

Parts Manual

Variable Displacement Pump

H1P 89 and 100cc

Revision history

Table of revisions

Date	Changed	Rev
October 2025	Added K1 shaft option	1007
October 2025	Removed obsolete part	1006
July 2025	Part number updates	1005
February 2025	Added SB-2024-007 and SB-2024-001A, updated MDC part numbers, updated HPRV information	1004
May 2024	Updated part number for QD29	1003
January 2024	Updated coil kit number on E8/G6, replaced 327007 with 9005110-4400, removed reference to 9004100-0260, Updated AC part numbers	1002
August 2023	Added new M6 Auxiliary mounting option, updated valve plate numbers, updated displacement limitation common parts number	1001
May 2023	Updated HPRV part numbers options	0902
March 2022	Updated H1 and H2 auxiliary mounting part numbers	0901
August 2021	Added new options; updated automotive controls part numbers	0801
February 2021	Added part numbers to overhaul seal kit	0702
December 2020	Moved pressure limiter screens and retainers from housing kits to pressure limiter kits	0701
May 2020	Changed document number from 'AX00000048' to 'AX152886483309' and corrected CCO part numbers	0607
January 2020	Updated control gasket part numbers	0505
June 2019	Updated part numbers; added new options	0504
February 2019	Added various new options	0503
November 2018	Updated to Engineering Tomorrow	0502

General information

Service parts identification

The following information and procedure is used to identify the module group, item number, manufacture date, part number, and part name of the parts included in the H1P 89 and 100cc.

The parts listed include all parts which may be used when performing either "Minor Repairs", "Major Repairs" or "Conversions" on the .

Nameplate

Each unit will have a nameplate affixed to the housing. The nameplate of the will include the following information:

Model code

The Danfoss model code completely defines the specific unit and must be used when ordering parts to service this product.

Model/material number

The Danfoss model number (also known as material number) is used by the factory in manufacturing. On repeat orders, a complete unit can be ordered by the model number.

Serial number

The Danfoss serial number is used to identify the manufacture date and the unit sequence in the build. The serial number is also used to identify the units warranty time period.

The letter code indicates the location of original manufacture (assembly).

The first number (2 digits) indicates the year of manufacture. The second number (2 digits) indicates the calendar week of manufacture.

The third number (5 digits) is a sequential number used to identify a specific unit.

General information

Date code

The date code is defined as the year and week of manufacture. The same item number may list more than one part number. This indicates that there is more than one configuration for that item number. You will see that there are different date codes for the different part numbers. Find the date code of your unit from the nameplate to determine which service part number you need to order.

Example: The service part desired is item G30

Order Code	Item	Date Begin	Date End	Part Number	Part Name	Qty. per Model/Kit
80	G30	89-17		8000243	End cap gasket	1
	G30		89-16	8000151	End cap gasket (SB-1995-006)	1

All units using this order code with a date code prior to 89-17 must use part number "8000151." All units with a date code of 89-17 and newer must use part number "8000243."

About service bulletins

A Service Bulletin Number (SB-____-____) may follow the "Part Name" of the part you desire. You must read that Service Bulletin prior to ordering that part. The information contained in these Service Bulletins, as of the print date of this bulletin, are included at the end of this manual. Service Bulletins contain more detailed information such as interchangeability, what additional parts are involved, etc. It is suggested that you add additional Service Bulletins to this manual as you receive them.

General information

Procedure to identify a part

The modular design of this product results in a simplified service parts list and part number identification procedure.

The same item numbers are used for same part names on all units within a product type. A part number that has another number following it in parentheses is done to make this a world wide manual. Referring to the Port Configuration in the Order Code on page 8, valid variables are "A" (Inch) and "M" (metric).

Regional part numbers

Some part numbers are region specific and should be ordered accordingly.

As an example, the part number (example: 314583 (9008000-0118)) will be used. The first number is sold in Germany. The number in parentheses is sold in the United States. Customers would order 9008000-0118 if ordering the part in the United States.

Example of a part identification (H1P 89)

The nameplate on an H1 pump has an Order Code of H1P89R A A2 C2 N D8 H G9 H2 L 45 L 45 M P 24 PN NNN NNN. Use the following procedures to determine the part number of the drive shaft used on this pump.

1. Refer to the input shaft module in the [Order code](#) on page 9 and find the shaft option for this pump. The shaft option is identified by the code "G9". (H1P89R A A2 C2 N D8 H **G9** H2 L 45 L 45 M P 24 PN NNN NNN)
2. Refer to the service parts list and find the shaft group and the shaft order code (G9).

The shaft is found to be item J100 and part number 11112180.

General information

Adobe Acrobat 2-page viewing

While viewing manual in Adobe Acrobat, the following settings need to be applied to ensure proper page display.

