X-Gate: How to upload ED3/ED4 files

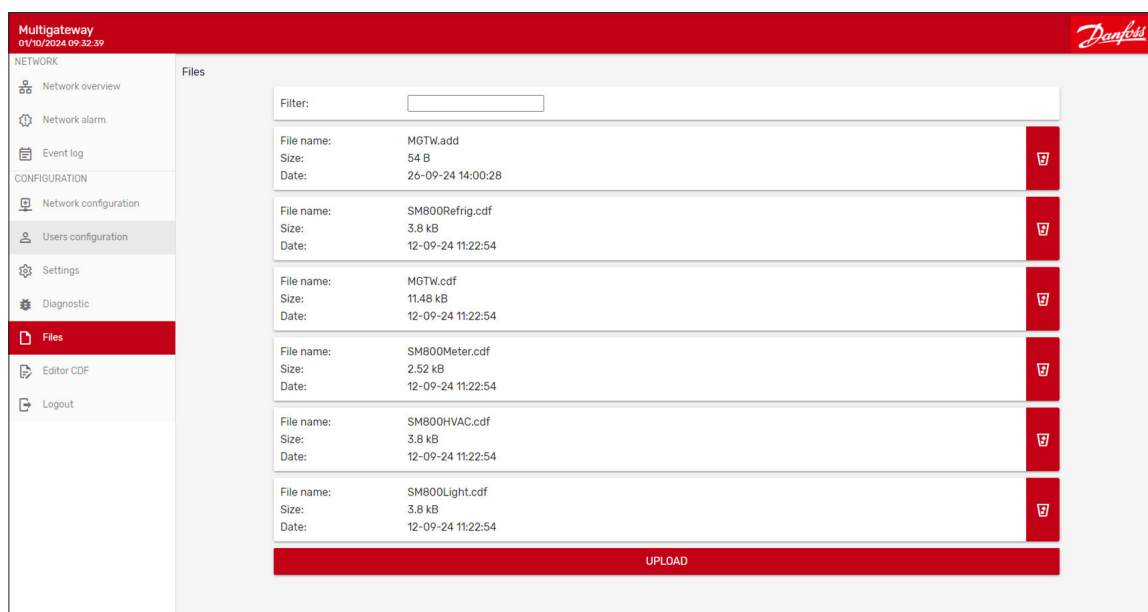

1. Ensure that the X-Gate firmware is version 5.26 or latest. If not, update it using this link: [Danfoss X- Gate Software](#)

The screenshot shows the 'Settings' page of the Multigateway interface. The left sidebar contains a menu with 'Settings' highlighted. The main content area has a 'SAVE' button at the bottom. The settings are organized into sections: NETWORK, CONFIGURATION, and a main Settings section. The Settings section includes fields for Site name, Unit, Date format, Web server port, NTP enabled, Set timezone, and buttons for 'Use current timezone' and 'Use current location'. There is also a section for downloading MIB, ED3/EPK files, and CSV files, and a section for updating the X-GATE version with a 'Choose File' button and a 'Current version' display. Other buttons include 'Open console', 'Get debuglog.zip', and 'RefreshAll devices'. A 'Further Info' section with links for 'License' and 'More licenses' is at the bottom.
