PLUS+1[®] Extended Memory Controller MC050-028

Mobile Machine Management

The MC050-028 Extended Memory Controller is an element of the flexible, powerful, expandable, and affordable PLUS+1 family of mobile machine management products. This device is a general-purpose controller that is equally suited for use as a member of a distributed machine control system, with intelligence in every node, or as a stand-alone controller.

Product Highlights

The MC050-028 Extended Memory Controller is pin compatible with the PLUS+1 MC050-020 Controller. It employs a Digital Signal Processor (DSP), providing the controller with extremely fast single cycle processing speed and 256K internal flash. Extended Memory features include support of unlimited read-write FRAM, 2 MB flash vault memory and an application key that enables the use of Danfoss developed GUIDE machine control solutions.

Application Development

Users develop MC050-028 applications with PLUS+1 GUIDE. This Microsoft[®] Windows[®] based development environment features a user-friendly, field proven, icon-based graphical programming tool, application downloader, and service/diagnostic tool.
