ENGINEERING TOMORROW

Danfoss Optyma™ condensing units for Europe

Match your application needs – every time

With the Danfoss Optyma™ outdoor and indoor condensing units for Europe, with MBP and LBP refrigeration, there is a solution for your exact application needs. Featuring multiple lower-GWP refrigerants, high energy performance ratios and trouble-free installation, they help reduce running costs and increase cooling quality for the safer protection of perishables.

Make the optimal choice from our extensive range of outdoor and indoor condensing units.

Optimal Efficiency

for high cooling quality while reducing system's life-cycle costs and downtime

cr.danfoss.com | EcoDesign | Optyma™ by Danfoss

Danfoss Optyma™
packaged/outdoor condensing units

Highly efficient and reliable plug and play condensing units designed with the contractor and end-user in mind, and providing unique benefits.

Benefits for the contractor

- Simple and fast selection and installation, reduced maintenance time
- Models compatible with multiple lower GWP refrigerants
- Reduced refrigerant costs thanks to microchannel condenser inside

Benefits for the end-user

- Increased food safety and longer products shelf life
- Units suitable for residential areas thanks to low sound level operation
- Reduced life cycle costs of refrigeration equipment thanks to highly efficient units

Optyma™ **Slim Pack W05**

Compact and cost effective. When space, quiet operation, efficiency and simple installation matter.
With microchannel condenser

Page 7

Optyma™ **Plus P00/P02**

Top performer. When quietness, high efficiency, connectivity and fastest installation and maintenance matter.

P00 version:
With electronic controller

P02 version:
P00 base + liquid injection with electronic expansion valve

Page 12

Optyma™ **Plus INVERTER**

Premium unit. When top efficiency, fastest installation and maintenance, tight temperature and humidity control matter.
With variable speed drive

Page 16

MBP and LBP **applications**

- Cold rooms, display cabinets in convenience stores, mini-markets, restaurants, fisheries, butcheries, bakeries, florists, laboratories
- Wine cellars
- Milk cooling
- Industrial processes
- Dairy and general food storage

Danfoss Optyma™
bare/indoor condensing units

Robust, efficient and reliable condensing units, saving on service and maintenance costs and reducing energy consumption.

Benefits for the contractor

- Broad working envelope
- Multi lower-GWP refrigerants
- Larger units with microchannel condenser reducing the refrigerant charge and smaller units with fine & tube condenser
- Likely the most reliable hermetic reciprocating compressor on the market
- Economical GBP/kW value

Benefits for the end-user

- Reliable solution
- Low energy consumption under changing working conditions
- Easy & simple condenser maintenance

Optyma™, **Light Commercial**
up to ~1.5 kW

Complete line featuring a higher efficiency and a reduced footprint, also available with R290, making it the perfect choice for a greener installation. This solution is ideal for OEMs or end-users looking for compact products to fit in small systems, and optimal cooling performance and capacity.

Page 18

Optyma™, **Commercial**
from ~1.5 kW and up

Highly efficient new line with microchannel condenser, multiple lower-GWP refrigerants, and working up to 46°C. Easy to install and service. Quieter by up to 3 dB(A) thanks to 6-pole fan motor instead of 4-pole fan.

Page 21

MBP and LBP **applications**

- Industrial processes
- Milk cooling
- Cold rooms in fisheries, florists, etc.
- Commercial fridge and freezers, display cases, bottle coolers, serving tables

