

MK18 Range

## Time controls for heating and hot water with optional service interval

- 24 Hours, 5/2 Day or 7-Day Programming
- Built-in Programmes
- Factory Set Clock
- Automatic Summer/Winter Time Change
- Holiday Function
- Optional Service Interval Timer

## 80+ years of innovation

Innovating since 1933,  
Danfoss is a name you  
can trust to bring you  
the best in modern  
controls technology.

# Time Controls with Service Interval

## MK18 - FP715Si, CP715Si and TS715Si

*For use in any domestic heating and hot water function the MK18 range has a model for any situation, offering unrivalled flexibility of control.*

The MK18 range offers flexibility and reliability, with an elegant look and some handy features. All models have a slim, modern enclosure and a large LCD with a convenient back light.

Employing the latest technology, these versatile heating time controls are reliable and easy to use. They are the installer's first choice due to their ready interchangeability with most other existing controls.

All models have real time and date set in the factory and automatically display the correct time when powered up. The time and date information is used to automatically change between summer and winter time on the right day each year without user intervention, substantially reducing the number of call backs.

All products also incorporate an optional installer set service interval timer for use in tenanted properties where the landlord is responsible for gas safety. This feature allows the service due date to be set and starts to remind the user 28 days before the due date.

Each model can be configured by the installer at time of installation to provide 7 day, 24 hour or 5 day/2 day operation. All models can also be configured to provide either 2 ON/OFF's or 3 ON/OFF's per day.

### Wiring Details

FP715 Si and CP715Si

TS715 Si

TS715Si

CP715Si

FP715Si

- Service interval function
- 7 day, 5/2 day or 24 hour
- Permanent back lit display
- AM/PM or 24 hour display
- Built-in programmes
- Automatic BST/GMT time change
- Convenient user overrides
- Holiday function
- 'Industry standard' wallplate
- Factory set clock
