

# Premium weather protection for ultimate durability

## LONG LIVE LOW MAINTENANCE

Premium weather protection  
for ultimate durability

Upgrade your outdoor refrigeration installations. With Danfoss, you get a wide range of innovative, intuitive control valves with superior protection. Pick between our TLP-treated components with an extra layer of protection and our stainless-steel options with minimum corrosion and maintenance costs.

- Robust solutions with little maintenance and replacements
- All industrial refrigeration valves and valve stations are TLP coated or stainless steel
- Stainless steel valves = lifetime products
- Peace of mind with Danfoss quality performance

### Choose stainless steel for...

- Excellent longevity with minimum corrosion
- Improved facility visibility
- Minimized maintenance cost
- Enhanced mechanical integrity and improved safety

### Choose Thick Layer Passivation (TLP) for...

- Trust Danfoss' 20 years' experience offering TLP coated Industrial Refrigeration valves
- Excellent weather protection
- Sufficiently scratch resistance
- Available in all sizes
- Easy welding procedure to stainless steel pipes
