

Sales Memo

From Danfoss Comfort Controls

Date: 2008-01-04

RTD-BR (By-pass Restrictor):

Product class 223, Statistic number 03982

RTD-BR is used in 1-pipe system with TRV and Backflow Restrictor (RTD-CB). RTD-BR is used to insure enough flow through the radiator. RTD-BR will decrease by-pass with one dimension, and thereby secure enough flow through the radiator if flow pipe, return pipe and by-pass pipe is the same dimension. RTD-BR is made in black steel.

Code no. 013L1915 includes:

- 1 RTD-BR, DN 15/10 (Decreases by-pass from DN15 to DN10)
- 1 instruction

Code no. 013L1916 includes:

- 1 RTD-BR, DN 20/15 (Decreases by-pass from DN20 to DN 15)
- 1 instruction

Delivery

013L1915 and 013L1916 can be ordered now.