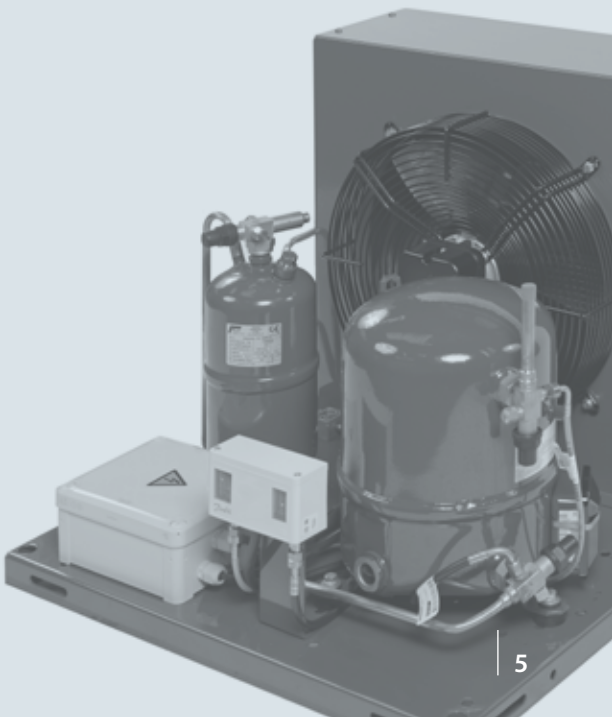
8 **Electrical code:**
A: Compressor 230V/1P/50-60Hz, fan 230V/1P/50-60Hz
G: Compressor 230V/1P/50Hz, fan 230V/1P/50Hz
E: Compressor 400V/3P/50Hz, fan 230V/1P/50Hz



Reduce direct and indirect **emissions**

By choosing lower GWP refrigerants and highly efficient condensing units, installers make the choice of creating a sustainable cooling industry. See the regulations impacting the condensing units in Europe and make the right choice with Danfoss solutions.

F-Gas affected applications and timeline

The F-Gas regulation puts in place HFC phase down on high GWP (Global Warming Potential) refrigerants.

2020

Movable room A/C, hermetically sealed with GWP ≥150

Stationary refrigeration equipment for temperatures above -50°C with GWP ≥ 2500

Commercial refrigerators and freezers, hermetically sealed with GWP ≥ 2500

Servicing equipment using new refrigerants with GWP ≥ 2500 for temperatures ≥ -50°C and change ≥ 40 tonnes CO_2 eq. Except for military equipment

2022

Commercial refrigerators and freezers, hermetically sealed with GWP ≥150

Multipack centralised refrigeration systems for commercial use with a capacity ≥40 kW, GWP ≥150 and ≥1500 for primary circulation of cascades

2025

Single split A/C systems containing less than 3 kg of HFC with GWP ≥750

2030

Servicing equipment using refrigerants with GWP ≥2500 for temperatures ≥ -50°C and charge ≥40 tonnes CO_2 eq. Except for military equipment

EcoDesign affected applications

From the 1st July 2018, only condensing units that achieve certain energy performance ratings can get the CE marking and be sold in the EU territories.

ENTR Lot 1 **2015/1095 and 2015/1094** for Professional Refrigeration:

IMPACTED APPLICATIONS

- Condensing units
- Professional refrigerated storage cabinets
- Blast cabinets
- Process chillers

SEASONAL ENERGY PERFORMANCE RATIO (SEPR)

SEPR value for:

- Low temperatures: above 2 kW
- Medium temperatures: above 5 kW
- Below these limits: COP

Minimum Energy Performance Standards for condensing units

Medium temperatures (-10°C) / kW*	0.2-1	1-5	5-20	20-50
COP	1.4	1.6		
SEPR**			2.55	2.65

Low temperatures (-35°C) / kW*	0.1-0.4	0.4-2	2-8	8-20
COP	0.8	0.95		
SEPR**			1.6	1.7

* Rated capacity at full load with ambient temperature set at 32°C (Standards: EN13215 and 13771-2).

** The Seasonal Energy Performance Ratio provides cooling performances at standard rating conditions. It is representative of the variations in load and ambient temperatures throughout the year, and calculated as the ratio between annual cooling demand and annual electricity consumption (Standards: EN13215 and 13771-2 and EcoDesign Directive 2009/125/EC).

Optyma™ Slim Pack
Light on **refrigerant, heavy on efficiency**

2.9 kg
Less refrigerant on bigger sizes for more savings

Get it all with Optyma™ **Slim Pack**. It combines quiet operation and more value for money with an energy-efficient and compact solution.

