Meet the TPOne

Introducing the TPOne

Intelligent controls made easy

ENGINEERING
TOMORROW

Danfoss

With our new **TPOne programmable room thermostat**, Danfoss has made intelligent heating control easier than ever before. Packed with practical and easy-to-use innovations, TPOne has been designed to suit almost any domestic heating control application. Easy to install and beautifully simple to live with, TPOne elegantly combines all the functionality of our existing TP models into one stylish unit.

Product highlights

- Homeowners can easily access comfort modes or change settings
- Intuitive user interface with clear icons
- Fast installation with familiar wiring
- Quick-start setup wizard and separate installer menu with lock
- Versatile and simple 7-day programming
- Standby with Frost Protect
- Chrono-proportional control offering energy saving benefits
- Boiler service timer and optional external sensor input
- Selectable domestic hot water channel (TPOne-M only)
- Standard, delayed or optimised start-up
- Available in battery, wired or wireless versions

Easy-to-read display

Large display with simple icons to show each function.

Quick-start setup wizard
