

Vickers by Danfoss® HPU Rebate Program (ID#03)

Grow your HPU business, **earn more rebates!**

To assist in profitable growth for our channel partners, Danfoss is offering rebates on our line of Vickers by Danfoss products used on power units. This program is open to all distribution partners in USA, Canada, and Mexico that are eligible for rebates and authorized to sell Vickers by Danfoss products.

How it works

To take advantage of the rebate program, after the sale is made to an end-customer, distributors submit POS Upload Template form. Submissions will be processed monthly. Only Vickers by Danfoss branded products mounted on a hydraulic power unit are eligible for the rebate. (see power unit definition below). All rebate submissions subject to audit to verify eligibility.

For any questions or unique opportunities please contact your Danfoss account manager.

Power unit assembly definition

A power unit is defined as an assembly of hydraulic components including a prime mover. In the event a prime mover is supplied by the customer for final mounting and testing, the power unit assembly shall have provision for mounting the pump to the prime mover.

Examples of power unit assemblies:

- A pump attached to an electric motor.
- A pump attached to an electric motor, mounted on a frame.
- A pump attached to an electric motor, mounted on a reservoir.
- A pump attached to an electric motor, mounted on a reservoir, with other components, such as valves, manifolds, filters, gauges and heat exchangers.
- A valve manifold going into a power unit.

FAQ:

- **If a more competitive price is required to win the business, what is the process for approval?**
Contact your Danfoss account manager for case-by-case consideration.
- **How do I submit for the rebate?**
Distributors should submit the individual part number's actual invoice price in the *Invoice Price* field and "03" in *Program Type* field of the POS Upload Template Form.
- **Where can I find a list of approved part numbers eligible for power unit rebates?**
See back page for list of eligible product groups. A list of eligible products is available for download on the rebate website.
- **Competitive rebate programs, like the power unit rebate, do not allow for sales outside of a distributor's PMA. What is the process for approval?**
Contact your area sales manager who will take action to determine the authorization.
- **Are valves attached to a manifold eligible for the power unit rebate?**
Yes, as long as they are used within a power unit application.
