

Data Sheet

Electric expansion valve Type **AKV 15** and **AKV 20**

For liquid injection into evaporators

AKV are electrically operated expansion valves designed for refrigerating plants.

The AKV valves are normally controlled by a controller from Danfoss' range of ADAP- KOOL® controllers.

The AKV valves are supplied as a component programme, as follows:

- Separate valve
- Separate coil with terminal box or cable
- Spare parts in the form upper part, orifice and filter

Valve capacity is indicated with a number forming part of the type designation. The number represents the size of the orifice of the valve in question. A valve with orifice 3 will for example be designated AKV 15-3. The orifice assembly is replaceable.

Features

- Refrigerants: R134a, R22, R23, R404A, R407A, R407C, R407F, R407H, R410A, R422B, R422D, R438A, R448A, R449A, R449B, R450A, R452A, R463A, R507, R513A, R513B, R515A, R515B, R744.
- For a complete list of approved refrigerants, visit <https://store.danfoss.com/> and search for individual code numbers, where refrigerants are listed as part of technical data.
- The valve requires no adjustment
- Wide regulation range Replaceable orifice assembly
- Both expansion valve and solenoid valve
- Wide range of AC and DC coils

Function

Figure 1: Function

The valve capacity is regulated by means of pulse-width modulation. Within a period of six seconds a voltage signal from the controller will be transmitted to and removed from the valve coil. This makes the valve open and close for the flow of refrigerant.

The relation between this opening and closing time indicates the actual capacity. If there is an intense need for refrigeration, the valve will remain open for almost all six seconds of the period. If the required amount of refrigeration is modest, the valve will only stay open during a fraction of the period.

The amount of refrigeration needed is determined by the controller. When no refrigeration is required, the valve will remain closed and thus function as a solenoid valve.

Technical data

Table 4: Technical data

Valve type	AKV 15	AKV 20
Tolerance of coil voltage (coil dependent)	10 / - 15%	10 / - 15%
Enclosure to IEC 529	Max. IP67	Max. IP67
Working principle	Pulse Width Modulation (PWM)	
Recommended period of time	6 sec.	6 sec.
Capacity (R404A/R507)	14 – 85 kW / 3.98 – 24.17 ton	56 – 530 kW / 15.92 – 150.70 ton
Regulation range (Capacity range)	10 – 100%	10 – 100%
Connection	Solder	Solder or weld
Evaporating temperature	- 50 – 60 °C / -58 – 140 °F	- 40 – 60 °C / -104 – 140 °F
Ambient temperature (coil dependent)	- 40 – 50 °C / -104 – 122 °F	- 40 – 50 °C / -104 – 122 °F
MOPD (Max. Opening Pressure Differential)	22 bar / 319 psig	18 bar / 261 psig
Filter, replaceable	External 100 µm	External 100 µm
Max. working pressure	AKV 15-1 – 15-4: 46 barg / 667 psig	AKV 20-1 – 20-5: 28 barg / 406 psig

Filter

Figure 2: Filter

On plants using AKV 15 or AKV 20 a filter must be mounted in front of AKV 15 and AKV 20.

Online support

Danfoss offers a wide range of support along with our products, including digital product information, software, mobile apps, and expert guidance. See the possibilities below.

The Danfoss Product Store

The Danfoss Product Store is your one-stop shop for everything product related—no matter where you are in the world or what area of the cooling industry you work in. Get quick access to essential information like product specs, code numbers, technical documentation, certifications, accessories, and more.

Start browsing at store.danfoss.com.

Find technical documentation

Find the technical documentation you need to get your project up and running. Get direct access to our official collection of data sheets, certificates and declarations, manuals and guides, 3D models and drawings, case stories, brochures, and much more.

Start searching now at www.danfoss.com/en/service-and-support/documentation.

Danfoss Learning

Danfoss Learning is a free online learning platform. It features courses and materials specifically designed to help engineers, installers, service technicians, and wholesalers better understand the products, applications, industry topics, and trends that will help you do your job better.

Create your Danfoss Learning account for free at www.danfoss.com/en/service-and-support/learning.

Get local information and support

Local Danfoss websites are the main sources for help and information about our company and products. Find product availability, get the latest regional news, or connect with a nearby expert—all in your own language.

Find your local Danfoss website here: www.danfoss.com/en/choose-region.
