The CO₂ MiniPack Solution

The CO₂ MiniPack Solution makes it easy for the owners of small format stores to harness the benefits of CO₂. By combining five 100% compatible products into a single solution, the CO₂ MiniPack Solution delivers several key benefits:

- CO₂ made easy: fast setup and installation, even without extensive CO₂ know-how
- Compact and reliable: a small system footprint, designed to be fully serviceable

- Complete and convenient: five compatible products in a single solution for complete application control
- Reduced operational costs: optimal energy efficiency and pack security while keeping food safety in focus

The **CO₂ MiniPack Solution** is composed of **five new products**

CCMT Light

A highly reliable electric pressure-regulating valve optimized for transcritical CO₂ refrigeration.

AK-PC 572 Pack Controller

A complete pack solution for small store retailers that makes using CO₂ approachable, even for those with little-to-no experience using it.

EKE 1P

Used as an extension module for other Danfoss controllers or as a stepper valve driver.

EKE 2U

A backup power module designed to enhance system reliability and protect the compressor in case of power loss.

VLT® FC280

A VLT® refrigeration drive designed to reduce refrigeration system costs.
