

Data sheet

Return temperature limiter type FJVR - sensor and valve body

Application

The return limiter type FJVR automatically controls the return temperature from radiators, convectors and floor heating pipes.

In ventilation systems FJVR ensures a certain minimal circulation in the pipe system up to the heat exchanger.

FJVR is a self-acting P-band regulator, used in 2-pipe systems with pump.

Setting can be limited and locked.

FJVR valve bodies are nickel-plated.

System

Ordering and data

Sensors	Colour	Setting range	Code no.
FJVR Return Temperature Limiter	White RAL 9010	10 - 50 °C	003L1040
	White RAL 9010	10 - 80 °C	003L1070
	Chrome	10 - 50 °C	003L1072

Valve bodies	Connections		$k_{vs}^{2)}$	Max. pressure			Max. water temp.	Code no.
	Inlet	Outlet ¹⁾		Working	Different. ³⁾	Test		
FJVR 10, angle	$R \frac{3}{8}$	$R_p \frac{3}{8}$	0.39	10 bar	1 bar	16 bar	120 °C	003L1009
FJVR 10, straight								003L1010
FJVR 15, angle	$R \frac{1}{2}$	$R_p \frac{1}{2}$	0.68					003L1013
FJVR 15, straight			0.90					003L1014

1) Outlet connection is prepared for Danfoss compression fittings.

2) The k_v -value indicates the water flow (Q) in m³/h at a pressure drop (Δp) across the valve of 1 bar.

3) The max. differential pressure indicates the limit for an optimal valve performance. To ensure quiet operation it is recommended to choose a pump which provides the correct pressure to circulate the required flow of water. In most systems a differential pressure of 0.1-0.3 bar is sufficient. The differential pressure may be reduced by using Danfoss differential pressure controls.

Spare parts

Product	Code no.
Gland seal (10 pcs.)	013G0290

Design

The return temperature limiter includes a thermostatic element type FJVR and a valve body type FJVR 10.

The element and the valve body are ordered separately.

The gland of the system can be exchanged without draining down system.

Materials in contact with water

Valve body and other metal parts	Ms 58
Pressure pin in gland seal	Chrome steel
O-ring	EPDM
Valve cone	NBR

Mounting

FJVR is mounted in the radiator outlet. The valve and sensor can be fitted in any position as long as flow direction is observed.

During construction, the heat can be controlled by turning the slotted screw in the valve cap, prior to fitting the element.

Setting

Required return water temperature can be set by turning the dial.

The scale figure indications appear as in the illustration.
