The new Danfoss system provides decision control and system management across the industry to ensure food safety and to save energy for store owners around the world.

**SUSTAINABLE STORES**

1. **SUSTAINABLE STORES**

   1. **COOL THINKING**
   
   Introducing the new Danfoss system AK-SM 800 series & AK-EM 800

   In 1983, Danfoss was at the leading edge when it launched the ADAP-KOOL® solution. The system set new standards for control of cooling processes in supermarkets.

   Today, more than 50,000 Danfoss ADAP-KOOL® systems are installed globally.

   Go to coolthinking.danfoss.com for more information on the next generation system by Danfoss.

   Danfoss can accept no responsibility for possible errors in catalogues, brochures and other printed material. Danfoss reserves the right to alter its products without notice. This also applies to products already on order provided that such alterations can be made without subsequential changes being necessary in specifications already agreed.

Danfoss has spent four years and 200,000 manhours bringing together the world’s top industry experts to develop the next generation refrigeration system, name it "cool thinking".

• World-class R&D experts on refrigeration control and management, who have created the most sophisticated control algorithms in the industry, protected by Danfoss intellectual property and industry-leading patents.
• Applications experts, who possess knowledge on how to efficiently apply refrigeration technology and how to make the system components work best in stores across the globe.
• System experts, including hardware and software engineers, from Danfoss R&D Centers of Excellence in China, India, the U.S., and Europe.

The new system, including the system manager AK-SM 800 series and the enterprise manager AK-EM 800 series, provides the best control and management solution with the following benefits:

• Easy set-up and commissioning
• Remote access to system data
• Improved system performance

To meet the next generation refrigeration system by Danfoss, we call it "cool thinking".