1. Select "View" → "Page Display" → "Two Page View"
2. Select "View" → "Page Display" → "Show Cover Page in Two Page View"

Warning

This control is for Fan Drive systems only. Use in other systems could result in unintended movement of machine or its elements. Loss of the input signal to this control will cause the pump to produce maximum flow. Contact Danfoss or an authorized distributor with questions regarding the use of this product.

Control, servo piston and housing

Description

As a product improvement, Danfoss made changes to the H1 147 and 165cc pumps. The following parts are affected by this change; control, servo piston, and pump housing.

Control: The old control had five mounting screws and the control pilot supply screen was between the pump housing and the end cap. The new control uses six mounting screws and has the supply screen integrated into the control. The new and old controls are not interchangeable. The old control will be available for a period of time.

Pump housing: The old pump housing was designed to accept the original five screw control. The old pump housing was also machined to have the control pilot supply screen in it. The new pump housing was designed to accept the new six mounting screw control. The supply screen has been moved to the control. Also, the new pump housing was changed slightly to accept the new servo piston assembly. The new and old pump housings are not interchangeable. The old pump housing is no longer available for service.

Servo piston assembly: The servo piston assembly has new spring seats. The new servo piston assembly can be used in the new and old housings. The old servo piston assembly can only be used in the old housings. The old servo piston assembly is obsolete and no longer available for service.

Service kit: A service kit has been created to service the older models requiring a new housing. This kit includes; the new control and screws, new pump housing, new servo piston assembly, and a pump overhaul seal kit.

Models affected

All H1 147 and 165cc pumps

Rubber coated auxiliary flange cover

Description

Danfoss has replaced the H1 pump auxiliary flange cover plate with a new rubber coated plate for all auxiliary flanges. The O-ring or donut style seal is no longer needed. The adapter flange interface to the auxiliary pump did not change, making this an interchangeable change. The new rubber coated cover plate can not be used as a running cover, if an auxiliary pump is not installed. The old cover and seal will need to be used for a running cover.

Models affected

All H1 pumps.

Shaft change

Description

Danfoss has removed the bypass on the end of the shaft on H1 089/100cc pumps. The old shaft allowed unfiltered oil from the pump case into charge pump and the high pressure loop. The bypass feature is now in the end cap. This change is not interchangeable with EPF end caps that have external remote filtration. The old design shafts are obsolete and no longer available.

Control override valve service kit change

Description

Service kits for Control Override Valves (CCO/COR) on H1 pumps have been reconfigured to include a new control option. There has been a connector change to the coil. The new connector is a DEUTSCH key-lock pin style (W2SC). The old solenoid has a wire lead with a standard DEUTSCH connector (W2P).

Old style control (W2P connector)

New style control (W2SC connector)

Each new service kit comes with an adapter cable which has a W2P and a W2SC on each end.

Adapter Cable

New service kit numbers have been issued for the new control option. The old service kits are no longer available. Reference PUB HY2014-175.

Products affected H1 pumps and tandems, MP1 and M46 control kits

Subject Control Gasket

Description Danfoss Power Solutions has made a two-part design change to the control gasket used on H1 pumps and tandems and in MP1 and M46 control kits. The electrical displacement controls (EDC) have changed from an 8mm port to 12mm with tabs on the pressure port. The interim gasket used in the manual displacement controls has changed from a 10mm port to 12mm with tabs in the pressure port.

The gasket is now a common part to all pump models and control service kits. The new part can be substituted for the old part, but the old part cannot be substituted for the new part.

Charge relief valve

Description

A design change has been made to the charge pressure relief valve on all 89/100cc H1 pumps. The charge relief poppet drain hole has been relocated to the side and the adjusting set screw and seal lock nut have changed from M8 to M12 threading.

The charge relief valve cavity in the end caps changed July 1, 2016. As a result, the old charge relief can be used with old or new design end caps. The new charge relief valve can only be used with the new end cap design. Components within the assemblies are not interchangeable.

Shaft and cylinder block kit change

Description

Danfoss has made design changes to the main shaft and the slipper retainer ball guide in the H1 89/100cc pumps cylinder block kit. The internal block splines on the shaft are now machined longer and the slipper retainer ball guide is now splined.

The new shaft may be substituted for the old shaft, but the old shaft cannot be substituted for the new shaft. The old shaft will be obsoleted.

The slipper retainer ball guide design is changed from non-splined to splined due to the new shaft spline design change. The new splined ball guide can be used only with the new shaft design and it is not interchangeable. The old slipper retainer ball guide will be obsoleted.

Standard end cap design and part number changes

Description

This Service Bulletin completes the new part number assignments for the block point change to H1 89/100cc standard end caps communicated in SB-2020-003.