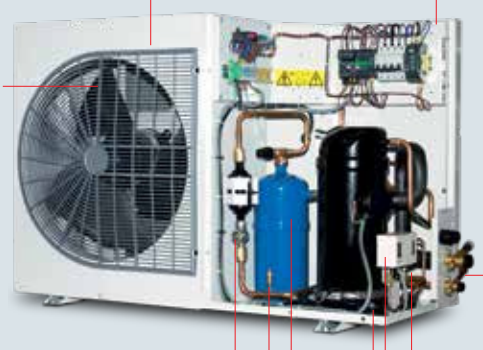
Quick and safe installation and service
Enjoy fast and easy installation with the main switch, service valves, and quick connections. Additionally, the easy-to-clean Microchannel condenser saves you time and effort on servicing.

High SEPR
All models in the range are highly efficient and well above EcoDesign 2018 thresholds, contributing to a reduction in energy costs.

Suitable for residential areas
It operates up to 7 dB(A) lower than other packaged units of the same capacity and the fan-speed controller further reduces the sound level by up to 4 dB(A).

Optimized footprint for floor and wall mounting
Thanks to its slim design and low weight, it is easy to transport and handle during installation – particularly for wall mounting.

Standard range **(W05)**



High SEPR/COP **cuts energy costs**

E.g. in a cold room where fruit & vegetables are stored and with 2.7 kW of cooling capacity.

Optyma™ Slim Pack MBP unit vs equivalent unit in the market*

Cooling cap.: 2.7 kW
Refrigerant: R134a

?

UNIT	Danfoss	Market
COP	2.18	1.70
USAGE	~ 8 245 kWh	~ 10 636 kWh

Annual energy consumption saved: 2 391 kWh

Savings based on cost of energy in the UK:

£0.13 / 1 KWH = 2 391 x 0.13 = £311

£311 annual electricity savings made by your customer in the UK

* Source: Danfoss

Did you know?

From 1st January 2020, R404A is banned in new installations in Europe. Only recycled refrigerant is allowed for servicing.

Conditions EN 13215 (dew point): +32°C ambient temp., superheat 10K, subcooling 0K
Rated COP, SEPR & annual electricity consumption at EcoDesign rating conditions: +32°C ambient, subcooling 0 K, RGT20°C
Values refer to 3-phase units

Optyma™ Plus
Equipped for **quietness** and **top performance**

The same robust quality with added technology and smarter design. That's a seriously cool combination.

50%
less installation time. A fast fit that lets you keep up the tempo

Quick and safe installation and service
It is another step forward in plug and play. It will not just save you valuable time in installation, set up and service, it will also reduce your customers' bill.

High SEPR
All models in the range are highly efficient and well above EcoDesign 2018 thresholds, contributing to a reduction in energy costs.

The best sound performance in the market
Due to its long-life compressor, acoustic insulation, component design as well as intelligent fan speed reduction during low capacity operation.

Connectivity
Contributes to considerable energy savings, making the Optyma™ **Plus** up to 20% more economical than an equivalent product.

High efficiency to the top

In-field stacking cuts costs
With its unique load-bearing design, it's possible to stack units in the field. This cuts installation time, and saves on carpentry and brackets to reduce cost.

Compact cabinet speeds installation
New compact design makes it easier to handle when fitting in tight spaces, saving installation time.

Accessibility to speed up service
Easier and quicker accessibility to all components with new double door design – saves time during servicing, maintenance and repair.

Intelligent technology speeds start-up and enhances reliability
Preset parameters make it easier to get it right from the start. Fewer mistakes reduce the risk of damage and save time and money on repairs.

High SEPR/COP **cuts energy costs**

E.g. in a cold room where frozen food is stored and with 4.2 kW of cooling capacity.

Optyma™ Plus LBP unit vs equivalent unit in the market*

Cooling cap.: 4.2 kW
Refrigerant: R452A

?

UNIT	Danfoss	Market
COP	1.08	0.97
USAGE	~ 25 820 kWh	~ 30 012 kWh

Annual energy consumption saved: 4 192 kWh

Savings based on cost of energy in the UK:

£ 0.13 / 1 KWH = 4 192 x 0.13 = £545

£545 annual electricity savings made by your customer in the UK

* Source: Danfoss

Optyma™ Plus with liquid injection
Inject a little **simplicity and reliability** into your installations

The introduction of electronic liquid injection technology on LBP models enables precise temperature control of the application with an extended operating envelope..

