

DrivePro® Spare Parts

Plan ahead, to avoid delays and improve uptime

To maximize uptime and maintain peak performance throughout the lifetime of your drives, make sure you are equipped with original DrivePro® Spare Parts. Danfoss Drives offers three customized packages to meet your exact requirements.

Critical repairs in good hands

In critical situations, the DrivePro® Spare Parts service provides immediate access to the spares you need to repair and maintain your drives. This means no unnecessary delays or extra delivery time for additional spare parts requirements discovered during repair as the spare parts packages are held on your site.

Extend lifetime

Keep your drives running at top efficiency to deliver optimal system performance. By timely replacement of components according to the drive preventive maintenance plan, your drive performs better, for much longer. Let us help calculate the business case for your installation.

Save time, save cost

- Save delivery time. By stocking Danfoss Drives' optimized package of components in your own inventory, you can react fast in the event of an unexpected breakdown and restore normal operation quickly.

- Save searching time. It's easy to find the right spare parts package with Danfoss Drives' efficient online spare parts search system.
- A customized service plan means that where several drives of the same or similar types are used, you avoid the unnecessary duplication associated with purchasing individual sets of spares for each of the drives.
- Save overall cost. When you order spare parts together with a new drive, you get an especially economical deal.

Always up to date

DrivePro® Spare Parts service always provide genuine OEM parts in original packaging with the most up-to-date software and firmware.

Know your budget

You know the annual cost of spare parts inventory well in advance. This predictability gives you a strong business case and a stable, reliable budget.

Stay calm. You're covered

All DrivePro® services offer the comfort of knowing Danfoss Drives takes responsibility for supporting its AC drives products well into the future:

- Industry's longest warranty coverage, up to six years
- Spare parts support for up to 10 years beyond discontinuation of a product line
- 24/7 delivery
- One call, one single point of contact
- Certified factory and local technicians
- Original equipment replacement parts

Three levels of coverage	
 DrivePro® Spare Parts Standard Package	An optimized set of recommended components tailored to your AC drive. The components in this kit are selected on the basis of service data collected by Danfoss over many years and can be expected to cover at least 50% of service case repairs. You are guaranteed optimal operating time and avoid production stops due to lack of spare parts.
 DrivePro® Spare Parts Advanced Package	A set of recommended essential spare parts for a specific AC drive ready for critical repairs. All the necessary components in this kit reduce the risk up to 80% of most service case repairs. This kit allows the device to be repaired with a single visit by a DrivePro® service partner.
 DrivePro® Spare Parts Maintenance Package	Consists of a full set of fan spares for a specific device type and is intended primarily as an aid to routine maintenance. This kit supports the scheduled maintenance program for your basic installation.
