Safety instructions

IK3 general safety

The following safety instructions must be read carefully in order to install and use the product properly and to keep it in perfect working condition and to reduce the risk of misuse.

Potential damage to operator and product.
Do not use this product on machines in potentially explosive atmospheres unless the model is ATEX/RATEX certified to do so.

• Strictly adhere to the installation instructions contained in this document.
• Make sure that professional and competent personnel carry out the installation.
• Ensure that all site and prevailing safety regulations are fully respected.
• Make sure that this document is permanently available to the operator and maintenance personnel.
• Keep the transmission key when the set is not in use.
• On starting each working day, check to make sure that the STOP button and other safety measures are working.
• When in doubt, press the STOP button.
• Whenever several sets have been installed, make sure the transmitter is the right one. Identify the machine controlled on the label for this purpose on the transmitter or by using the display (in case it has one).
• Service the equipment periodically.
• When carrying out repairs, only use spare parts from Danfoss.

IK3 safety warnings

Potential damage to operator and product.
Follow the guidelines below to reduce risk of injury to the operator and the product.

• Use the device with the manufacturer’s battery and battery charger (if applicable).
• Only allow qualified personnel to operate the equipment.
• Always set the STOP button in the off position when not in use.
• Always press STOP before plugging in tether cable (if applicable).
• Do not operate product when visibility is limited.
• Make sure product is compatible with the machine.
• Avoid knocking or dropping the product.
• Do not use the product if a failure is detected.

Changes or modifications not approved by Danfoss can void the user’s authority to operate this product.
Safety instructions

Quick reference precautions

- Remove the transmission key only when the set is not in use or to deny the access
- When in doubt, press the STOP button
- Make sure the transmitter works with the machine to be handled
- After use set the contact key and the STOP button
- Do not use the set when visibility is limited
- Avoid knocking or dropping the set
Technical description

IK3 dimensions and identification

The illustration below details dimensions and features of the IK3 transmitter.

Dimensions in mm

1. Label for crane identification
2. LED
3. Maneuver elements
4. Contact key
5. Start push button
6. STOP button
7. Optional: Range limiter
8. External and extractable EP70 EEPROM module
9. Battery
10. 3.5 in TFT display
11. Lateral push buttons
IK3 start up

Use the information below to properly turn the transmitter ON (OPERATION mode).

1. Place a charged battery in the transmitter. The charge must be done following the instructions of the Battery Chargers’ Manual.

2. Turn the contact key.

3. Push and pull out the STOP button.
   LED will flash orange-green pulse. If the transmitter has LCD, it displays the identification of the machine and battery level (only if it has been pre-programmed).

4. Press the start button. The green LED will now light to indicate the transmitter is transmitting. Once the Tx is connected, press any maneuver button and its corresponding relay will be activated. Check to make sure all other maneuvers work in a coherent way with the expected movements.
Maintenance

IK3 maintenance tips

This product is designed for use in an industrial environment that may shorten the product’s lifespan. Use these tips to maximize the lifespan of the product.

- Use the hook/belt provided with the transmitter to prevent the transmitter from falling.
- Do not clean the transmitter with solvents or pressurized water; use a damp cloth or soft brush for cleaning.
- If the push buttons show signs of deterioration, contact the Authorized Technical Service for repair.
- Check if the battery contacts are correct, otherwise replace them.
- Ensure that the product is supplied with AAA alkaline batteries or has a rechargeable battery.
- Be sure to recharge or replace battery regularly.

Maintenance tips quick reference

IK3 troubleshooting

The transmitter has status monitoring LED’s which help identify irregularities. The most common signals are contained in the table below:

Setting up the CB70 battery charger

Use the information below to properly set up the CB70 battery charger.

The battery charger has two charging compartments that can simultaneously charge two batteries.

1. Connect the charger to a power source using the cable supplied.

   The red LED will switch.
Charger and battery

2. Place the batteries in the compartments of the battery charger.

3. Optional: If charging multiple batteries, wait at least 5 seconds before placing the second battery in the other compartment.
   Possible damage to battery!
   Be sure to charge batteries in environments with temperatures over 0° C.

CB70 status LEDs

Each battery compartment has an LED that indicates the status of the batteries’ charge.

- **Green LED; pulsing**: Battery is excessively depleted
- **Green LED; continuous**: Normal charging operation mode
- **Green LED; off**: Battery charging process is complete

The battery charger must be placed and used out of the danger area.

Remote control battery charging tips

The battery lifespan is estimated to be 500 recharging cycles and is largely dependent on the conditions of use.

To maximize the lifespan of the batteries and battery charger, follow these tips:

- Do not recharge the battery until needed, as shown with slow, red LED pulse on the transmitter
- Always charge the batteries at temperatures between 0° and 45° C
- Do not leave the battery charger or batteries in direct sunlight
- Charge batteries at least once every six months
- Avoid short circuits between the battery contacts; do not transport charged batteries in toolboxes or next to other metal objects
- Always keep contacts clean

Danfoss Power Solutions is a global manufacturer and supplier of high-quality hydraulic and electric components. We specialize in providing state-of-the-art technology and solutions that excel in the harsh operating conditions of the mobile off-highway market as well as the marine sector. Building on our extensive applications expertise, we work closely with you to ensure exceptional performance for a broad range of applications. We help you and other customers around the world speed up system development, reduce costs and bring vehicles and vessels to market faster.

Danfoss Power Solutions – your strongest partner in mobile hydraulics and mobile electrification.

Go to www.danfoss.com for further product information.

We offer you expert worldwide support for ensuring the best possible solutions for outstanding performance. And with an extensive network of Global Service Partners, we also provide you with comprehensive global service for all of our components.

Products we offer:
- DCV directional control valves
- Electric converters
- Electric machines
- Electric motors
- Hydrostatic motors
- Hydrostatic pumps
- Orbital motors
- PLUS+1® controllers
- PLUS+1® displays
- PLUS+1® joysticks and pedals
- PLUS+1® operator interfaces
- PLUS+1® sensors
- PLUS+1® software
- PLUS+1® software services, support and training
- Position controls and sensors
- PVG proportional valves
- Steering components and systems
- Telematics