Avoid system breakdown at hot ambient temperatures

The electronic liquid injection helps manage higher discharge temperatures, maintaining best-in-class operating conditions at up to 43°C ambient temperature.

Streamline the refrigerant bottles

Choose one sustainable and economic refrigerant for positive and negative application temperatures:
R448A or R449A.

Reliable over time

The electronic management ensures that the right quantity of liquid is injected into the compressor and increases the system's reliability.

Simple and pre-set safe modulation

The electronic module is pre-programmed to protect the compressor against high discharge temperatures - increasing the system's lifespan.

Refrigerants with a GWP level below 2500

Optyma™ Plus INVERTER
Capacity modulation in a simple and **adaptive** package

Combines our market-leading expertise in condensing unit design with the unique benefits of stepless inverter scroll technology. The result is energy consumption reduced by up to 30% with better food preservation.

Best SEPR with stepless modulation reduces energy consumption by up to

30%

Quick and safe installation and service

Preset parameters and Modbus communication makes start-up and maintenance of the condensing unit effortlessly quick and easy.

High SEPR: 3.84 – certified by ASERCOM

All models in the range are highly efficient and well above EcoDesign 2018 thresholds, contributing to a reduction in energy costs.

Accurate temperature control

Accurate temperature control and low in-rush current result in a more stable storage temperature and longer product shelf life.

Extended capacity

Stepless compressor modulation - able to slow down and speed up from 30 to 100 RPS to save energy and match load fluctuations very accurately. The inverter drive incorporates smart logic to increase reliability during operation.

Designed for **ultimate efficiency**

Stepless capacity modulation
From 30 to 100 rps modulation leads to 20-30% higher energy efficiency compared to fixed-speed condensing units.

Simple commissioning
Preset drive parameters with dedicated refrigeration software.

Future-proof
Working with lower GWP refrigerants such as R448A and R449. Also compatible with R407A/F and R404A.

Danfoss compressor and drive package
Dedicated to refrigeration with years of market application and validation.

Full intelligent control through the Optyma™ **Plus Controller**
Control, alarm management, day & night operation, can connect to ADAP-KOOL® software, etc.

Simple plug-and-play installation
Safe, simple and hassle-free installation with tried-and-tested components.

High SEPR/COP **cuts energy costs**

E.g. in a cold room where meat is stored and with 9 kW of cooling capacity.

Optyma™ Plus INVERTER MBP unit vs mechanically modulated technology*

Cooling cap.: 9 kW
Refrigerant: R407F

?

UNIT	Danfoss	Market
SEPR	3.84	2.50
USAGE	~ 14 000 kWh	~ 21 600 kWh

Annual energy consumption saved: 7 600 kWh

Savings based on cost of energy in the UK:

£0.13 / 1 KWH = 7 600 x 0.13 = £988

£ 988 annual electricity savings made by your customer in the UK

About **Variable Speed** technology

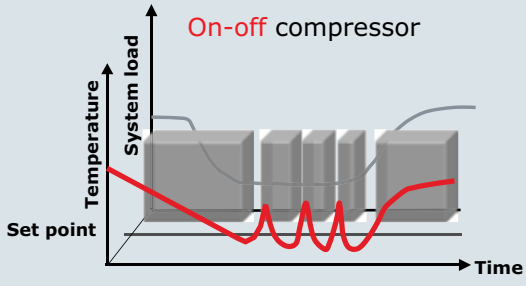
Refrigeration systems are usually designed for peak demand, which represents only a small percentage of actual operational time. Such oversizing leads to efficiency losses and extra costs for oversized equipment. Capacity modulation is a way to match cooling capacity to cooling demand.

