Design and function
Optical interface

Optical interface is integrated into the front panel of the calculator. It is designed for data reading via M-bus protocol and parameterization of the meter using SonoMeter 30 UserConfig software and optical head OG-1-USB.

The optical interface is activated by pressing the control button and shuts automatically off 5 minutes after the last pressing button or after completing data transmission via interface.

Wired M-Bus interface

The energy meter has 1 slot for an additional communication module. The internal M-Bus module provides data reading possibility via M-Bus protocol:

- M-Bus protocol according to EN13757-3 standard
- 2-wire with polarity reversal protection
- Electrical isolation
- Maximum voltage 50 V DC
- Current drawn: one M-Bus load (1.5 mA)
- Primary or secondary addressing
- Baud rate 2400 bps
- Battery lifetime min. 11 years (2 AA cell)
- Battery supply communication is limited on every 15 min at 2400 baud rate or faster, 70 meters on bus
- Fastest reading interval at mains supply: no limits

Radio OMS 868.95 MHz interface

- The module can provide data reading via radio module:
- Wireless M-Bus protocol according to EN13757-4
- OMS (open metering system) compatible, compliant to OMS 4.0.2
- T1 mode (unidirectional)
- Sending interval every 90 seconds (suitable for 'walk by' readings)
