## Spindle extension for FHV-R valves

Fig. 1: Spindle extender for FHV-R valves

This spindle extension can correct an error in the closing measurement on some installed FHV-R valves. The error may be experienced with valves produced until March 2004. The customers will experience the error as a difficulty with adjusting their heating (the valve closes at too high a temperature).

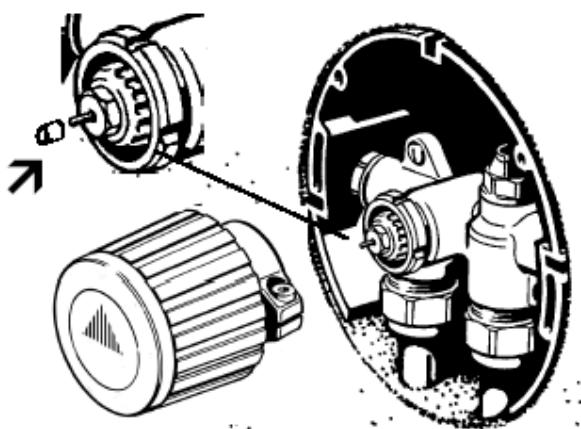

Fig. 2: Instruction in mounting the spindle extension

The spindle extension is meant for FHV-R valves with order numbers 003L1000, 003L1003, 003L1006 and 003L1016.

### Order no.:

003L1017 (10 Pcs spindle extensions)

### Ordering

You can place orders in the SAP system from 8 June 2004.