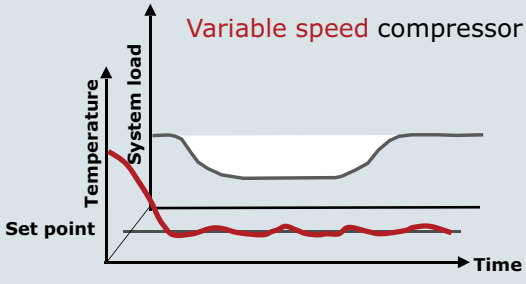
There are several ways to modulate the cooling capacity in refrigeration systems. The most commonly used are on-off cycling, hot gas bypass, manifold configurations of multiple compressors, mechanical modulation and variable speed technology.

The variable speed method varies refrigerant flow by actually changing the speed of the compressor. An inverter compressor uses a variable frequency drive – also known as an inverter drive– to slow down or speed up the motor that drives the compressor. This is where inverter compressors bring most savings compared to alternative technologies.

Currently, three different market trends are converging to create growing demand for efficient and sustainable solutions:

- Application requirements (accurate temperature and humidity levels)
- Energy efficiency & environmental impact
- Intelligent systems and reliability





Optyma™, Light Commercial – up to ~1.5 kW

Specially designed for key commercial applications such as glass door merchandisers, bottle coolers, chilled food or ice cream cabinets. To meet the latest guidelines while satisfying tomorrow's consumer needs, Danfoss compressors use the environmentally friendly R290 propane as a refrigerant.

Faster and safer installation and maintenance

Schrader valve for easy charging of refrigerant, pre-wired e-box, ACB mini pressostat and ATEX class N fan motor for enhanced safety.

R290 natural refrigerant

The major environmental benefits are obtained combining the use of the R290 with the design criteria of highly efficient compressors and EC fan motor.

Serviceability and compactness

Combo of drier and receiver in one piece, making it the ideal fit for compact systems and providing higher serviceability.

Universal

Most units are designed with rail concept, allowing easy condensed water evacuation, high airflow, and reduced height to fit display cabinets. Suited for high ambient temperatures thanks to EC fan ATEX class N.

R290 unit

Energy efficient, environmentally friendly and safe hydrocarbons

Hydrocarbons such as propane R290 have excellent thermodynamic properties, and in this respect they are as good as or better than HFC or HCFC refrigerants in most applications. When they are used responsibly and relevant norms are followed, hydrocarbons can be employed in a variety of refrigeration and air conditioning applications. Hydrocarbons can deliver high energy efficiency and have zero Ozone Depletion Potential (ODP) and negligible Global Warming Potential (GWP).

Relevant norms & standards when working with hydrocarbon refrigerants:

ATEX 94/9/EC Directive
Specifies the requirements for equipment intended for use in potentially explosive atmospheres (both electrical and mechanical). Organizations in EU must follow the directive to protect employees from explosion risk in areas with an explosive atmosphere.

Pressure Equipment Directive 97/23/EC (PED)
The directive provides a legislative framework for pressurized equipment and assemblies.

EN378 1-4
EN378 defines "best practice" for design, operation and maintenance. It is a harmonised standard, which ensures that all essential requirements in the PED are fulfilled.

ISO 5149 1-4
The international safety standard defines "best practices" very similarly to EN378, but without referring to EU law.

IEC 60335: International Standard
Specifies all requirements for small hermetically sealed household appliances (supports the EU Low Voltage Directive (2006/95/EC). It deals with the safety of electrical appliances for household and similar purposes.

Optyma™, Light Commercial – up to ~1.5 kW

Refrigerants with a GWP level below 2500

ENGINEERING
TOMORROW

Danfoss is with you **all the way**

Danfoss has a global market presence selling in **over 100 countries** and with factories, Application Development Centers (ADC) and laboratories all over the globe*.

This global footprint ensures the highest level of **customer service and application expertise** with local technical support near you- speaking your language, and understanding your everyday needs and challenges. Backed by a wide distribution network trained to select, specify and sell our products, it's the guarantee that we are by your side, all the way.

For **24/7 support**, we have developed intuitive tools and apps to help you to make the right product selection, choose an alternative refrigerant, troubleshoot your installation or be trained to use natural refrigerants or the latest Danfoss products.

Learn more. Achieve more.
