Design Support Center (DSC)

A Free Service to Help with Selection and Sizing

Receive expert knowledge & professional support in choosing the correct application and combination of Danfoss products including sizing and selection.

The Design Support Center Includes:

ASSISTANCE – We suggest appropriate solutions for given applications, executing part of a designers job related to sizing and optimizing Danfoss products, and assistance in dimensioning other devices in the system (pumps, chillers, etc...)

VERIFICATION - for finished or half finished designs, checking if our products are appropriately sized and fitted in the application.

CONVERSION - in existing designs changing conventional products for Danfoss products.

OPTIMIZATION – we help with choosing the optimal combination of Danfoss products to ensure energy efficiency. We also will include a rough calculation of energy savings potential.

Directions:

To take advantage of this service please download questionnaire using the QR code above and email to designsupportcenter@danfoss.com while copying your regional sales manager.

- DSC will reply within 2 days with an estimation of time needed to complete task.
- DSC guarantees confidentiality of all design related data.
- Sales Representative is obliged to report status of the project (won/lost) back to DSC.
- **Please provide designs in 'DWG' or 'DXF' format or in any Danfoss software supported files (Danfoss CH, Thermo Danfoss). PDFs and Pictures have very limited usability!**
