

DrivePro® Site Assessment

Efficient management of your AC drive installed base

Having the ability to manage your installed base of AC drives and plan for the future is now easier than ever.

DrivePro® Site Assessment provides you with a detailed survey of all your AC drives, delivering a clear picture of current and future maintenance needs.

Mitigate risk

Many factors influence the performance of your equipment: general wear and tear of the equipment, age, and risk exposure. Some factors influence asset conditions directly, impacting uptime of your equipment and increasing maintenance costs.

For example, ambient conditions significantly impact life expectancy of a product. Regular assessment mitigates risk of failure by updating knowledge of ambient conditions, which can change dramatically after installation over the lifetime of the product and/or application.

Knowledge is power

With the DrivePro® Site Assessment service, our experts collect information on AC drives located on your site. The data collected helps to visualize your asset

conditions, life cycle status of the product, and criticality of the asset to the plant. This helps to recognize the risk factors that could impact the uptime of your plant.

Strategic Asset Management

We assess the AC drives data collected through DrivePro® Site Assessment and help you to have an overview of risk factors, in combination of all the parameters visually inspected at site. We give you a report on key facts which would help management to take decisions on maintenance, planning, retrofits and on future upgrades for a profitable production at your site.

Our recommendations empower you to plan maintenance, retrofits, and future upgrades to optimize profitable production at your site.

Stay calm. You're covered

All DrivePro® services offer the comfort of knowing Danfoss Drives takes responsibility for supporting its AC drives products well into the future:

- Industry's longest warranty coverage, up to six years
- Spare parts support for up to 10 years beyond discontinuation of a product line
- 24/7 delivery
- One call, one single point of contact
- Certified factory and local technicians
- Original equipment replacement parts

Maximize

profitability with effective asset management

Feature	Benefit
Complete overview of AC drives on-site	Life cycle status Asset risk analysis
Risk mitigation	Highlight high-risk AC drives Selection of services from well-designed DrivePro® portfolio
Interactive recommendation	Optimized planning ensuring highest productivity and economic efficiency

DrivePro® Site Assessment at a glance

We look at every AC drive onsite which enables us to record, review and make recommendations for your product life cycle journey.

The assessment is carried out by our expert engineers using industry-leading assessment tools. This way we ensure support in optimization and efficiencies for many years to come.

How to order

Contact your local sales office to request DrivePro® Site Assessment. Orders can be placed by email or by telephone.
