

living design® radiator thermostats

The only design thermostat for customers with style

living design® is a self-acting radiator thermostat variant, based on the proven and high-quality Danfoss thermostats. Its elegant and timeless design looks good anywhere, while operating at maximum efficiency – two things customers truly appreciate.

living design® fits all conventional valve types and comes in a choice of stylish colors.

4 colors

for modern interiors:
white, chrome, inox
and black.

living design®

The thermostat you know
shaped for modern interiors

The *living design*® room temperature sensor looks great in any environment while maintaining the perfect temperature with precision.

Design

As the name implies, aesthetics are important. Coming in a variety of colors – white, chrome, inox and black – *living design*® complements *living eco*® and *living connect*® thermostats for a uniform design throughout the house.

Looks great, suitable everywhere

living design® is suitable for all radiators – including towel rails and designer units – even those with unusual surfaces. The *living design*® RAX-K version works with most valves from other manufacturers. Its smooth surface is also easy to disinfect, which is especially important in environments where hygiene is paramount.

The perfect temperature – in perfect style

living design® is a traditional, self-acting radiator thermostat with a contemporary design. It looks good in every room, while operating at maximum efficiency.

Product features

- Design sensor
- Self-acting sensor
- Liquid-filled sensor
- Built-in sensor
- Frost protection
- Positive shut-off function "0"

Product names
