

## Data sheet

**Check valves**

VCH 30, VCH 60, VCH 120 and VCH 150

The function of the non-return valve is to allow flow in one direction while blocking it in the other.

The valve incorporates a conical poppet design, which ensures sealing with a low viscosity medium such as water.

The Water must be clean (according to the EU drinking water directives 98/83/EC) and must be free from abrasive sediments.

The valves are available for flows of 30 l/min, 60 l/min, 120 l/min. and 150 l/min.

**If the recommendations in the manual are not followed, Danfoss reserves the right to void the warranty.**

**Features**

- The non-return valve is produced in stainless steel AISI 304 L/W.No. 1.4301
