# PLUS+1<sup>®</sup> Controllers

## MC038-010 and MC038-012

### Mobile machine management

Danfoss PLUS+1<sup>®</sup> controllers are elements of the flexible, powerful, expandable, and affordable family of mobile machine management products. These devices are general-purpose controllers that are equally suited for use as a member of a distributed machine control system, with intelligence in every node, or as a stand-alone controller.

### Product highlights

Both controllers employ a Digital Signal Processor (DSP), providing the controller with extremely fast single cycle processing speed and 128K internal flash.

### Application development

The MC038-012 employs an application key that enables the use of Danfoss developed PLUS+1<sup>®</sup> GUIDE machine control solutions. The same PLUS+1<sup>®</sup> GUIDE HWD file is used with both controllers.

Users develop MC038-010 and MC038-012 applications with PLUS+1<sup>®</sup> GUIDE. This Microsoft Windows based development environment features a user-friendly, field proven, icon-based graphical programming tool, application downloader, and service/diagnostic tool.

**15 Inputs**

- (3 universal (DIN/AIN/FreqIN) that are user-defined as either:
  - *Analog*: with configurable ranges 0 to 5.25 V<sub>DC</sub> (with over range protection) or 0 to 36 V<sub>DC</sub>
  - *Digital*: pull up (5 V<sub>DC</sub>), pull down (0 V<sub>DC</sub>) or pull to center (2.5 V<sub>DC</sub>)
  - *Frequency* (timing): 1 Hz to 10 kHz
- (2) digital (DIN) configurable as pull up (5 V<sub>DC</sub>), pull down (0 V<sub>DC</sub>)
- (9) digital/analog (DIN/AIN) that are user-defined as either:
  - *Digital*: pull up (5 V<sub>DC</sub>), pull down (0 V<sub>DC</sub>) or pull to center (2.5 V<sub>DC</sub>)
  - *Analog*: 0 to 5.25 V<sub>DC</sub> or 0 to 36 V<sub>DC</sub>
- (1) fixed range analog (AIN/CAN shield) 0 to 5.25 V<sub>DC</sub> or CAN shield pin

**13 Outputs**

- (2) DOUT (2 A) configurable as source only
- (3) HDOUT (6 A) configurable as source only
- (3) HPWMOUT/DOUT (6 A), configurable as source only
- (4) HPWMOUT/DOUT (10 A) configurable as source only, can be used as bi-directional pairs, (see Dimensions and Pin Assignments, back page for pair assignments)
- (1) HPWMOUT/DOUT (10A) configurable as source only
- Outputs are powered by three independent power supply pins (see Dimensions and Pin Assignments, back page for output pin power supply assignments and maximum allowable current per power supply pin)
- All PWM outputs operate as open loop. The output is a constant voltage.

**! Caution**

PCB damage may occur.

To prevent damage to the module all module power supply + pins must be connected to the vehicle power supply to support advertised module maximum output current capacity. **DO NOT** use module power supply + pins to supply power to other modules on a machine.

**! Caution**

Warranty will be voided if device is opened.

Device is not field serviceable. Do not open the device.

Use care when wiring mating connector. Pinouts are for device pins.