The design change described in SB-2020-003 affects older pump housings, charge pressure relief valves and mounting flanges (see PIB HY2018-350). The new design increases the end cap/mounting flange thickness and requires a longer bolt (130 mm) for SAE-A, SAE-B, and SAE-C mounting flanges. Older pumps with a housing built prior to Week 2 of 2016 will require a 115mm screw when using a new end cap with a NN or SAE-A or SAE-B mounting flange. For information about the SAE-C mounting flange see Service Bulletin [SB-2020-04A](#) on page 173.

It is important to use the proper end cap screw in any repair in order to prevent future service issues.

Part numbers for the end cap service kits did not change. The new and old end caps are not interchangeable due to the charge pressure relief and SAE-C mounting flange. The new end cap will also affect the charge pressure relief valve (see [SB-2017-018](#) on page 166).

SAE-C End Cap design change

Description

Danfoss Power Solutions has made a block point change to H1 89/100cc standard end caps. This change affects older pump housings, charge pressure relief valves and mounting flanges (see PIB HY2018-350). As part of this change, the SAE-C end cap has been changed to a standard end cap with a SAE-C flange adapter. The SAE-C flange is bolted to the standard end cap and requires a longer (130mm) bolt (see SB-2020-003). Older pumps with housings built prior to Week 2 of 2016 will require a 120mm screw when using a new end cap with a SAE-C mounting flange.

It is important to use the proper end cap screw in any repair in order to prevent future service issues.

The integrated SAE-C end caps have been oseteled. The pump model nomenclature will change from Revision A to B (see PIB HY2018-350). This change also includes a charge pressure relief change (see SB-2017-018).

SAE-C end cap design and part number changes

Description

This Service Bulletin completes the new part number assignments for the block point change to H1 89/100cc standard end caps communicated in SB-2020-004.

The design change described in SB-2020-004 affects older pump housings, charge pressure relief valves and mounting flanges (see PIB HY2018-350). As part of this change, the SAE-C end cap has been changed to a standard end cap with a SAE-C flange adapter. The SAE-C flange is bolted to the standard end cap and requires a longer (130mm) bolt (see [SB-2020-03A](#) on page 170). Older pumps with housings built prior to Week 2 of 2016 will require a 120mm screw when using a new end cap with a SAE-C mounting flange.

It is important to use the proper end cap screw in any repair in order to prevent future service issues. The integrated SAE-C end caps have been obsoleted. The pump model nomenclature will change from Revision A to B (see PIB HY2018-350). This change also includes a charge pressure relief change (see [SB-2017-018](#) on page 166).

Subject

Pressure limiter kits

Description

Danfoss has changed to the pressure limiter service kit. The screens from the housing service kit have been moved to the pressure limiter service kit. The housing assembly (QH125) will continue to come with the screens (and retainers depending on the frame size) pre-assembled.

There is no part number change to the pressure limiter service kit or the housing service kits. In case of conversion of such pumps to those with PL-valves the end cap must be removed to install PL screens and retainers. Please refer to the Repair Instructions.

Service bulletin

Generic end cap and housing used to show part location only.

Automotive control plug design change

Service bulletin

Description

Danfoss Power Solutions has made a design change to the Automotive Control (AC) plug on H1 and MP1 products. The new O-ring has an improved seal around the plug to the housing. This affects all automotive control service kits (AC).

The new and old plugs are not interchangeable. Overhaul seal kits will contain both the old and new plugs. Automotive Control (AC) service kit part numbers have been changed because the plug is non-interchangeable. The older service kits have been obsoleted.

Models affected

H1 Pumps

Subject

High pressure relief valves

Description

Danfoss has made a part number and visual change to the high-pressure valve. Visual change is the end of the valve poppet, see pictures below. This change is for 45 to 100cc pumps with the "L" or "F" option for the system relief valve.

Model code with "Lxx" or "Fxx" option (example L30) will use the new style HPRV. New to old style are interchangeable. The O-rings are interchangeable from old to new valves.

Service part number will not change. For service, use the old design and part numbers. New part numbers are for production only at this time.

In case of service, always use the old design.

H1 manual controls

Subject

CCO thread

Description

Danfoss has increased the overall length of the coil and nut by 2mm on the CCO valve assembly. This effect all manual control valves on H1P, H1T and MP1 pumps. Can substitute new solenoid kit for old solenoid kit: CANNOT substitute old service kit for new service kit.

The internal parts are not interchangeable from new to old, or old to new. The old solenoid assembly and their internal parts are obsolete and no longer available as service parts.

Danfoss Power Solutions designs and manufactures a complete range of engineered components and systems. From hydraulics and electrification to fluid conveyance, electronic controls, and software, our solutions are engineered with an uncompromising focus on quality, reliability, and safety.

Our innovative products makes increased productivity and reduced emissions a possibility, but it's our people who turn those possibilities into reality. Leveraging our unsurpassed application know-how, we partner with customers around the world to solve their greatest machine challenges. Our aspiration is to help our customers achieve their vision — and to earn our place as their preferred and trusted partner.
