All it takes to **measure, collect and analyze** energy consumption in heating and cooling applications

Discover the full range of ultrasonic heat & cooling meters and monitoring solutions.
Secondary side metering

SonoSelect™ 10
High-end ultrasonic energy meter for heating and cooling

Meter offerings
SonoSelect™ is a compact ultrasonic meter for measuring energy consumption in heating, cooling and combined heating/cooling applications in primarily residential buildings. Its high measuring accuracy and reliability makes it suitable for both tap water and district energy application measurements. The meter offers a new level of installation and commissioning simplicity by using SonoApp™ and meets all national certification requirements.

Main product benefits
- Top of class meter accuracy ensures valid billing of heating, cooling and domestic hot water
- Best in class battery lifetime (up to 17 years) or 230V mains powered – lowers replacement frequency
- Upgradeable and robust meter – lowers spendings for meter replacements
- Open communication protocols/interfaces increases flexibility
- Self diagnostics and high accuracy

Configurable via SonoApp™

Calculator
Separable and IP class 65

*) up to 16+1 year lifetime, no transport restrictions
Secondary side metering

**SonoSafe™ 10**
Mainstream ultrasonic meter for heating applications

**Meter offerings**
The ultrasonic meter SonoSafe™ is a compact and reliable meter offering basic features and functions. It can be installed in several heating applications within residential buildings and comes with all national certification requirements.

As SonoSelect™ it is manufactured in accordance with TS16949 automotive standards.

**Main product benefits**
- MID class II compliant – makes the meter fulfill basic market requirements
- Upgradable and robust meter – lowers spendings for meter replacements
- Open communication protocols/interfaces increases flexibility

*) up to 11 years of lifetime, no transport restrictions
**Primary side metering**

**SonoMeter™ 30**
Ultrasonic meter for demanding applications

**Meter offerings**
SonoMeter™ 30 is a compact ultrasonic meter for measuring both heat and cooling consumption at the entrance of the building or within district energy networks. It can be configured for both supply and return and offers up to 11 years of battery lifetime.

The meter is MID Class II B+D certified.

**Main product benefits**
- Multiple communication options available, e.g. for building automation purposes
- Comes with pulse in-/output as standard
- High dynamic range (1:250) improves measurement accuracy even on low flow rates
- Mains power with battery back-up secures no data loss even if power is lost
- Can be used in glycol applications (not MID certified)

**Target applications**

- **1-2 FAMILY HOUSES**
- **MULTI-FAMILY HOUSES**
- **COMMERCIAL**
- **DISTRICT ENERGY NETWORKS**
SonoSensor™ 30
Individual flow sensor for most common applications

**Meter offerings**
SonoSensor™ 30 is an ultrasonic flow sensor designed for heating, cooling or combined heating/cooling applications in medium sized local and district energy systems. Combined with the InfoCal™ 9 energy calculator it offers normal compact meter functionalities for medium sized hydronic applications.

The sensor is MID Class II certified.

**Main product benefits**
- Offers a 12 year battery lifetime lowering the replacement costs
- Measures volume every 1 sec. increases measurement accuracy
- Insensitive to dirt lowering the needs for replacing the sensor
- Low pressure loss

Utility metering

**Sono 3500 CT™**
Large size flow meter for commercial applications

**Meter offerings**
Sono 3500 CT™ is an ultrasonic flow meter designed for heating, cooling or combined heat/cool applications in larger sized local and district energy systems. Combined with a type approved heating/cooling energy calculator (e.g. InfoCal™ 9) it offers energy metering capabilities in larger applications.

The sensor is MID Class II certified.

**Main product benefits**
- For high and very high temperatures applications
- Remote version for very high temperature applications enhances the meter lifetime and lowers replacement costs
- No pressure loss reduces pump power and energy used for circulation

**Utility metering**

**InfoCal™ 9**
Energy calculator for flow sensors in commercial applications

**Meter offerings**
InfoCal™ 9 is an energy calculator, e.g., for combination with SONO 3500 CT™ flow meters or SonoSensor™ 30 flow sensors. It is designed for heating, cooling or combined heat/cool applications in local and district energy systems. The calculator is MID Class II B+D certified and comes in either a 230 V AC mains power supply or battery powered version offering a 12 year battery lifetime.

**Main product benefits**
- Covers a large range of sizes, from DN15 to DN1200
- High frequency of input pulses for flow sensor up to 200 Hz
- Wide temperature range increases the product usability
- Up to 100.0m flow cable length

Automatic Meter Reading

**SonoCollect™ 111 & 112**
Smart metering data concentrators

**Product offerings**
SonoCollect™ 111 and 112 are smart metering data concentrators for energy meter reading. They both come with a standardized wired and wireless M-Bus interface. The SonoCollect™ 111 can collect the data from up to 500 energy meters. For the SonoCollect™ 112 this is up to 80 energy meters, and it has a built-in GSM option. The extracted metering data is communicated to the Cloud or other analyzing tools via IP technology.

The wireless M-Bus is offering a new technology compliant to OMS making it possible to capture energy- and consumption data via open communication standards and high security levels. This makes it useful in all present and prospective infrastructures.

**Main product benefits**
- Highly flexible – reads non-proprietary standards eliminating complete meter replacements
- Easy remotely configuration and updating – eliminates on-site service
- Reading of up to 500 energy meters lowers the required number of concentrators

**Automatic Meter Reading**

**SonoRead™ 868**
Wireless Radio Receiver for meter reading

**Product offerings**
SonoRead™ 868 is a portable Wireless M-Bus T1 and C1 transceiver (OMS) with Bluetooth interface. It reads all OMS standardized meters.

Connecting the meter readings with the SonoApp™ Workspace via the SonoApp™ creates a powerful mobile radio meter reading system. This mobile radio meter reading system will administrate known and unknown meters and encryption keys.

**Main product benefits**
- Plug & play startup and easy to use – lowers time spend for configuration
- Universal reading of all types of meters and measurement types – increases usability and lowers need for component replacements

**SonoEnergy™**
Smart meter reading Cloud

**Product offerings**
SonoEnergy™ is a smart energy software offered as ‘Software as a Service’ (SaaS) platform for the overall integration of data, business processes and technologies. It collects measurements from SonoCollect™ or other data concentrators and communicates with 3rd party equipment, for reading out relevant information from the buildings and components in the field.

Consumption data supplied by SonoEnergy™ can be analyzed and ordered for further processes in other systems ex. billing solutions, energy advising solutions, optimization of grid, SCADA, BMS, etc.

**Main product benefits**
- Supports multiple meter reading technologies – lowers needs for component replacements
- Storage and processing of various data streams such as power, water, heat, pressure, temperature, etc. in one system
- Enables the provision of entire service concepts or single end-customer products in the area of smart metering and energy management

**Technical data**
- Automatic monthly basic readout
- Automatic advanced readout as often as necessary
- Import installations from SonoApp™
- Export to billing pre-defined format (.csv and .xml)
- User rights management
- Integrated map view for meters and data concentrators
- Individual user dashboard view for monitoring
- Graphics of measurements in meter details
- Grouping and sub-grouping possibilities
- E-mail or SMS notification on events and alarms
- Analysis of data
- Handling different business processes
- Unlimited logging per meter
