers including this valve in different packing are also included

**Delivery**

When the mentioned order numbers are produced now they are with the Euro Cone. However existing stock will be sold first.

The valves with Euro Cone can be identified by the date stamp in the valve; valves with date stamp later than A5 are with Euro Cone.
