Virtual instructor-led courses are delivered electronically (live) each day. Each daily session is four-hours in length (unless otherwise specified) with breaks in between topics. Each session incorporates live demonstrations, product materials and instructor interaction via the internet, allowing for an up-close and personal learning experience. Participants will interact with instructors and other attendees, see live demonstrations of equipment, and engage in classroom activities and group discussions in real time, creating a personalized learning environment much like you would experience if you were physically in the classroom. Academic testing is accomplished via the internet, utilizing secure professional web-based software. Once linked to the internet, and using nothing more than your computer, web-camera and microphone, you can join our Virtual Classroom from the convenience of your computer regardless of location. Requirements include: valid email address, personal computer. Last revised 10/10/23
