Danfoss

Coils and Electronics

Application Notes

Robust Coils

Danfoss Robust Coils are specifically designed for harsh, operating environments. Compared to standard coils, they have higher tolerances to temperature extremes, voltage spikes, and water ingress due to power spray, or immersion in water, snow or mud. Typical applications include asphalt machinery, agricultural equipment with chemical and power wash exposure, snow plows and salt-spreader machines.

Benefits of our robust coils:

- **Water Ingression Protection:** Designed to be highly water and chemical resistant. They have passed tests for Salt Fog, Chemical Splash, and Humidity.
 - **Fully Encapsulated Windings:** The coil is designed with a protective layer of encapsulated plastic. A special molding technique prevents moisture build-up while the plastic is applied.
 - **High Input Voltage Tolerance:** Robust coils are rated for an input of 75% to 133% of nominal voltage
 - **Protective Metal Casing:** The metal exterior casing protects against dramatic temperature changes and physical damage to the coil. Robust coils have passed the Drop test, vibration test, and the mechanical shock test.
 - **IP69K with Integral Connectors:** Robust coils with Deutsch, Amp SuperSeal, and Flying Leads are rated for IP69K.
-

ToughCoils™

Danfoss ToughCoils™ have been designed to provide industry leading environmental protection and solenoid performance in a compact and rugged package. ToughCoils™ with integrated connectors are rated up to IP69K environmental protection. ToughCoils™ are available with a variety of popular integrated connection options and with wire leads. The best in class, one-piece, shell encapsulated, design meets the most stringent environmental requirements for mobile and industrial applications.

Benefits of ToughCoils:

- **IP69K Environmental Protection:** This rating provides protection against the ingress of dust and high pressure jet stream. The IP69K test was designed specifically for rating protection against a high-pressure jet stream, high liquid temperature and close nozzle distance from the enclosure surface. IP69K protection is standard on ToughCoils™ with MetriPac1 or Deutsch integrated connectors.
- **“Thermal Shock Dunk” Test:** ToughCoils™ have been qualified to withstand the toughest Mobile Equipment “Thermal Shock Dunk” tests. Integrated Deutsch, MetriPack¹ and Leadwire² connectors exceed “Thermal Shock Dunk” test qualifications at 140°C. The “Thermal Shock Dunk” test requires coils to be heated, reaching a stabilized temperature of 100°C, then immediately immersed in a solution at 0°C. The thermal shock is repeated five times with the coil monitored for dielectric strength in the solution and functional performance is verified. In addition, ToughCoils™ passed a more severe powered dunk test conducted from 100° C to 0° C with 115% rated voltage applied.
- **Steel shell encapsulated design:** ToughCoils™ provide protection against physical and environmental damage.

¹MetriPack® 150 and MetriPack® 280 are registered trademarks of Delphi Packard Electric Systems

²Coils with integrated connectors are recommended for applications in harsh environments.

L	Lead Wires	Two 18 AWG wires, 457 mm [18 in] long
M2	Metri-Pak 150 Type 1 (also conforms to Amp SuperSeal 1.5)	Integral to coil; mating connector is Delphi-Packard Part Number 12052641
N	Deutsch	DT04-2P integrated (DC only), Mating Connector: Deutsch DT06-2S
S	Dual Spade	Two 6.35 mm [0.25 in] wide Type 1B spade terminals per SAE J858A
U	DIN 43650	DIN 43650A / ISO 4400 standard electrical connector
W	Flying Leads	Refer to each coil page for length specifications
Y	Amp Junior	DC only, Mating Connector: AMP 963040-3 or equivalent
Y	MetriPack 150	Male on leads

PLUS+1™ Compliant

Danfoss ICS solenoid valves are PLUS+1™ compliant. PLUS+1 compliance means our coils are directly compatible with the PLUS+1 machine control architecture. Adding solenoid valves to your application using PLUS+1 GUIDE software is as easy as drag-and-drop. Software development that used to take months can now be done in just a few hours. For more information on PLUS+1 GUIDE,

<https://www.danfoss.com/en/products/dps/software/software-and-tools/plus1-software/plus1-guide/>.

The table below details available GUIDE function blocks for controlling Danfoss ICS coils.

DIN Connectors

STANDARD CONNECTORS TO DIN 43650

TYPE A CONNECTOR

Standard connector for use with DC input.
Type A
Order no. R088010080

TYPE C CONNECTOR

Full wave bridge rectifier with 4 diodes and VDR protecting the a.c. side against overvoltage from electrical power supply.
Type C
Order no. R088010060

TYPE E CONNECTOR

With diode blocking overvoltage on opening.
Type E
Order no. R088010410

TYPE K CONNECTOR

Standard connector to Kostal pattern, for use with DC input.
Type K
Order no. R088010350

REMARK

For details of use, see technical data relevant to the individual solenoid valves. All connector are supplied unassembled. Connectors with indicator lights are available on request (Consult factory).
