

DrivePro® Exchange

Reduce costly downtime with a fast replacement

Does your drive need repair, but you can't afford the downtime to take it out of service?

Then the DrivePro® Exchange service offers exactly the solution you need: the speedy exchange of a failed unit to a new unit of the similar type.

Avoid costly production stop

Count on fast availability of your replacement variable frequency drive and power converter to avoid repair costs and prolonged downtime.

Ensure a seamless exchange and minimize the time your operations run below optimal performance or experience downtime.

With DrivePro® Exchange, you get a replacement of equal/better size, power, performance and software for the best performance match. Rest assured that your VFD and/or power converter is well taken care of and performs optimally from

installation, throughout the use, and after the end of its lifecycle.

Maintain productivity

Maintain uptime with a fast alternative to repair when there is a time critical situation. If an VFD or power converter fails, the DrivePro® Exchange service can quickly exchange it to a new unit of the same type to ensure as little production delay as possible.

Local fit, worldwide

We ensure that the replacement is in full compliance with local regulations. Enjoy worldwide support by Danfoss global service organizations and partner network.

Maintain productivity

DrivePro® Exchange ensures optimal process uptime and productivity during the replacement process, thanks to:

- Optimal selection of replacement drive and power converter size
- Newest software in the replacement
- Fast delivery
- Elimination of repair downtime

Feature	Benefit
Utilize an alternative solution to drive repair when time matters	– Obtain the fastest and most cost-efficient solution when a VFD or power converter fails
24-hour shipping of an exchange VFD or power converter unit after order placement	– Fast delivery of the exchange unit to your site – Prevent excessive downtime on the production line
Ensure the best dimensions match for fast installation	– Avoid production turnover losses due to lost process availability during replacement
Power, performance, and software of the exchange are equal to or better than those of the failed unit	– Ongoing reliability thanks to best performance match

Coverage

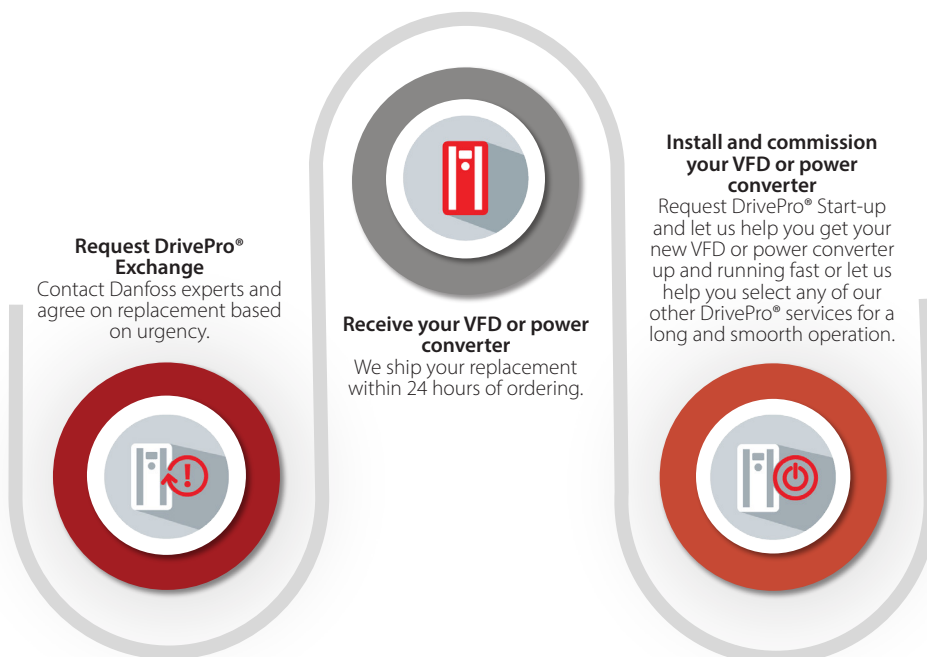

DrivePro® Exchange ensures that you receive an exchange drive equivalent to your defective drive in the power range up to 450 kW 1:1 exchange to new drive.

For exchange of drives in the power range above 450 kW, Danfoss Drives keeps modules in stock for fast delivery. The term 1:1 means that size and performance of the replacement drive match or exceed those of the original drive.

The quality and version of the exchange fulfills one of these criteria

- New exchange delivered direct from factory stock.
- New exchange delivered from local/regional stock with updated hardware and software version.

How it works

How to order

Contact your local sales office to request DrivePro® Exchange. Orders can be placed by email or by telephone.
