

Data Sheet

# JS1-H & PVG Sub-systems

Danfoss Power solutions (DPS) has more than 40 years of experience in market leading solutions for your application.

Our product portfolio contains a big variety of different product types which gives the opportunity to create sub-systems by combining two different DPS products.

The JS1-H joystick and our proportional valve group PVG could be one of these sub-systems. With its setup simplicity when it's best, it gives perfect controllability of the application and a very positive person to machine interaction.

**Features**

- Operator Presence switch
- Multiple output options
- Simultaneous operation of two proportional rollers
- Hall effect with two sensors per axis or long-life potentiometer position sensing
- Modular PVG concept
- For all PVG types 16-32-100-128-256
- Flow 5-500 l/min [1.3-132 US gal/min]
- Works with both compensated and uncompensated basic modules

Flow characteristics

Comprehensive technical literature is online at [www.danfoss.com](http://www.danfoss.com)

- PVG 32 Technical Information - BC00000038

JS1-H and PVG sub-system diagram

Power feedback line is needed to ensure same reference point JS1-H vs PVE. There could be a difference in voltage due to voltage drop in the line from the power supply.
