

Fact Sheet

DrivePro® Site Assessment

Plan ahead to avoid delays and **improve uptime**

DrivePro® Site Assessment

Maximize

profitability with
effective asset
management

Are you aware of the condition and life cycle phase of your assets?

We recognize it is very important to maintain your assets throughout their lifetime to optimize performance. To plan proactive VFD maintenance and keep processes running when it is most urgently needed, it is important to be aware of the current condition of your assets.

Are you able to perform cost effective maintenance on your variable frequency drives? **Stay calm. You're covered.**

All DrivePro® Life Cycle Services offer the comfort of knowing Danfoss Drives takes responsibility for supporting its products well into the future with the following features

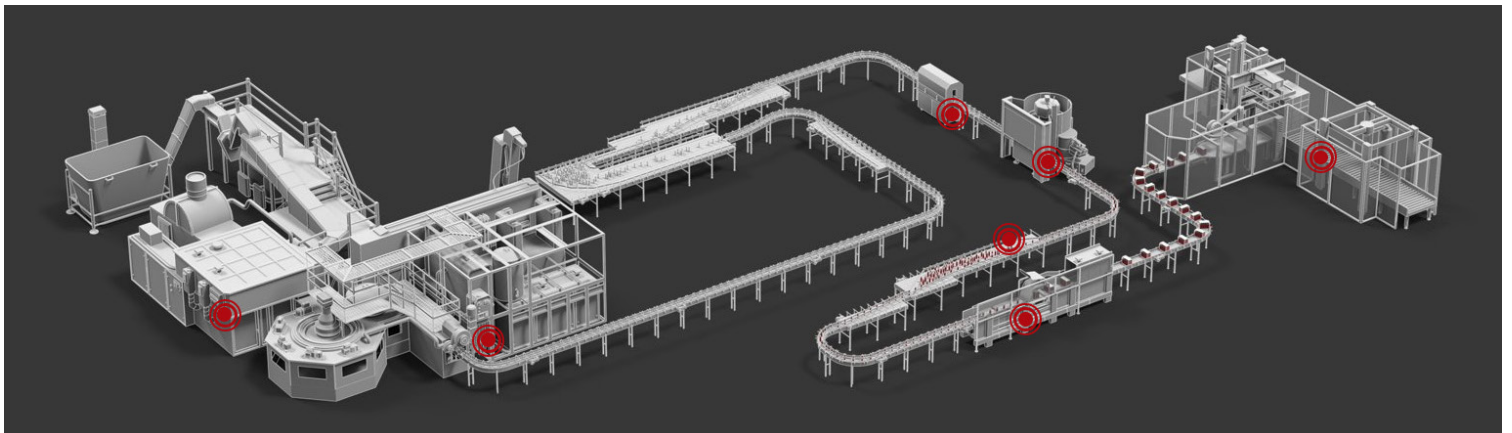

- Industry's longest coverage, up to ten years
- 24/7 factory technical support
- Certified factory and local technicians
- Original equipment replacement parts
- Exchange - QuickShip drives for urgent needs
- Retrofit and preventive maintenance programs

What is involved in a site assessment?

Our well-trained experts assess your facilities VFD installed base and review your assets based on visual conditions, and evaluate the life cycle stage of each individual asset. Based on this assessment our experts provide a tailored service solution which will enable you to optimize uptime and reduce maintenance costs.

DrivePro® Site Assessment includes:

- Site assessment by experts
- Visual conditions at installation
- Life cycle assessment
- Identify asset risk
- Single view to entire facility
- Optimal decisions
- Recommendations
- Improving productivity & profitability
