C62L-C Condenser
For increased chiller profits

Innovative | Optimised | Low hold-up volume | High heat transfer | Compact

20% reduction refrigerant charge compared to traditional BPHE. This new evaporator is the ideal solution to help you meet the world’s climate and energy aspirations.

Save $45 per heat exchanger on refrigerant because the C62L-C’s low hold-up volume.

C62L-C
Micro Plate Heat Exchanger

**INTRODUCTION**
The C62L-C is a condenser optimised for R410A for use in high-efficiency chillers with capacities of 20-90 kW/5-25 Ft. The heat exchanger features innovative Micro Plate technology that improves heat transfer and reduces the amount of material used.
To meet demands for higher seasonal efficiency, the C62L-C is designed to work efficiently and increase comfort in modern buildings without increasing the carbon footprint. Helping chillers perform more efficiently, it reduces both energy costs and environmental impact.
The low hold-up volume reduces the system refrigerant charge and offers valuable savings.

**KEY FEATURES**
- Minimal hold-up volume: Less refrigerant charge.
- Reduced pressure drop: For more efficient chillers.
- Smaller footprint: Enabling more compact chillers.
- Reduced CO₂ footprint: Environmentally friendly with high heat transfer and minimal refrigerant charge.

**TECHNICAL DATA**

**STANDARD MATERIALS**
- Cover plates: AISI 304
- Connections: AISI 304
- Plates: AISI 316
- Brazing filler: Pure copper

**STANDARD CONNECTIONS**
- Q3 (Refrigerant outlet): soldering 3/8", 1/2", 5/8" or 3/4"
- Q4 (Refrigerant inlet): soldering 1/2", 3/4", 7/8", 1 1/8" or 1 3/8"
- Q1-Q2 (Water side): External threaded 1 1/4"

**THIRD PART APPROVALS**
- Europe: Pressure Equipment Directive (PED).
- America: Underwriters Laboratory Inc (UL).

**ACCESSIBILITY**
We will help you set up a logistics solution that will meet your needs.

**CORRESPONDING EVAPORATORS**
A corresponding Micro Plate heat exchanger for evaporator duties (C62L-E) is also available.
