For more than 40 years, Danfoss has been developing state-of-the-art components and systems for mobile machinery used in off-highway operations around the world. We have become a preferred supplier by offering the best of what really matters: The hardware inside your vehicle application.

The MP1 motor is designed for use primarily in mobile equipment using existing and proven technology. These motors have been optimized with regard to options, life, package size and installed cost.

The MP1 motor is a fixed displacement axial piston motor and is intended for closed and open circuit medium power applications. These motors are designed primarily to be combined with other products in closed and open circuit systems to transfer and control hydraulic power.

The MP1 motors consists of two displacements in one package size. Three different configurations are available, an SAE A, B and cartridge style two-bolt configuration.

Features

Wide Range of Options
- Two displacements in a single package
- SAE A, B, and cartridge style two-bolt mounting configuration
- Tapered shaft with shaft seal dust protector for fan drive applications
- Proven reliability and performance
- Worldwide sales and service

Greater Total Efficiency
- Increased motor efficiency

Expanded Functionality
- PLUS+1® Compliant speed sensor option
- Integrated loop flushing valve option
- Anti-cavitation and shock valve option available

Machine Integration Benefits
- Industry leading motor length
- Metric and Inch O-ring boss system port interfaces
